From the renowned psychologist who introduced the world to “growth mindset” comes this updated edition of the million-copy bestseller—featuring transformative insights into redefining success, building lifelong resilience, and supercharging self-improvement. “Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life.”—Bill Gates,

GatesNotes “It’s not always the people who start out the smartest who end up the smartest.” After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own. *The Law of Sale and Lease* Partridge Africa

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the ‘elephant in the room’. These authors note that ‘the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road’. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the ‘gap’ that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to

what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where “safe spaces” or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

The COVID-19 pandemic has shaken long-accepted beliefs about education, showing that learning can occur anywhere, at any time, and that education systems are not too heavy to move. When surveyed in May 2020, only around one-fifth of OECD education systems aimed to reinstate the status quo. Policy makers must therefore maintain the momentum of collective emergency action to drive education into a new and better normal.

Schools and teachers are facing various challenges in a rapidly changing world. In such circumstances, discussing and sharing concerns of mutual interest regarding policy, practice and research is crucial to creating more sophisticated understandings of the various challenges as a first step in the improvement of education. While the future should not be imprisoned in the past,

the past does provide valuable lessons that will undergo new iterations in constructing the future. The future will be multi-faceted and complex and the different chapters included in this book are intended to provide important contributions from which to build the future of education. The different chapters provide readers with international perspectives, frameworks and empirical evidence of legacies, continuities and changes in educational policy, practice and research in teaching, teacher education and learning. We hope that they inspire the readers to build the future and to change their own professional realities. —Cheryl J. Craig, Ph.D., Professor, University of Houston, Houston, TX, USA, Secretary, ISATT This book metaphorically captures the looking backward to the past—pressing forward to the future that typically takes place on celebratory occasions. It causes us to pause and remember even as we race toward a time unknown to us. In a sense, the authors featured in this book serve as tour guides pointing out legacies, continuities and changes in teaching and teacher education. I strongly urge readers not only to peruse the chapters that follow, but to distill them to their essences and to glean what is of value to be learned from them. In conclusion, the ISATT Executive especially thanks the co-editors of this volume who have compiled a superb collection of chapters on a timely and relevant topic.

This volume presents clearly defined and described evidence-based positive psychology interventions (PPIs), which have been validated in multi-cultural contexts. It discusses validated PPIs which have been shown to have a significant impact in both clinical and real-world settings. From the late 1990s, there has been an upsurge in popular psychological “self-help” publications drawing from processes and principles of positive psychology. These publications are based on clinically validated PPI studies and translated in a “consumer friendly” manner. However, in these popular works the intervention methods are significantly altered from the original forms, and the contexts of the consumers are meaningfully different from those of the original study populations, the impact on outcome variables are often misinterpreted or over-inflated, and incorrect outcome variables are targeted. Original research articles also do not extensively discuss the content of the interventions, but merely present short descriptions of the PPI. As such, the intervention content cannot accurately be translated into practice. Hence, the need for this volume which discusses in depth how validated PPIs in various multi-cultural contexts work in both clinical and real-world settings.

"In an ideal world, all children would grow up in a stable, nurturing and healthy home. However, the reality is that globally, many bear the brunt of conflicts, trafficking, poverty, sexual victimisation, broken families, school disruption and harming cultural practices. Socialisation structures to teach children the fundamental moral values of right and wrong are often absent, and children spend too many hours on social media platforms or playing games on smart devices, which affects their physical, emotional and psychological development. It is therefore hardly

surprising that the world is seeing an increase in youth offenders. Child and youth misbehaviour in South Africa addresses the complex and poorly understood phenomenon of juvenile misbehaviour and the factors that cause these activities. Child and youth misbehaviour in South Africa discusses and analyses various presumptions on the nature and causes of aberrant behaviour and assesses them critically with regard to their applicability to South Africa. It presents the relevant legal processes pertaining to young people and reinforces theoretical explanations with research and real-world examples. The female youth offender is also given special attention in this book. Child and youth misbehaviour in South Africa is aimed at enabling both practitioners and students to address the plight of the South African youth in a constructive way and so become part of creating a safer South Africa for its people." --Cover.

In this work, G.A. Swanson and Hugh Marsh present an interpretive and analytical study of the function of internal auditing, not only from the viewpoint of its role in an organization, but also in regard to the role it plays in the economics of societies and governments. They create a theory of internal auditing and place it within the context of a scientific conceptual framework called Living Systems Theory. Using this approach, they are able to provide a basis for developing a systematic theoretical framework of internal auditing, as well as a theory based on observable, measurable entities. The book begins with a survey of the auditing profession and an introduction to the basic principles of the Living Systems Theory. From this base, Swanson and Marsh discuss a series of specific issues and areas of concern in internal auditing, including its functions, profession, and history, and its professional standards. Subsequent chapters address such topics as money-information, non-monetary quantitative information, estimating compound measurement and forecasting error, non-quantitative assessments, concrete process analysis and living systems process analysis, and ethics. Throughout the book, Swanson and Marsh identify the advantages of using the living systems theory to advance the knowledge and understanding of organizations, and also propose a higher level of internal audit functions that can advance modern societies. This work will be an important tool for members of the accounting and auditing professions, for students of business and accounting practices, and for professionals in other business and finance positions.

"What is the prize, and who pays the price? The desired and the desirable are often constellated through our ideas of what is undesired and undesirable, deeply knotted into our sense of self, our sense of where and how we fit into the world. These notions of desire form the backdrop to this powerful volume which examines the historical continuities and interruptions of heteronormativity in South African society. Leading and emerging scholars disentangle the strands of particular sexual identities, and deepen the reader's understanding of the multiple workings of

heteronormativity in South African society in particular, and sexuality in general. Through analyzing where and how heteronormativity intersects with other axes of power and social identity, contributors to this volume reveal that it is not monolithic, and heterosexuality as the South African norm is effectively 'outed' from within heteronormativity. The chapters extend beyond the well researched areas of sexuality - same sexualities, HIV/AIDS and gender-based violence - to less discussed areas, such as childhood sexuality and disability. The multiplicity of issues raised have relevance for a range of readers interested in the fledgling field of Sexualities Studies, and in its significance the scholarship extends well beyond the borders of South Africa"--Cover.
