Neuroimaging has become an integral part of clinical neurology practice in tandem with good history taking and physical examination. This is the first all-in-one guide, presenting illustrative examples of signature neuroimaging findings in clinical context specifically for neurologists. With more than 1,500 images, the authors have assembled an accessible resource and review that presents over 170 core topics using the imaging findings as a platform to discuss pathophysiology, clinical presentation, and disease management. Written with the practitioner or student of neurology in mind, *Neurology Image-based Clinical Review* profiles each condition in an easy-to-read format, alongside a wealth of images designed to help develop proficiency in recognizing and treating both common and rare neurologic conditions. This unique book is organized into fifteen chapters covering all major areas of neurology including stroke, hemorrhage, neoplasms, epilepsy, trauma, neurodegenerative conditions, infectious diseases, pediatric syndromes, and much more. Each topic is introduced with a brief case scenario and image-based diagnosis, followed by bulleted introduction, clinical presentation, radiographic appearance and diagnostic hallmarks, differential diagnosis, and treatment. Numerous examples throughout foster familiarity with key imaging

findings and confidence interpreting MRI, CT, MRA, angiography, EEG, gross, and microscopic neuropathology images. Selected references for further study follow each topic. *Neurology Image-Based Clinical Review* is an essential reference for medical students, practicing neurologists, residents looking to hone their knowledge, or anyone sharpening clinical and interpretive skills for board or MOC review. Key Features: Comes with free access to the fully-searchable downloadable e-book, including an image gallery Covers the full spectrum of neurologic disease with over 170 topics and more than 1500 images Includes chapters on commonly encountered problems and rare syndromes that may be missed in the clinic Presents the latest information on clinical presentation, diagnosis, treatment, and differential diagnoses of various neurological disorders Consistent format for easy readability and targeted review

**Mksap 17 Cardiovascular Medicine** Springer Science & Business Media

Includes information on: basic training requirements; the written examination; an approach to the clinical examination; the long case, the short case and examples. Talley, University of Sydney; O'Connor, Canberra Hospital, Australia.

### Board Basics 5 LWW

The aim of this radiological atlas is to connect pathophysiology to imaging using many illustrations and examples, emphasizing the capabilities and limitations of multidetector computed tomography and its role in the correct management approach to these disorders. Furthermore, the place of allied imaging modalities (plain film and ultrasound) in the clinical algorithm is comprehensively illustrated.

*Approach to Internal Medicine* Amer College of Physicians

Like its best-selling predecessor, this invaluable guide demonstrates to students how to care for patients, prepare for clinical rounds, and study for the end of rotation examination. Organized around the major training areas included in the nationally recognized Core Medicine Clerkship Curriculum Guide, IM Essentials contains 10% more content than the second edition, over 250 additional differential diagnosis tables and treatment algorithms, and over 70 color plates. Its usefulness is enhanced by links to over 460 pages of online materials, including new clinical photographs, tables, screening tools, and other instruments. To further enrich your learning, each chapter of IM Essentials is fully integrated with its companion volume, MKSAP for Students 5, which features more than 450 self-assessment questions. IM Essentials contains content that can answer all the questions in MKSAP for Students 5. Features: \* Covers the common problems and disorders a student is likely to encounter \* 10% more content \* Over 250 additional differential diagnosis tables and treatment algorithms \* Over 70 color plates \* Enhanced with over 460 pages of online materials \* A unique resource that provides medical students with the skills they need to enhance learning during the third-year internal medicine clerkship

*First Aid for the Internal Medicine Boards* Oxford University Press

"Targeted review from USMLE expert Conrad Fischer, MD, Master the Boards USMLE Step 2 CK delivers what you need to excel on the exam and match into the residency program you want. The Fischer Method includes disease topics presented in exam-style format: What is the most likely diagnosis? What is the best initial test? What is the most accurate diagnostic test? What is the treatment? Includes: a logical approach that makes patient care easy to remember; hundreds of color diagnostic images, algorithms, and tables; and a new biostatistics chapter and dozens of new infectious disease topics."--

*Neurology Image-Based Clinical Review* Springer Nature

Medical Knowledge Self-Assessment Program. MKSAP 16 Print includes 11 comprehensive books. This version of MKSAP 16 is ideal for those who like to work through conventional books but need them to be lightweight enough for portability. MKSAP 16 is specifically intended for physicians who provide personal, nonsurgical care to adults. MKSAP 16 is published as 11 highly trusted books in two parts, A and B

*Small-Bowel Obstruction* Springer Publishing Company

Now in its sixth edition, this highly-regarded book is designed as an introductory text on the principles of diagnosis, staging and treatment of tumours. The new edition: Includes up-to-date information on the most recent techniques and therapies available Emphasises the importance of multidisciplinary teamwork in the care of cancer patients Highlights frequent dilemmas and difficulties encountered during cancer management Features the important contributions of a new author Professor Daniel Hochhauser Contains a brand-new two-colour design As with previous editions, the first part of the book is devoted to the mechanisms of tumour development and cancer treatment. This is followed by a systematic account of the current management of individual major cancers. For each tumour there are details of the pathology, mode of spread, clinical presentation, staging and treatment with radiotherapy and chemotherapy. This accessible and practical resource will be invaluable to trainees in oncology, palliative care and general medicine, as well as specialist nurses, general practitioners, medical students, and professions allied to medicine. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from Google Play or the MedHand Store.

