*A Handbook on the Law of Shipping and Marine Insurance* Edward Elgar Publishing

The book examines and analyses in depth the specific issues which are currently occupying the marine insurance markets and the law. The London market is currently re-examining its practices

and international competitiveness; and the English case law is growing significantly. The issues identified in the book are the "fundamental issues" on which marine insurance law is based, and which are in the process of being re-examined and developed further to respond to the needs of modern insurance practice. They are of wider interest to insurance law in general and the evolution of English law is analysed against the backdrop of legal developments in Europe and Scandinavia.

Excerpt from Marine Insurance: Its Principles and Practice That this handbook supplies a want is shown by the fact that the first Edition has been exhausted. A second and revised Edition has, therefore, now been prepared, and it is hoped that it may be found of increased usefulness. The Association of Average Adjusters has kindly permitted me to add as an Appendix the Rules of Practice of that Association, for which courtesy I desire to record my thanks. The Marine Insurance Act, to which. Special attention is invited, and the york-antwerp Rules, are also included as Appendices. How well versed are you in marine insurance? It may not be a field of study you think about very often, but it is crucial for anyone in the shipping industry. Marine insurance law may seem complicated, but it can be understood with a simple introduction to the basic concepts. Marine insurance expert Bahaeddin Saffarini provides exactly that in his new book, *The Marine Insurance Handbook*. He covers English maritime law and the many articles and clauses that relate to marine insurance. Saffarini includes everything a marine underwriter or claims manager needs to know to do his or her job. Saffarini focuses on cargo and hull insurances, as well as information about reinsurance practices and marine loss adjustment. Saffarini outlines the articles of the Marine Insurance Act 1906, which he calls the bible of marine insurance. He brings insurance law into the modern day with a comparison of the 1982 and 2009 cargo clauses. He also includes information about fraud, letters of credit, and protection and indemnity clubs. Marine insurance can be confusing owing to the many different types of vessels and commodities involved, but Saffarini makes it easy to understand by condensing all the information into this simple guide.

*Marine Insurance: Law and Practice, Second Edition*, continues to provide the most comprehensive and integrated account of the English law and practice of marine insurance. It provides readers with a fresh and up-to-date review of the modern law in the light of traditional principles and rules of underlying commercial law, and the specific statutory rules of marine insurance as interpreted by case law, as moderated in practice by market practices and standard form marine insurance clauses. Francis Rose clarifies the law's underlying framework of principles and illustrates how it works in common contractual situations, explaining how the different components of the law interact. The new edition has been updated to incorporate: • the most recent case law: there have been some very important judgments handed down since the book first published, including: The Cendor MOP, The Silva, The Resolute and The Marina Iris • the implications of the introduction of: Institute Cargo Clauses 2009, the effect of the Gambling Act 2005 and the Third Parties (Rights Against Insurers) Act 2010 Law Commission reform proposals The book explores in detail the following areas: • the nature of insurance • insurable interest • the insurance contract • the premium • insured risks • marine risks • exclusions • losses • claims • subrogation • double insurance

*International Cargo Insurance* examines the law and practice of marine cargo insurance on a worldwide basis, and provides the busy practitioner the information needed to quickly and accurately resolve cargo insurance coverage issues, wherever they may arise. The book concentrates on the law in the United States and England. It then examines other countries with a common law tradition including Hong Kong, Singapore, Japan and Australia. The civil law systems are highlighted in a number of key trading nations: Italy, Germany, France and Norway. The book includes chapters on South Africa as well as the People's Republic of China. It concludes with a comparative law chapter concentrating on issues that arise in practice in cargo coverage cases. This chapter also examines how the Institute Cargo Clauses have been construed by Courts worldwide. The appendices include the standard cargo policy insurance terms used in each jurisdiction, some translated for the first time for this volume, as well as translations of the relevant statutes and commercial codes, many not available elsewhere.

[Marine Claims Handbook](#) Taylor & Francis

The focus of this new book is the modern Law of Marine Insurance, a subject of considerable practical importance in the United Kingdom and throughout the world. While existing works have tended to be preoccupied with the description of case law, largely based upon the Marine Insurance Act1906, this book adopts an approach which is line with current legal practice in that it looks towards the 1983 Institute Clauses as the foundation of modern legal practice in Marine Insurance. Similarly, while many practitioners' works rely upon listing and describing cases, the style of this workis analytical and rigorous thereby bringing to the subject a clarity hitherto missing. In terms of content the work covers the well-established basic structure of the topic starting with an introduction to the Law of Marine Insurance and the Insurance Market itself, before moving on to deal with theduty of good faith, the principles of causation, marine risks, losses, formation, cover, claims, subrogation and so forth. The book finishes with a series of useful appendixes setting out the relevant legislation, institute clauses and standard forms.
