Sarah Lotz, internationally
acclaimed author of *The
Three*, and *Day Four*,
describes *The Mark* as:
"An entrancing, truly
original novel packed with
twists you won't see
coming and a heroine that
breaks the mould.
Unputdownable." In the
future, the world has
flipped. Ravaged by the

Conflagration, the State of
Mangieria is a harsh place
where the sun beats
down, people's lives are
run by a heartless elite
and law is brutally
enforced. A mark at the
base of the spine controls
each person's destiny.
The Machine decides what
work you will do and who
your life partner will be.
Juliet Seven - "Ettie" - will
soon turn 15 and her life
as a drudge will begin, her
fate-mate mate will be
chosen. Like everyone
else, her future is marked
by the numbers on her
spine. But Ettie decides to

challenge her destiny.
And in so doing, she
fulfills the prophecy that
was spoken of before she
even existed.

"I have learned the truth about the world: that it isn't as round as a tennis ball, and it isn't shaped like itself. It is shaped the way we shape it,

according to the way we see it, the way we mould it to our ambitions and our destiny. I know the colour of who I am. I am a black man, running for my life, for my freedom, for opportunity born from struggle, possibility born from sacrifice. And I am running too, for my father, who never became what he hoped to be, and who never got to see what his children would one day become. 'Maverick. Leadership genius. Self-made millionaire. Dragon. The rock star of public speaking. Vusi

Thembekwayo has been called many things. Join him in his inspiring journey from the township to the top echelons of South African business, to becoming one of youngest directors of a listed company and CEO of a boutique investment firm. As a 'Dragons' Den' judge and a sought-after public speaker across the globe, Vusi doesn't just talk business - he lives it. Now you can learn the secret of his success and how to shape your own destiny."-

This History explores the genealogy of autobiographical writing in England from the medieval period to the digital era.

Bob Books Set 4: Complex Words Basic Books

This moving poetry collection from the Booker Prize-winning author finds strength and hope while reflecting on the complex issues that have burdened Africa. First published in 1992, Ben Okri's remarkable debut

collection features poems that are now considered classics and taught in schools and universities worldwide. Here he plays with the mystique of the African continent, countering simplistic narratives of suffering that have been imposed on it with vibrant, nuanced portraits of the traditions and resilience of African peoples. An invaluable window onto Okri's experiences as a Nigerian immigrant to the United Kingdom and as a writer discovering his calling, these poems also

speak to universal truths about love, injustice, and the search for meaning. *South African Theological Bibliography* DK Children Children are often entertained by things that are disgusting and absurd. They will regularly seek this kind of material, so it is nice to have books that expose them to this stuff in a harmless fashion. The humorous value is endless, and kids inadvertently learn some science while reading. Ultimately, these publications use shocking images to elicit laughter

and education.

Instamaths

This is a concise and informal introductory book on the mathematical concepts that underpin computer graphics. The author, John Vince, makes the concepts easy to understand, enabling non-experts to come to terms with computer animation work. The book

complements the author's other works in the series (Essential Computer Animation fast and Essential Virtual Reality fast) and is written in the same accessible and easy-to-read style. It is also a useful reference book for programmers working in the field of computer graphics, virtual reality, computer animation, as well as students on digital media

courses, and even mathematics courses.
