 Yearbook of International Organizations is the most comprehensive reference resource and provides current details of international non-governmental (NGO) and intergovernmental organizations (IGO). Collected, documented and disseminated by the Union of International Associations (UIA), detailed and profound information on international organizations worldwide can be found here, from the United Nations, the ASEAN and the Red Cross to sporting bodies and religious orders. Besides historical and organizational information (e.g. on aims, subject orientation and locations), details on activities, events or publications as well as the most current contact details are included. Integrated are also biographies of the leading individuals of the organizations as well as the presentation of networks of organizations. The Union of International Associations (UIA) is a non-profit, apolitical, independent and non-governmental institution in the service for international associations, based in Brussels, Belgium. For 100 years, the UIA has focused on the nature and evolution of the international civil society - a topic of increasing relevance. New: UIA Bi-monthly Study Find out about current topics and the wealth of information contained in the Yearbook of International Organizations. No. 1 of UIA's new Bi-monthly Study is now available for download. This time's subject: Olympic Games and Sports.

 Urban Tourism and Urban Change: Cities in a Global Economy provides both a sociological / cultural analysis of change that has taken place in many of the world's cities. This focused treatment of urban tourism examines the implications of these changes for urban management and planning sense, for success and failure in

metropolitan change. Uniquely suited for teaching purposes, Costas Spiroou integrates numerous case studies of cities to illuminate the significant impact and promise of tourism on urban image and economic development.

 Tendances et politiques du tourisme de l'OCDE 2012 est une référence internationale. Elle compare l'efficacité des pays dans leur soutien à la compétitivité, à l'innovation et à la croissance du tourisme, et met en lumière les politiques et pratiques liées à ce domaine.
Contemporary Tourism Reviews Volume 1 Europa Publications (PA)
 Examines the political discourse behind tourism, presenting some questions regarding the tensions associated with the interconnections. This title focuses on deterritorialisation and the development of fresh regionalisms, paying specific attention to collaborative efforts in tourism development.
Interconnected Worlds: Tourism in Southeast Asia Routledge
 Destinations are a central feature of tourism and the focus of much tourism research. Destinations have been studied from diverse perspectives using multiple concepts and a range of approaches. As a result, destination research today has become increasingly fragmented as studies have become more specialized. There is a need for a more integrated approach, one which systematically draws together these different research threads to provide a comprehensive and coherent picture and a fuller understanding of destinations, their structure and how they function. This book provides such a synthesis by critically reviewing a wide range of international research and incorporating in one volume many different facets of destinations from studies which have appeared in related but often divergent literatures. Conceptual and methodological issues are illustrated with empirical examples from Europe, North and South America, Asia and Oceania.

 In March 2000 a fire broke out at the Royal Philips Electronics plant, damaging its supply of semiconductor chips. Nokia Corporation and Ericsson LM relied on these chips to produce their cell phones; together they received 40 percent of the plant's chip production. Both companies were about to release new cell phone designs that required the chips. At Nokia, word of the setback spread quickly up the chain of command. Nokia's team, which had a crisis plan in place, sprang into action. With an aggressive, multipronged strategy, Nokia avoided any cell phone production loss. In contrast, the low-level technician who received the information at Ericsson did not notify his supervisors about the fire until early April and had to scramble to locate new sources for the chips. This search delayed production and proved

a fatal blow to Ericsson's independent production of mobile phones. Nokia's handling of its supply chain disruption provides a dramatic example of how a company's strategic risk management can alleviate financial disaster and lay the groundwork for success in the future. Perturbations in supply chain management are inevitable, and grow harder and harder to assess as the marketplace becomes more globalized. Students will learn the following concepts: ...

 Montreal and Quebec City are like outposts of European culture in the heart of Canada just hours from the US, distinctively Canadian but with a palpable French spirit. The Rough Guide to Montreal takes you through everything in great detail, providing informative and entertaining accounts of what the city has to offer in terms of attractions, restaurants, accommodation and its vibrant nightlife. There is extensive coverage of Quebec City, as well as the snow-capped peaks of the Laurentian Mountains and Eastern Townships, all accessible day-trips from Montreal. In each chapter there are detailed maps and plans covering every neighbourhood. The contexts section includes a useful French language section and glossary.

 This textbook provides a comprehensive learning resource material for tourism transportation. Exploring the interrelationship between transport and tourism, it demonstrates how different types of transportation systems interact and are combined within

the tourism destination framework. It addresses topics such as the geographical aspects of tourism transportation, technological advances in transportation, public transportation in tourism, drive tourism, recreational transportation, and various forms of tourism, including car, rail, coach, water, cycling, and space tourism. Readers will also learn about sustainability aspects, consumer behavior, and tourist behavior modelling. The book offers a valuable asset for graduate as well as master degree students in regional and spatial science, transportation engineering, and tourism and transportation economics, as well as for professionals in the travel, tourism, transport, and hospitality industries who are interested in the link between tourism and transportation, its benefits and impacts. Tourist destinations can strategically use this learning resource to gain a better understanding of the leisure and recreational aspects of the transportation system and consequently boost their appeal to tourists.

Nokia's Supply Chain Management Routledge

Bringing together a wide range of studies from twelve European countries, this book offers a state-of-the-art overview of the driving forces behind spatial diversity and social complexity inherent in second home expansion in all parts of the continent - from Scandinavia to the Mediterranean and from the British Isles to Russia - in the context of contemporary mobility patterns largely induced by tourism. As befits the overall conception of the book as a compendium of current second home research, planning and policy issues, the book endorses the following: multidisciplinary approaches to the second home phenomenon as

an expression of the 'leisure class' mobility and recreation-based lifestyles, as well as a constitutive element of post-productivist land-use patterns and landscape change; and socio-economic and territorial development planning and policy-related perspectives on social change and spatial re-organization provoked by the expansion of second home tourism in times of prosperity and crisis. 'This book shows that second home tourism has become such an important sector of the economy that it is no longer possible to let it develop freely: it is the source of new forms of social deprivation; it generates residential economies that are particularly sensitive to the economic cycle; it often impairs beautiful landscapes and increases human pressure on natural environments. As a result, it is one of the major physical planning stakes of touristic areas' (From the concluding essay by Paul Claval, Université de Paris I - Sorbonne, Paris, France).

This Thematic Study is a joint venture between ICOMOS, the advisory body to UNESCO on cultural sites, and the International Astronomical Union. It presents an overall vision on astronomical heritage, attempts to identify what constitutes "outstanding universal significance to humankind" in relation to astronomy, and identifies broad issues that could arise in the assessment of cultural properties relating to astronomy. This is the first Thematic Study in any field of science heritage. It is elaborated using examples of properties from around the world, including some already on the World Heritage List or national Tentative Lists. The subject matter ranges from early prehistory to modern astrophysics and space heritage, and also prominently includes dark sky issues and modern observatory sites. An e-version of the Thematic Study was published in June 2010 in time to be presented to the 2010 meeting of UNESCO's World Heritage Committee, where it was duly approved. It has been circulated officially by the WHC to all of UNESCO's National Commissions. This full-colour paperback edition with some updates, and reformatted to new ICOMOS standards, was published in 2011 and is now offered for public sale.
