Waking Up With the Duke

Harvard University Press
Using eighteenth-century France as a case study, David Bell offers an important new argument about the origins of nationalism. Before the eighteenth century, the very idea of nation-building—a central component of nationalism—did not exist. During this period, leading French intellectual and political figures came to see perfect national unity as a critical priority, and so sought ways to endow all French people with the same language, laws, customs, and values. The period thus gave rise to the first large-scale nationalist program in history.

This fascinating book is based on a remarkable discovery: Sherlock Holmes's methods of deduction were actually those of his creator and used in order to solve real crimes; for Scotland Yard Holmes really did exist in the form of Conan Doyle. Author Peter Costello draws on new research to follow the tracks Conan Doyle left as he entered the real world of Sherlock Holmes; his fictional outpourings were the direct result of their author's hidden career as an amateur detective and criminologist

 A genealogy of
 fanaticism—unearthing
 its long history, before
 it became a tool in the
 Clash of Civilizations It
 is commonplace to
 hear fanaticism
 described as a deviant
 or extreme variant of
 an already irrational
 set of religious beliefs,
 an assertion that helps
 to demonize
 convictions outside
 political orthodoxy.

Alberto Toscano's compelling and erudite counter-history explodes this accepted convention by exploring the critical role fanaticism played in the formation of modern politics and the liberal state. Showing how fanaticism results from a failure to formulate an adequate emancipatory politics, this illuminating history sheds new light on an idea that continues to dominate debates about faith and secularism. This expanded edition includes new material that revisits the idea of fanaticism as it operates at the limits of the liberal political imaginary, highlighting its relation to fraternal violence, political purity and the refusal of compromise, as well

as its centrality to times of social crisis and international conflict.

Smoothly blending performance theory, literary analysis, and historical insights, Cecilia Feilla explores the mutually dependent discourses of feeling and politics and their impact on the

theatre and theatre audiences during the French Revolution. Remarkably, the most frequently performed and popular plays from 1789 to 1799 were not the political action pieces that have been the subject of much literary and historical criticism, but rather sentimental dramas and comedies, many of which originated on the stages of the Old Regime. Feilla suggests that theatre provided an important bridge from affective communities of sentimentality to active political communities of the nation, arguing that the performance of virtue on stage served to foster the passage from private emotion to public virtue and allowed groups such as women, children, and

the poor who were excluded from direct political participation to imagine a new and inclusive social and political structure. Providing close readings of texts by, among others, Denis Diderot, Collot d'Herbois, and Voltaire, Feilla maps the ways in which continuities and innovations in the theatre from 1760 to 1800 set the stage for the nineteenth century. Her book revitalizes and enriches our understanding of the significance of sentimental drama, showing that it was central to the way that drama both shaped and was shaped by political culture. *Catalogue of books added to the Library of Congress* J'ai Lu These five biographies provide the first

complete survey of Italian opera from the early buffo operas of Rossini to Verdi's great masterpieces, *Otello* and *Falstaff*, and the verismo operas of Puccini. Andrew Porter has been highly praised for his original and enlightening account of Verdi, and Philip Gossett has received similar acclaim for his treatment of Rossini. Porter, Gossett, William Ashbrooke, Julian Budden, Mosco Carner, and Friedrich Lippmann, all acknowledged experts in the field of Italian opera, combine to offer insight into the traditions and workings of one of the most fascinating periods in the history of opera. Engaging Film is a creative, interdisciplinary volume that explores the engagements among film, space, and identity and features a section on the use of films in the classroom as a critical pedagogical tool. Focusing on anti-essentialist themes in films and film production, this book examines how social and spatial identities are produced (or dissolved) in films and how mobility is used to create different experiences of time and space. From popular movies such as "Pulp Fiction," "Bulworth," "Terminator 2," and "The Crying Game" to home movies and avant-garde films, the analyses and teaching

methods in this collection will engage students and researchers in film and media studies, cultural geography, social theory, and cultural studies.

"London Eyes provides paths through the city, chancing upon those stories that ultimately have the potential to change London, to see it with new eyes, casting new shadows and seeing new stories open up at many turns. This collection has at its heart a joyous fascination with the city and the texts, images and films that have contributed to our ideas about London. It was a wonderful opportunity to stumble upon some new panoramas." Film

Philosophy London incessantly generates and incites cultural responses, pre-eminently in the interconnected domains of literature and film. This book demonstrates that those responses have been sustained as vital experiments and engagements in configuring the city and its inhabitants. Including essays by prominent cultural, literary and film historians this volume forms an original and incisive contribution to ongoing debates about the city's intricate cultural history and its construction through both language and image, as a crucial site of identity, desire, exile and displacement. How do we experience a city in terms of the senses? What are the inter-relations between human experience and behaviour in urban space? This volume examines these questions in the context of European urban culture between the fifteenth and twentieth centuries, exploring the institutions and

ideologies relating to the range of sensual experience and its interpretation. Spanning pre-industrial and modern cities in Britain, France, Germany and the United States, it enables the reader to establish major contrasts and continuities in what is still an evolving urban experience. Divided into sections corresponding to the five senses: noise, vision, taste, touch and smell, each sections allows for comparisons which act as reminders that the experience of the city was a multi-sensual one, and that these experiences were as much intellectual as physical in their nature.