**The Cleveland Clinic Intensive Review of Internal Medicine** CRC Press

Like its best-selling predecessor, the fifth edition of this popular series contains over 450 multiple-choice questions, updated references, color photographs and ECG tracings. MKSAP for Students is intended for third-year students participating in their required internal medicine clerkship and for fourth-year students on an advanced medicine clerkship. All questions are formatted as clinical vignettes that resemble the types of questions students encounter on the examination at the end of the clerkship and on the USMLE licensing examination. Each question has a detailed answer critique that identifies the correct answer, an explanation of why that answer is correct and the

other options are incorrect, an educational objective and a short bibliography. Succinct Key Points summarize the important take home messages for each question. MKSAP for Students 5 is supported by its companion textbook, Internal Medicine Essentials for Students. All questions in MKSAP for Students are associated with relevant content in the Essentials textbook that can directly answer the question. Features: \* Covers the common problems and disorders a student is likely to encounter \* Over 450 NEW multiple-choice questions \* Updated references, color photographs, and ECG Tracings \* Questions formatted as clinical vignettes to resemble the types of questions on the examination \* Key points to summarize important information for each question

**Medicine: Preserving the Passion** McGraw Hill Professional

Feedback from users suggest this resource book is more comprehensive and more practical than many others in the market. One of its strengths is that it was written by trainees in internal medicine who understand the need for rapid access to accurate and concise clinical information, with a practical approach to clinical problem solving.

**MKSAP 18 Complete** CRC Press

This updated text offers preparation for board certification and recertification exams in internal medicine. It features new chapters on medical genetics and neurology, and major revisions and additions to chapters on liver disorders, fluid and electrolyte abnormalities, breast cancer, coronary artery disease and medical diseases in pregnancy. The pulmonary medicine board simulation chapter has also been extensively revised. The authors of each chapter have increasingly used bulleted points, clinical case vignettes and review exercises to convey important clinical pearls. A mock board examination consisting of 150 questions, with explanations of the answers, has been added.

*Review Questions and Answers for Dental Assisting* Elsevier Australia

In *Medicine: Preserving the Passion*, Phil R. Manning, a pioneer and recognized authority in continuing medical education, and Lois DeBakey, a passionate advocate of critical reasoning and leading scholar in scientific communication, endeavor to shift the focus in lifelong learning from group exercises in a lecture hall to self-directed, practice-related activities. Although most experts have applauded this new concept, few publications have addressed methods for implementation. The Manning-DeBakey book describes such methods as devised by outstanding clinicians and academicicians to obtain educational benefit from their clinical experience. Some techniques inspired by quality assurance, for example, these master clinicians have used successfully to improve their knowledge, skills, and patient care. This book not only identifies the primary concerns in continuing medical education, but also offers sound recommendations and effective solutions and suggests future directions and approaches. The authors have analyzed the continuing educational practices of physicians in a wide range of environments, from small communities to the most acclaimed medical centers, and have extracted additional advice from the writings of past authorities like Osler. The resulting concepts will undoubtedly attract wide public attention. Office practice audit, self-directed learning, case indexing, patient education, computer-assisted education, and collegial networks, as well as regular reading, writing, and teaching, are among the successful methods described by physicians and surgeons who exemplify the highest standards of medical practice.

*Master the Boards USMLE Step 2 CK* Springer Science & Business Media

The goal of the book is provide trainees, junior and senior clinicians, and other professionals with a comprehensive resource that they can use to improve care processes and performance in the hospitals that serve their communities. Includes case studies.

**Examination Medicine** Springer Science & Business Media

100 Cases in Clinical Medicine is an indispensable revision tool for medical students preparing for clinical examinations or OSCEs. Using scenarios which mimic daily life, the cases will interest students in clinical problems and help them develop their clinical reasoning skills, with each case presenting details of a patient's medical history and the key findings of a clinical examination, together with initial investigation results for evaluation. Key questions then prompt the student to evaluate the patient, and reach a decision regarding their condition and the possible management plan, while the answer pages will help the student to understand the processes that a clinician goes through in dealing with the problems presented. Contents are organised to provide a quick review of each body system, with a selection of cases relevant to that specific system, then the majority are presented randomly to mimic real life in a GP surgery or emergency department. New to this edition: a review of each body system as well as random cases; new page design with a

second colour used throughout; and brought up-to-date with 25% new cases.

