Sir James George Frazer's *The Golden*

*Bough: A Study in Magic and Religion* is

a broad comparative study of mythology

and religion. Treating religion as a

cultural phenomenon rather than

discussing it from a theological

perspective, the effect of *The Golden*

*Bough* on both European literature and

the emerging discipline of anthropology

was substantial. The pioneering

anthropologist Bronislaw Malinowski said of it: "No sooner had I read this great work than I became immersed in it and enslaved by it. I realized then that anthropology, as presented by Sir James Frazer, is a great science, worthy of as much devotion as any of her elder and more exact studies and I became bound to the service of Frazerian anthropology."

First published in 1890, *The Golden Bough* is a seminal work of modern anthropology. A classic study of the beliefs and institutions of mankind that traces the development and confluence of thought from magic and ritual to modern scientific theory, it has been a source of great influence upon such diverse writers as T.S. Eliot, Wyndham Lewis, and D.H. Lawrence. This edition restores many of the controversial passages expurgated in the 1922 edition that elucidate Frazer's bolder theories, and sets them within the framework of a valuable introduction and notes.

*The Golden Bough* Indiana University Press

Sir James George Frazer (1854-1941) caught the popular imagination with his vast and enterprising comparative study of the beliefs and institutions of mankind, which in its third edition numbered 12 volumes. Reissued here is Frazer's own single-volume abridgement of 1922.

*The Golden Bough* is a wide-ranging, comparative study of mythology and religion, written by the Scottish

anthropologist Sir James George Frazer. The book documents and details the similarities among magical and religious beliefs around the globe. Frazer attempted to define the shared elements of religious belief and scientific thought, discussing fertility rites, human sacrifice, the dying god, the scapegoat, and many other symbols and practices whose influences had extended into 20th-century culture. His thesis is that old religions were fertility cults that revolved around the worship and periodic sacrifice of a sacred king. Frazer proposed that mankind progresses from magic through religious belief to scientific thought. The influence of *The Golden Bough* on contemporary European literature and thought is substantial.
