Smart Grids Food & Agriculture Org.

The latest edition features a new chapter on implementation and operation of an integrated smart grid with updates to multiple chapters throughout the text. New sections on Internet of things, and how they relate to smart grids and smart cities, have also been added to the book. It describes the impetus for change in the electric utility industry and discusses the business drivers, benefits, and market outlook of the smart grid initiative. The book identifies the technical framework of enabling technologies and smart solutions and describes the role of technology developments and coordinated standards in smart grid, including various initiatives and organizations helping to drive the smart grid effort. With chapters written by leading experts in the field, the text explains how to plan, integrate, implement, and operate a smart grid.

Forging Subregional Links in
Transportation and Logistics in South
Asia Springer

This volume presents a portfolio of cases and applications on technology roadmapping (TRM) for products and services. It provides a brief overview on criteria or metrics used for evaluating the success level of TRM and then offers

six case examples from sectors such as transportation, smart technologies and household electronics. A new innovation in this book is a section of detailed technology roadmap samples that technology managers can apply to emerging technologies.

Review of the Fund's Regional Technical Assistance Centers Springer Science & Business Media

This book critically examines the relationship between the United Nations Organization and the small states of the Pacific islands. It provides an in-depth coverage of the United Nations, coupled with how Pacific Small Island Developing States interact. It covers three themes, the first one being the position of the UN on the Pacific Islands, which examines the role of the many UN organs, agencies and programs in strengthening individual countries and the region as a whole. It examines the manner in which the UN's activities have benefited Pacific nations, territories and peoples. The second theme deals with the Pacific states in the UN, and examines the participation of Pacific nations and territories in the UN's various organs, agencies, and programmes. It analyses the contribution they have made to the effectiveness of the organization, as distinct from the benefits they have sought to gain from it. The third and last theme deals with small states in global public policy, taking a broader look at how small states are faring within the UN

system in the age of global discourse on shared public goods/public policy concerns.

The International Handbook of Educational Research in the Asia-Pacific Region IICA

With the widespread availability of high-speed, high-capacity microprocessors and microcomputers with high-speed communication ability, and sophisticated energy analytics software, the technology to support deployment of automated diagnostics is now available, and the opportunity to apply automated fault detection and diagnostics to every system and piece of equipment in a facility, as well as for whole buildings, is imminent. The purpose of this book is to share information with a broad audience on the state of automated fault detection and diagnostics for buildings applications, the benefits of those applications, emerging diagnostic technology, examples of field deployments, the relationship to codes and standards, automated diagnostic tools presently available, guidance on how to use automated diagnostics, and related issues.

The United Nations and the Pacific Islands UNEP/Earthprint

"Written for public and private sector professionals in South Asia, the book presents policy options that would enable the subregion to compete in a rapidly changing global environment. While the book is designed to stimulate informed dialogue among key stakeholders, the unique approach and lessons learned have broad applications of interest to a wider audience."--BOOK JACKET.

Department of the Interior and Related Agencies Appropriations for 1999: Justification of the budget estimates, U.S. Geological Survey International

Monetary Fund

This publication presents the proceedings of the Regional Technical Meeting on Seed Policy and Programmes in the Near East and North Africa, held in Larnaca, Cyprus from 27 June to 2 July 1999. The meeting was organised by the Agricultural Research Institute in Nicosia, Cyprus in collaboration with the Seed and Plant Genetic Resources Service of the FAO. In line with the Rome Declaration on World Food Security and the World Food Summit Plan of Action, the meeting recognised that one of the major challenges facing most countries in the Near East and North Africa is the need to invest significant resources in strengthening their capacity to increase the availability of good quality seeds of a wider range of plant varieties. This will contribute to the maximisation of both agrobiodiversity and productivity, in order to achieve national food security while reducing environmental degradation and the depletion of natural resources. The meeting proposed and agreed to establish a Regional Consultative Forum on Seed Policy and Programmes for the Near East and Africa (CFS-NENA). The forum will facilitate intercountry scientific and technical co-operation on seed production and supply, and promote crop genetic resources evaluation, conservation and utilisation in the region.

