A long time ago, I was one of them. Now I'm back, and they hate me for it. Plucked out of the harsh life I was living and thrust into a world of unimaginable wealth, power, and privilege, all I want to do is keep my head down and survive until graduation. But they have other plans--Mason, Finn, Elijah, and Cole. Everyone at my new school calls them the Princes, and that's exactly what they act like. They always get what they want... and who they want. And they want me. I'm not sure why, since they all seem to hate me. The Princes are gorgeous, flawless, and cruel. They own this town, and they're determined to own me too. To break me. What they don't know is that I've already been broken once. I won't let it happen again.

Three-dimensional (3D) immersive virtual worlds have been touted as being capable of facilitating highly interactive, engaging, multimodal learning experiences. Much of the evidence gathered to support these claims has been anecdotal but the potential that these environments hold to solve traditional problems in online and technology-mediated education—primarily learner isolation and student disengagement—has resulted in considerable investments in virtual world platforms like Second Life, OpenSimulator, and Open Wonderland by both professors and institutions. To justify this ongoing and sustained investment, institutions and proponents of simulated learning environments must assemble a robust body of evidence that illustrates the most effective use of this powerful learning tool. In this authoritative collection, a team of international experts outline the emerging trends and developments in the use of 3D virtual worlds for teaching and learning. They explore aspects of learner interaction with virtual worlds, such as user wayfinding in Second Life, communication modes and perceived presence, and accessibility issues for elderly or disabled learners. They also examine advanced technologies that hold potential for the enhancement of learner immersion and discuss best practices in the design and implementation of virtual world-based learning interventions and tasks. By evaluating and documenting different methods, approaches, and strategies, the contributors to Learning in Virtual Worlds offer important information and insight to both scholars and practitioners in the field.

One woman learns that the price of belonging is often steeper than expected in this heart-wrenching yet hopeful romantic novel and first in the Seoul duology by USA Today bestselling author Jen Frederick. As a Korean adoptee, Hara Wilson doesn't need anyone telling her she looks different from her white parents. She knows. Every time Hara looks in the mirror, she's reminded that she doesn't look like anyone else in her family—not her loving mother, Ellen; not her jerk of a father, Pat; and certainly not like Pat's new wife and new "real" son. At the age of twenty-five, she thought she had come to terms with it all, but when her father suddenly dies, an offhand comment at his funeral triggers an identity crisis that has her running off to Seoul in search of her roots. What Hara finds there has all the makings of a classic K-drama: a tall, mysterious stranger who greets her at the airport, spontaneous adventures across the city, and a mess of familial ties, along with a red string of destiny that winds its way around her, heart and soul. Hara goes to Korea looking for answers, but what she gets instead is love—a forbidden love that will either welcome Hara home...or destroy her chance of finding one.

Selected as one of the Top 5 Educational Books by Literacy News The signs and statistics are undeniable: boys are falling behind in school. Contrary to conventional wisdom, the biggest culprits are not video games, pop culture, or female-dominated schools biased toward girls. The real problem is that boys have been thrust into a bewildering new school environment that demands high-level reading and writing skills long before they are capable of handling them. Lacking the ability to compete, boys fall farther and farther behind. Eventually, the problem gets pushed into college, where close to 60% of the graduates are women. In a time when even cops, construction foremen, and machine operators need post-high school degrees, that's a problem. Why Boys Fail takes a hard look at how this ominous reality came to be, how it has worsened in recent years, and why attempts to resolve it often devolve into finger-pointing and polarizing politics. But the book also shares some good news. Amidst the alarming proof of failure among boys-around the world-there are also inspiring case studies of schools where something is going right. Each has come up with realistic ways to make sure that every student-male and female-has the tools to succeed in school and later in life. Educators and parents alike will take heart in these promising developments, and heed the book's call to action-not only to demand solutions but also to help create them for their own students and children.

In the second edition of *Labor-Based Grading Contracts*, Asao B. Inoue refines his exploration of labor-based grading contracts in the writing classroom. Drawing on antiracist teaching practices, he argues that labor-based grading contracts offer a compassionate approach that is strongly grounded in social justice work. Updated with a new foreword and revised chapters, the book offers a meditation on how Inoue's use of Freirean problem-posing led him to experiment with grading contracts. The result is a robust Marxian theory of labor that considers Hannah Arendt's theory of labor-work-action and Barbara Adam's concept of "timescapes." The heart of the book details the theoretical and practical ways labor-based grading contracts can be used and assessed for effectiveness in classrooms and programs. Inoue concludes his exploration of labor-based grading by moving outside the classroom, considering how assessing writing in the socially just ways he offers in the book may provide a way to address the violence and discord seen in the world today.
