## CAREY FARMER

*Ecdl 5.0 (European Computer Driving Licence). Module 2, It User Fundamentals Using Windows 7* CIA Training Ltd.

..... Preface This book is intended to help you successfully complete the test for Module 6 of the European Computer Driving Licence (ECDL). However before we start working through the actual content of the guide you may find it useful to know a little bit more about the ECDL in general and where this particular Module fits into the overall framework. What Is The ECDL? The European Computer Driving Licence (ECDL) is a European-wide qualification that enables people to demonstrate their competence in computer skills. It certifies the candidate's knowledge and competence in personal computer usage at a basic level and is based upon a single agreed syllabus. This syllabus covers a range of specific knowledge areas and skill sets, which are broken down into seven modules. Each of the modules must be passed before the ECDL certificate can be awarded, though they may be taken in any order but must be completed within a three year period. Testing of candidates is at audited testing centres, and successful completion of the test will demonstrate the holder's basic knowledge and competence in using a personal computer and common computer applications. The implementation of the ECDL in the UK is being managed by the British Computer Society. It is growing at a tremendous rate and is set to become the most widely recognised qualification in the field of work-related computer use.

**European Computer Driving Licence** Liberty Hall Limited

The European Computer Driving Licence (ECDL) is a European-wide qualification that enables you to demonstrate your competence in computer skills. It covers a range of specific knowledge areas and skill sets, broken down into seven modules. Module 7: Information and Communication is divided into two main sections. The first covers basic Web search tasks using a Web browser and search engine tools. The second addresses the use of electronic mail software to send and receive messages, to attach documents, and to organise and manage message folders and directories. This study guide covers all the knowledge areas and skills required to understand and pass Module 7 of the ECDL syllabus. Throughout we have used clear, jargon free, self-paced exercises to provide you with an understanding of all the key elements to prepare you for the ECDL Test.

*Training for ECDL [European Computer Driving Licence]* Springer

Preface This book is intended to help you successfully complete the test for Module 5 of the European Computer Driving Licence (ECDL). However before we start working through the actual content of the guide you may find it useful to know a little bit more about the ECDL in general and where this particular Module fits into the overall framework. What Is The ECDL? The European Computer Driving Licence (ECDL) is a European-wide qualification that enables people to demonstrate their competence in computer skills. It certifies the candidate's knowledge and competence in personal computer usage at a basic level and is based upon a single agreed syllabus. This syllabus covers a range of specific knowledge areas and skill sets, which are broken down into seven modules. It is growing at a tremendous rate and is set to become the most widely recognised qualification in the field of work-related computer use.

*ECDL 5.0®* Springer

Covering the aspects required by the ECDL Advanced AM5 syllabus, this title includes exercises

ranging from creating a database to creating complex grouped reports and performing action queries. It also includes the data files which allow you to practise the different software features. *ECDL 5.0* CIA Training Ltd.

Learn the basic operations associated with searching and navigating web sites to access information, how to create and send e-mail messages and how to manage personal distribution lists and message folders. The manual comes with its own data files which you can use for practising the relevant exercises. Approved by the ECDL Foundation.

*Ecdl/Icdl Syllabus 4 Module 7 Information and Communication Using Internet Explorer 5 and Outlook Express* CIA Training

Covers various aspects required by ECDL Advanced AM5 syllabus. This book includes exercises that range from creating a database to creating complex grouped reports and performing action queries.

**ECDL, European computer driving licence: Foglio elettronico** Springer

Covers various aspects required by the ECDL Advanced AM6 syllabus. This book includes such topics as inserting and editing various types of image, as well as adding sounds and movies. It is suitable for those who are familiar with PowerPoint but wish to further their knowledge.

*Information and Communication* Springer Verlag

Intended for those wishing to increase their spreadsheet knowledge, this title covers the ECDL/ICDL Advanced AM4 syllabus, which includes functions, scenarios and pivot tables. It also includes the data files which allow you to practise the different software features.

**ECDL Advanced Presentation Software Using Powerpoint 2016 (BCS ITQ Level 3)** Springer

Part of the Module 3 ECDL Syllabus 5, this manual helps you to create, format and finish word processed documents. It also helps you learn how to use some of the more advanced features of word processing such as creating standard tables and importing pictures and images. It allows you to practice the different word processing features.

*ECDL Advanced 2.0* CIA Training

This revised text for the European Computer Driving Licence has been updated to be more accessible for students. It takes students step by step through the seven modules of the award, setting plenty of tasks and exercises on the way. This text uses Office 97 examples.

**ECDL 5.0®** Springer Verlag

A manual that covers the aspects of the ECDL Advanced AM3 syllabus. It includes the data files which allow you to practise the different software features.

*European Computer Driving Licence* CIA Training

This comprehensive manual covers all aspects required by Module 1 ECDL/ICDL Syllabus 4.0.

Designed to gradually build up your knowledge taking a step by step, exercise based approach. The ideal training solution, whether you are a beginner, or if you just need to fill gaps in your existing knowledge. Module 1 gives an insight into hardware and software as well as giving examples of how computers are used every day. Approved by the ECDL Foundation.