Briefing Book John Wiley & Sons

Energy efficiency is more of a journey than a battle. It starts with small steps, taken at the local and state levels. It is a matter of identifying and then practicing good habits in our daily lives, at home and at work. Every idea and process described in this book, if performed reasonably well, will put money in your pocket. You will not only save money; you will probably make money—and you

will take important steps toward saving the planet. *Power Economics* is a book for thoughtful people who want to cut their energy costs and diminish the harmful effects of greenhouse gas emissions. Climate change and global warming are not speculative fantasies. They are real. They threaten communities, towns, cities, regions, nations, and continents. Even if you don't care about polar bears and penguins, the effects of melting icecaps and shifting ocean currents will transform your life and the lives of the people around you. *Power Economics* offers practical steps and achievable strategies for reducing the destructive impact of climate change and global warming. Yes, we need energy to live and to sustain our economies. But we don't need to burn fossil fuels and release CO₂ gas at levels that will result in a global catastrophe. There are reasonable alternatives to our current practices. None of the ideas that described in this book are entirely new or totally unfamiliar. They aren't extreme or bizarre. They won't require harsh or draconian measures to work. All of them follow basic rules of common sense and can be achieved at reasonable cost. "I have done my best to convey the complexity and urgency of the matter. I hope that you find this book informative and useful. Working together, we can shed many of our wasteful energy habits and begin the task of building a world that is safe, sustainable and healthy," writes author and energy expert Elena Cahill.

Report of the Fourth Meeting of the WECAFC/CRFM/IFREMER Working Group on the Shrimp and Groundfish of the Northern Brazil-Guianas BID-INTAL
Regional technical assistance centers

have become an increasingly important modality for Fund technical assistance. This review is a response to Executive Directors' calls for close monitoring and regular evaluation of their operations. The centers include, the Africa Regional Technical Assistance Centers (AFRITACs), the Caribbean Regional Technical Assistance Center (CARTAC) and the Pacific Financial Technical Assistance Center.

Department of the Interior and Related Agencies Appropriations for 2000: Justification of the budget estimates: U.S. Geological Survey
Springer

The Fourth Meeting of the WECAFC/CRFM/IFREMER Working Group on the Shrimp and Groundfish of the Northern Brazil-Guianas Shelf was held virtually on 18 and 19 November 2020. Among the 39 participants were Working Group Members, national fisheries officers and representatives of government organizations, academia, fishing industry, partner organizations and the FAO. The final draft of the Sub-regional EAF Strategy and Fisheries Management Plan (FMP) for the shrimp and groundfish fisheries of the North Brazil-Guianas Shelf was reviewed. Among the issues discussed were options for the institutional mechanisms, including a technical and a decision-making body, required for implementation of the strategy and FMP. Representatives of Brazil, Guyana, Suriname, and Trinidad and Tobago presented an overview of the current status and outlook of their respective fisheries and national FMPs. While progress has been made toward management of the shrimp and groundfish fisheries, several challenges were encountered and some stocks continued to be overexploited. Results

