## SAUNDERS RAMOS

**Bibliographie officielle** Virago Press  
 This classic exploration of the Goddess through time and throughout the world draws on religious, cultural, and archaeological sources to recreate the Goddess religion that is humanity's heritage. Now, with a new introduction and full-color artwork, this passionate and important text shows even more clearly that the religion of the Goddess--which is tied to the cycles of women's bodies, the seasons, the phases of the moon, and the fertility of the earth--was the original religion of all humanity.  
[The Rhythm Factor in Human Behavior](#) Editions Eyrolles  
 At once a beautifully poetic memoir and an exploration of the various ways we live in the world, *A Language Older Than Words* explains violence as a pathology that touches every aspect of our lives and indeed affects all aspects of life on Earth. This chronicle of a young man's drive to transcend domestic abuse offers a challenging look at our worldwide sense of community and how we can make things better.  
*Current Catalog* Harper Collins  
 The essays in this collection explore ideas about women and their positions in Indian society from the earliest history to the present day. It is designed to provide primary material from literary, historical and sociological sources and to guide critical exploration of specific issues.  
*Who's Who in the World, 1978-1979* Marquis Who's Who  
 First multi-year cumulation covers six years: 1965-70.  
**Subject Catalog** Chelsea Green Publishing  
 Stanley traces women's inventions in five vital areas of technology worldwide--agriculture, medicine, reproduction, machines, and computers.  
*Les Livres de l'année-Biblio* Thierry Souccar Éditions  
 In this far-ranging and heartening collection, Derrick Jensen gathers conversations with environmentalists, theologians, Native Americans, psychologists, and feminists, engaging some of our best minds in an exploration of more peaceful ways to live on Earth. Included here is Dave Foreman on biodiversity, Matthew Fox on Christianity and nature, Jerry Mander on technology, and Terry Tempest Williams on an erotic connection to the land. With intelligence and compassion, *Listening to the Land* moves from a look at the condition of the environment and the health of our spirit to a beautiful evocation of eros and a life based on love.  
**AB Bookman's Weekly** Flashpoint Press  
 Describes the role of sunlight and moonlight in setting bodily rhythms, which effect every aspect of our health and well-being.  
[Who was who in America](#) Tarcher

"Has science really explained the world we live in? This book takes you through a journey of discovery. It offers up a very simple alternative explanation to our understanding of science. By the end of the book your eyes will be truly opened." -- Back cover.  
**Bibliographie de la France** Oxford University Press  
 What did sex mean for ordinary people before the sexual revolution of the 1960s and 1970s, who were often pitied by later generations as repressed, unfulfilled and full of moral anxiety? This book provides the first rounded, first-hand account of sexuality in marriage in the early and mid-twentieth century. These award-winning authors look beyond conventions of silence among the respectable majority to challenge stereotypes of ignorance and inhibition. Based on vivid, compelling and frank testimonies from a socially and geographically diverse range of individuals, the book explores a spectrum of sexual experiences, from learning about sex and sexual practices in courtship, to attitudes to the body, marital ideals and birth control. It demonstrates that while the era's emphasis on silence and strict moral codes could for some be a source of inhibition and dissatisfaction, for many the culture of privacy and innocence was central to fulfilling and pleasurable intimate lives.  
*Who's who in U.S. Writers, Editors & Poets* Marquis Who's Who  
 Your students and users will find biographical information on approximately 300 modern writers in this volume of Contemporary Authors(R).  
[Je choisis ma contraception](#) Cosimo, Inc.  
*What We Leave Behind* is a piercing, impassioned guide to living a truly responsible life on earth. Human waste, once considered a gift to the soil, has become toxic material that has broken the essential cycle of decay and regeneration. Here, award-winning author Derrick Jensen and activist Aric McBay weave historical analysis and devastatingly beautiful prose to remind us that life—human and nonhuman—will not go on unless we do everything we can to facilitate the most basic process on earth, the root of sustainability: one being's waste must always become another being's food.  
[The Adventures of Jodelle](#) Chelsea Green Publishing  
 One of the 1960s counterculture's most fascinating characters was Kerry Wendell Thornley -- a writer, philosopher, Zen dishwasher, enlightened prankster, and, possibly, an Oswald double with disturbing ties to the Kennedy assassination. A lifelong provocateur, Thornley was linked to many of the fringe elements of the time. He helped create the spoof religion called the Discordian Society and its tract, the Principia Discordia. He coined the term "paganism" to describe various nature religions. And he befriended Robert Anton Wilson, inspired the Illuminatus, and gave his anarchic support to the Bavarian Illuminati, a

brilliant prank.

