'Becca slogged through a deep drift and stumbled toward the front of the shanty. A padlock hung from the hasp, but it wasn't engaged. Shaking with cold, she shoved open the door. The interior was dark and hushed. The air smelled of kerosene and fish. Out of the wind, it was so quiet she could hear the ice creaking beneath her feet. Her breath puffing out in clouds of white vapour, she pulled out the candle and matches she'd brought from home and lit the wick. The light revealed a small interior with plywood walls and a shelf

covered with fish blood and a smattering of silver scales. A lantern sat on the shelf. A coil of rope hung on the wall . . .' Three teenagers have vanished from Ohio's Amish country. The only thing they have in common, other than their religion, is they are keen to leave the Plain Life. Chief of Police Kate Burkholder is called in to consult by Agent John Tomasetti as her Amish roots will be invaluable in an investigation involving this sectarian society. They travel to the small town of Monongahela Falls to investigate the latest disappearance - that of seventeen-year-old Annie King. The only evidence left behind is a satchel - and a pool of blood. The case moves closer to home for Kate when a young relative, Sadie Miller, vanishes. With her own past resonating, Kate delves into the lives of the missing

teens. Soon, a sinister pattern emerges along with a vital clue that changes everything. While following up on a lead, Kate makes an appalling discovery and unearths a secret no one could have imagined—thrusting her into a fight to the death with a merciless killer.

Cuore (Heart)By Edmondo De AmicisThe mainspring of what is told of the daily events of school life, or in the stories supplementing them, has its origin in the noblest and finest of sentiments that spring spontaneously from the heart, revealing that personality toward which sympathy is immediately attracted and which throughout life possesses a charm second to no other.

Rich and detailed poems by one of America's preeminent experimental writers. *il cuore*: the heart is a major new collection of poetry by Kathleen Fraser, one of the most significant poets of the last generation and a writer of unusual courage and inventiveness. From the intimacy of early poems to the syntactic play of her much-praised book, when new time folds up (1993), Fraser's work examines fields of possibility, where the visual, theoretical, and lyrical collide. This book provides a generous selection of work both new and old, tracing the development of her poetics over the last three decades. Rich with detail, these poems radicalize intention by embracing error, as in "boundayr," and reassert language innovation as a feminist strategy. They lead us toward "the infinity of a door only slightly ajar" and have established Fraser as one of America's preeminent experimental writers.

Large mass bolometers are used in particle physics experiments to search for rare processes, like neutrinoless double beta decay and dark matter interactions. In the next years the CUORE experiment (a 1 Ton detector composed by 1000 crystals of TeO₂ operated as bolometers in a large cryostat at 10mK) will be the particle physics experiment with the highest chance of discovering the Majorana neutrino, a long standing and yet fundamental question of particle physics. The study presented in this book was performed on the bolometers of the CUORE experiment. The response function of these detectors is not linear in the energy range of interest, and it changes with the operating temperature, worsening the performances. The nonlinearity appeared to be dominated by the thermistor and the biasing circuit used to read the bolometer, and was modeled using few measurable parameters. A method to obtain a linear response is the result of this work. It allows a great improvement of the detector operation and data analysis. With a foreword by Fernando Ferroni.