were presented of the pilot application of the Governance Effectiveness Assessment Framework in fisheries, pollution, and habitats and biodiversity on the North Brazil Shelf. The need for improvement in data collection was highlighted. In addition, the key findings of a decent work assessment of the shrimp and groundfish fisheries in Guyana, Suriname, and Trinidad and Tobago as well as at the regional level were discussed and recommendations presented. A major concern is IUU fishing in the context of human and labour rights violations and undocumented migrant workers. An update of the FIRMS inventories indicated that 29 resource fact sheets and 35 fisheries fact sheets for the WECAFC region have been produced for the reporting period 2016–2020. A call was made for Member States to submit fishery inventory updates. The proposed revised structure of the list of main species for WECAFC as well as the preliminary boundary proposals regarding FAO Fishing area 31 were discussed by participants. An update on vessel mapping for the WECAFC-proposed regional classification of fleet segments was presented. This is based on classifying fishing vessels according to the predominant gear used, to match the diversity of artisanal vessels and gear types that exist in the WECAFC region. The proposed modified structure of the interim Data Collection Reference Framework (iDCRF) and data policy were discussed. Participants reviewed and validated the WECAFC decision support system, which will support decision making in ecosystem approach to fisheries (EAF)-ecosystem based management (EBM) in the region. The current status of a *International Conference on Nutrition* World Bank Publications

The book deals with the present state and problems of integrated pest management (IPM) as relating to stakeholder acceptance of IPM and how IPM can become a sustainable practice. The book covers the implementation of integrated pest management in USA, Canada, Denmark, Germany, Italy, Sweden, Netherlands, China, India, Indonesia, Australia, Africa, and its impact in reducing pesticide use in agriculture. The book also deals with the impact of transgenic crops on pesticide use.

Integrated Pest Management Springer Nature

This volume features research and case studies across a variety of industries to showcase technological innovations and policy initiatives designed to promote renewable energy and sustainable economic development. The first section focuses on policies for the adoption of renewable energy technologies, the second section covers the evaluation of energy efficiency programs and the final section provides evaluations of energy technology innovations. Environmental concerns, energy availability and political pressure have prompted governments to look for alternative energy resources that can minimize the undesirable effects for current energy systems. For example, shifting away from the conventional fuel resources and increasing the percentage of electricity generated from renewable resources, such as solar and wind power, is an opportunity to guarantee lower CO₂ emissions and to create better economic opportunities for citizens in the long run. Including discussions of such of timely topics and issues as global warming, bio-fuels and nuclear energy, the editors and contributors to this book provide a wealth of insights and recommendations

for sustainable energy innovations.

Department of the Interior and Related Agencies Appropriations for 1999 IICA Biblioteca Venezuela

The aim of the Handbook is to present readily accessible, but scholarly sources of information about educational research in the Asia-Pacific region. The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region. In so doing, the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues. Moreover, since new problems and issues are constantly arising, the articles in the Handbook also indicate the likely directions of future developments. The different articles within the Handbook seek to conceptualize the problems in each specific content area under review, provide an integration of the research conducted within that area, the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified. Thus, the articles do not involve the reporting of newly conducted research, but rather require a synthesis of the research undertaken in a particular area, with reference to the research methods employed and the theoretical frameworks on which the research is based. In general, the articles do not advocate a single point of view, but rather, present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research. Furthermore, it should be noted, that the Handbook is not concerned with

research methodology, and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region.

Policies and Programs for Sustainable Energy Innovations

Academic Press

Energy Efficiency: Towards the End of Demand Growth is a detailed guide to new energy efficiency technologies and policy frameworks affecting the profitability of efficiency projects. The contributions drawn together by F.P. Sioshansi feature insights from recognized thought leaders, detailed examinations of evolving technologies, and practical case studies yielding best practices for project planners, implementers and financiers. This volume challenges the "more is better" paradigm in energy production, examining efficiency technologies and measurement across the supply chain. Comparative financial analysis of efficiency vs. increased generation Case studies from four continents highlight the examples of successful technologies and projects Explains how existing and developing regulatory frameworks impact cost and implementation

Department of the Interior and Related Agencies Appropriations for 2002 CRC Press

The meeting recognised the need for the sustainable use of plant genetic resources for sustainable agricultural development of the region. Discussions focused on the appropriate mechanisms required to ensure capacity for the maintenance, production and equitable distribution of good quality seeds from a wide range of plant varieties. The

meeting agreed to establish the Seed Consultative Forum for Latin America and the Caribbean.
