Gaïa Éditions  
La 2ème de couv. indique : "[...]La forêt doit être exploitée. Elle l'a été, tout au long de l'histoire humaine, au point parfois d'être mise en danger. Elle l'est aujourd'hui, avec des moyens mécaniques considérables. Dans certains pays, la France notamment, des efforts sont accomplis pour rationaliser cette exploitation et pour conserver ce capital énorme que constitue la forêt. Mais, pour l'ensemble du monde, la régression est catastrophique. [...] L'ensemble de ces activités et de la production qui en découle constitue ce que les économistes appellent la "filrière bois". Celle-ci fournit des ressources considérables, et pourtant, en France, elle est en déficit. Remédier à cette insuffisance est un enjeu important."

*The Best French Short Stories of ... and the Yearbook of the French Short Story* Cambridge Scholars Publishing

Exploring the depths of human nature in the light of biblical teaching, the author carves a straight path through the tangled undergrowth of Greek Gnosticism that has infiltrated the Church today. Startling in its simplicity, this book takes the reader to the core of the problem, clearly outlining the issues at stake and dealing with them uncompromisingly. Are children to blame for their parents' sin? Why does man sin? Does a Christian have a dual nature? Are we born bad? Does our nature compel us to

commit certain actions, whether bad or good? What is the relationship between a twentieth-century Christian and Adam? Does God see Jesus when He looks at the Church? What is the truth regarding unconditional eternal security? Can a Christian be lost? Answering these questions and many others purely from the Bible, the author brings light and hope on this most misunderstood of all subjects - the nature of man.

L'homme et le bois Walter de Gruyter GmbH & Co KG

Golan argues that reactionary issues such as anti-urbanism, the return to the soil, regionalism, corporatism, xenophobia, and doubts about the new technology became central to cultural and art-historical discourse. Focusing on the overlap of avant-garde and middle-of-the-road production, she investigates the import of these issues not only in, painting, sculpture, and architecture (concentrating on the work of Leger, Picasso, Le Corbusier, Ozenfant, Derain, the Surrealists, and the so-called naifs), but also in the decorative arts, in the spectacle of world and colonial fairs, and in literature. Throughout she finds evidence that artists turned from the aesthetics of the machine age toward a more organic, naturalistic art. This leads her to ask whether the famous and momentous shift of the avant-garde from Paris to New York in 1939 did not, in fact, begin two decades earlier, in 1918.

Situé à la convergence de l'archéologie, de l'histoire et de la technologie, cet ouvrage est le premier à parcourir, dans sa totalité, le long chemin des ouvriers du bois. Michel Noël -qui fut menuisier-et Aimé Bocquet ont cherché ce qui unissait les compagnons du XIXe siècle, les ébénistes de Louis XIV, les luthiers prodiges de Crémone, les charpentiers des cathédrales et, plus loin encore, les charrons gaulois. Ils en sont ainsi arrivés aux artisans d'avant l'histoire. A travers l'étude des vestiges de bois conservés pratiquement intacts, depuis plus de 5000 ans dans la tourbe ou sous l'eau des lacs et des rivières - outils, instruments, éléments de construction ou de mobilier -, ils ont découvert d'extraordinaires témoignages d'une activité humaine

déjà spécialisée, et le germe d'un savoir-faire multiséculaire qui se transmettra jusqu'à nos jours. Saisir l'évolution des outils et des gestes, parvenir aux origines des métiers du bois, analyser les prouesses des menuisiers, des ébénistes, des charpentiers depuis des millénaires, explorer une technique de l'intérieur en regardant les hommes qui l'ont peu à peu créée : tels sont les principaux objectifs que se propose *Les Hommes et le Bois*. Michel Noël, chercheur au CNRS, travaille au Centre régional de la productivité et des études économiques de Montpellier. Aimé Bocquet est directeur du Centre national de recherches archéologiques subaquatiques d'Annecy.

'To the English, I am "shocking"...What's more, French, which is disgusting; republican, which is abominable; exiled, which is repulsive; defeated, which is infamous. To top it all off, a poet...' Victor Hugo dominated literary life in France for over half a century, pouring forth novels, poems, plays, and other writings with unflagging zest and vitality. Here, for the first time in English, all aspects of his work are represented within a single volume. Famous scenes from the novels *Notre-Dame*, *Les Misérables*, and *The Toilers of the Sea* are included, as well as excerpts from his

intimate diaries, poems of love and loss, and scathing denunciations of the political establishment. All the chosen passages are self-contained and can be enjoyed without any previous knowledge of Hugo's work. Much of the material is appearing in English for the first time, and most of it has never before been annotated thoroughly in any language.

*Baudelaire and Nature* OUP Oxford

Today's environmental problems—climate change, loss of biodiversity, polluted air, land, and water—all have their origins to a greater or lesser extent in how we have lived, played and worked. At a time when societies are confronted with the often dramatic consequences of past choices made in the fields of energy, technology, industry, agriculture, urbanisation and consumption, we need a history that casts more light on the ways in which unsustainable human-nature relationships came into being. This means forging stronger connections between social

and environmental history. *Common Ground* opens up a dialogue between two sub-disciplines that to date have remained largely parallel endeavours, bringing together both established and younger scholars from both fields to explore how people's everyday lives have connected to their environments—and with what effects. The book is organised in six sections: leisure and environment; nature and conservation; environmental conflicts; folk and scientific knowledge; environmental disasters; and energy, industry and urban infrastructure. By exploring the complex interplay between people's day-to-day activities and ecological change, especially the values, beliefs and environmental experiences of ordinary men and women, we can better understand our past relationships with nature and perhaps make more informed planning and policy choices in the future.