**CURRENT Medical Diagnosis and Treatment 2021** Jaypee Brothers, Medical Publishers Pvt. Limited  
The closest you can get to seeing the USMLE Step 2 CK without actually taking it *Medicine: PreTest Self-Assessment & Review* is the perfect way for you to assess your knowledge of medicine/internal medicine for the USMLE Step 2 CK and shelf exams. It delivers 500 USMLE-style questions and answers that address the clerkship's core competencies along with detailed explanations of both correct and incorrect answers. **Mayo Clinic Internal Medicine Board Review Questions and Answers** McGraw Hill Professional

Written by the top medical student rotators, this book provides medical students with the often elusive information and skills required to ace their clinical rotations Chapters cover all major medical sub-specialties such as internal medicine, general surgery, cardiology, dermatology, orthopedics, neurosurgery, and ophthalmology. Additionally, the book offers many novel features including a review of core rotation skills for oral presentations and a walk-through of a day in the life of the medical student on a particular rotation. It focuses on the common cases that students actually encounter in the hospital. This format thereby administers a complete, concise overview of what is needed for each rotation A unique resource, *The Ultimate Medical School Rotation Guide* is not only instructional and comprehensive, but also assuring and supportive as it encourages students to appreciate this rewarding time in their medical careers

**MKSAP 18 Pulmonary and CC Medicine** McGraw Hill Professional

This is a completely revised and expanded edition of *Hair Transplant 360 for Physicians, Volume 1*, edited by Samuel M Lam, Director of the Lam Institute for Hair Restoration Plano, Texas, featuring extensive discussion of bioenhancement technology. The book is divided into two parts: part one focuses on preoperative, operative and postoperative care. Chapter one features brand new and updated information on several therapies, and discussion on medical hair loss conditions. Chapter two includes completely revised guidance on operative technique, with a range of step-by-step techniques including hairline design, donor harvesting and recipient-site creation. The post-operative chapter includes discussion on creating standardised hair-transplant photography, leadership, office management and marketing. The second part of the book contains new case studies in hair transplantation, and a final chapter on physician training, which is demonstrated on a DVD-ROM. The DVD has been expanded and updated to cover hairline design using human models, donor harvesting, and recipient-site practice, making *Hair Transplant 360 for Physicians, Volume 1* an ideal resource for hair transplant physicians in training. Key Points Revised and expanded second edition Previous edition published 2011 (9789350251782) 263 full colour images and illustrations DVD-ROM including step-by-step demonstrations for trainee physicians Edited by Samuel M Lam, Director, Lam Institute for Hair Restoration Plano, Texas, USA

**Medicine PreTest Self-Assessment and Review, Fourteenth Edition** McGraw Hill Professional

Prepared by residents and attending physicians at Massachusetts General Hospital, this pocket-sized looseleaf is one of the best-selling references for medical students, interns, and residents on the wards and candidates reviewing for internal medicine board exams. In bulleted lists, tables, and algorithms, *Pocket Medicine* provides key clinical information about common problems in internal medicine, cardiology, pulmonary medicine, gastroenterology, nephrology, hematology-oncology, infectious diseases, endocrinology, and rheumatology. This Fifth Edition is fully updated and includes a sixteen-page color insert with key and classic abnormal images. If you purchased a copy of *Sabatine: Pocket Medicine 5e*, ISBN 978-1-4511-8237-8, please make note of the following important correction on page 1-36: Oral anticoagulation (Chest 2012;141:e531S; EHJ 2012;33:2719; Circ 2013;127:1916) · All valvular AF as stroke risk very high · Nonvalv. AF: stroke risk ~4.5%/y; anticoag @ 68% ~ stroke; use a risk score to guide Rx: CHADS2: CHF (1 point), HTN (1), Age =75 y (1), DM (1), prior Stroke/TIA (2) CHA2DS2-VASc: adds 65-74 y (1) =75 y (2), vasc dis. [MI, Ao plaque, or PAD (1)]; ? (1) score <sup>3</sup>2 @ anticoag; score 1 @ consider anticoag or ASA (? latter reasonable if risk factor age 65-74 y, vasc dis. or ?); antithrombotic Rx even if rhythm control [SCORE CORRECTED] · Rx options: factor Xa or direct thrombin inhib (non-valv only; no monitoring required) or warfarin (INR 2-3; w/ UFH bridge if high risk of stroke); if Pt refuses anticoag, consider ASA + clopi or, even less effective, ASA alone (NEJM 2009;360:2066) Please make note of this