**Historia Discordia** Contemporary Authors  
 S'INFORMER AVANT DE CHOISIR La pilule est-elle la meilleure option comme contraception ? Quelle femme ne s'est pas posé cette question ? D'autant que la pilule a défrayé la chronique à la suite de plusieurs accidents vasculaires dramatiques. Faut-il lui préférer le stérilet ? Que penser des méthodes de contraception naturelles ? Et si la solution se trouvait du côté de la contraception masculine ? Une contraception ne se choisit pas de la même manière selon qu'on est une adolescente, une jeune mère ou une femme en préménopause. À chaque âge, sa sexualité, sa stratégie. Le choix doit permettre le meilleur compromis possible entre efficacité, sécurité et simplicité. Le Dr Bérengère Arnal accompagne les femmes dans ce choix depuis plus de 30 ans avec le souci constant de prendre en charge globalement leur santé. Elle dresse ici un bilan des connaissances scientifiques, partage son expérience d'une médecine holistique et intégrative, et émet ses recommandations. Ce livre, écrit avec une grande sensibilité, est d'une valeur inestimable pour les femmes. Exhaustif, précis, concret, il fourmille d'informations afin que chacune puisse faire son choix en toute connaissance de cause et en toute liberté. "Un livre indispensable, remarquablement documenté !" - Dr Jean-Claude EMPERAIRE, endocrinologue Bérengère ARNAL-MORVAN est médecin de la femme et phytothérapeute. Elle se décrit comme une gynécologue allopathe pratiquant une médecine holistique, intégrative et écologique. Elle milite pour la protection de la santé des femmes. Conférencière et enseignante en France et à l'étranger, elle est l'auteure de nombreux ouvrages et articles sur la santé de la femme au naturel.  
*The Light Book* Cambridge University Press  
 The embarrassment and alienation we often feel when the word 'vagina' comes up in conversation is fairly new. In this book, Naomi Wolf explains why the vagina deserves an understanding of its own cultural lineage and ancestry because, what is true of the female body in general, is more true of the vagina than of any other feminine aspect.  
**Bibliographie nationale française** Rutgers University Press  
 Chacun sa contraception ! Pilule, stérilet, symptothermie, Billings... De nos jours, les possibilités en matière de contraception n'ont jamais été aussi variées. Malheureusement, l'éducation sexuelle ne les aborde que trop rarement, de même que le f  
*A Language Older Than Words* Ballantine Books  
 A Pop Art classic from the 1960s, *The Adventures of Jodelle* (written by Pierre Bartier) is a very early adult graphic novel from the legendary French comics publisher Eric Losfeld. The *Adventures of Jodelle* is a satirical spy adventure set in an Asterix-

style anachronistic Cesarean fantasy Rome featuring both billboards and vampires. It melds the bold compositional skills of a top pop-art-era draftsman with a unique sensitivity to the comics medium, and was published in English in 1967 by Grove Press, whose epic editor-in-chief Richard Seaver also provided the translation.

*Blinded by Science IAP*

Incensed and hopeful, impassioned and lucid, this volume focuses on mankind's ability to adapt to the impending ecological revolution.

**The Great Cosmic Mother** Seven Stories Press

The most extensive collection in print documenting the Discordian Society's wild and woolly legacy, *Historia Discordia* features the unique worldview and wit of such illuminated iconoclasts as Robert Anton Wilson and Discordian founders Greg Hill and Kerry Thornley. Chronicling Discordianism's halcyon days, *Historia Discordia* presents a fun and freewheeling romp through rare photos, holy tracts, art collages, and fnoords, many of which appear for the first time in print. "Like communication-god Thoth with his yammering ape, like the all-important noise that Count

Korzybski assures us must accompany our every signal, no harmony is possible without an acknowledgement and understanding of discord. Born from the bowling-alley epiphanies of Greg Hill and Kerry Thornley, its disruptive teachings disseminated through the incendiary writings of Robert Anton Wilson and other Eristic luminaries, the Discordian Society has unexpectedly become a landmark of gleefully aggressive sanity in a chaotic and incoherent world. Through this book, we can all involve ourselves in their gloriously constructive quarrel." --Alan Moore

*Contemporary Authors Rvp Press*

This extraordinary book shows how specific musical tones and intervals are related to color, periods of time, the sun, the planets and all the natural cycles and rhythms we find in the universe around us. Cousto reveals how music is truly the language of the cosmos and of the natural world.

**Sex Before the Sexual Revolution**

Hailed as a landmark in the development of experimental methods when it appeared in 1975, *Design and Analysis of Time-Series Experiments* is available again after several years of being out of print. Gene V Glass, Victor L. Willson and John M. Gottman

have carried forward the design and analysis of perhaps the most powerful and useful quasi-experimental design identified by their mentors in the classic Campbell & Stanley text *Experimental and Quasi-experimental Design for Research* (1966). In an era when governments seek to resolve questions of experimental validity by fiat and the label "Scientifically Based Research" is appropriated for only certain privileged experimental designs, nothing could be more appropriate than to bring back the classic text that challenges doctrinaire opinions of proper causal analysis. Glass, Willson & Gottman introduce and illustrate an armamentarium of interrupted time-series experimental designs that offer some of the most powerful tools for discovering and validating causal relationships in social and education policy analysis. Drawing on the ground-breaking statistical analytic tools of Box & Jenkins, the authors extend the comprehensive autoregressive-integrated-moving-averages (ARIMA) model to accommodate significance testing and estimation of the effects of interventions into real world time-series. Designs and full statistical analyses are richly illustrated with actual examples from education, behavioral psychology, and sociology.
