### **Owl Howl** Profile Books

This follow-up to *When Sadness Is at Your Door* suggests that happiness can always be found by looking within. This helpful picture book is a great introduction to mindfulness and emotional literacy. A spare text and simple illustrations encourage readers to find happiness even if it feels far away. The book gives it a shape, turning this elusive emotion into something real while acknowledging that you can't be happy all the time. The thoughtful text reassures readers that when happiness is hard to find, they can look for it in many places. Sharing something with

a friend or reaching out to someone who needs it can lead to happiness. Recognize and treasure it when you experience it, knowing that happiness begins with you. Perfect for kids and for adult readers tackling these feelings themselves!

*Frances Dean who Loved to Dance and Dance* Random House  
Books for Young Readers

Rare edition with unique illustrations. When Jacob and Wilhelm Grimm published their *Children's and Household Tales* in 1812, followed by a second volume in 1815, they had no idea that such stories as "Rapunzel," "Hansel and Gretel," and "Cinderella" would become the most celebrated in the world. From "The Frog King" to "The Golden Key," wondrous worlds unfold--heroes and heroines are rewarded, weaker animals triumph over the strong, and simple bumpkins prove themselves not so simple after all. A

delight to read, The Original Folk and Fairy Tales of the Brothers Grimm presents these peerless stories to a whole new generation of readers. Little Red Riding Hood, or Little Red Ridinghood, also known as Little Red Cap or simply Red Riding Hood, is a European fairy tale about a young girl and a Big Bad Wolf.

*What Would She Do?* Candlewick Press

This book is the first of a new series which will present the proceedings of the newly established Nestlé Nutrition Workshop Series: Clinical & Performance Programme aimed at adult nutrition. Undernutrition is a common phenomenon in elderly people, and malnutrition reaches significant levels in those being in hospital, nursing homes or home care programs.

Consequences of malnutrition often go unrecognised owing to the lack of specific validated instruments to assess nutritional status in frail elderly persons. The Mini Nutritional Assessment (MNA) provides a single, rapid assessment of nutritional status in the elderly of different degrees of independence, allowing the prevalence of protein-energy malnutrition to be determined and to evaluate the efficacy of nutritional intervention and strategies. Easy, quick and economical to perform, it enables staff to check the nutritional status of elderly people when they enter hospitals or institutions and to monitor changes occurring during their stay. Moreover, the MNA is predictive of the cost of care and length of stay in hospital. This publication will be of immense assistance to heads of geriatric teaching units, teachers in nutrition, clinicians general practitioners and dieticians, enabling them to better detect, recognise and start treatment of malnutrition in the elderly.

The Workgroup Human-Computer Interaction & Usability Engineering (HCI&UE) of the Austrian Computer Society (OCG) serves as a platform for interdisciplinary - change, research and development. While human-computer interaction (HCI) traditionally brings together psychologists and computer scientists, usability engineering (UE) is a software engineering discipline and ensures the appropriate implementation of applications. Our 2008 topic was Human-Computer Interaction for Education and Work (HCI4EDU), culminating in the 4th annual Usability Symposium USAB 2008 held during November 20-21, 2008 in Graz, Austria (<http://usab-symposium.tugraz.at>). As with the field of Human-Computer Interaction in Medicine and Health Care (HCI4MED), which was our annual topic in 2007, technological performance also increases exponentially in the area of education and work. Learners, teachers and knowledge workers are ubiquitously confronted with new technologies, which are available at constantly lower costs. However, it is obvious that within our e-Society the knowledge acquired at schools and universities - while being an absolutely necessary basis for learning - may prove insufficient to last a whole life time. Working and learning can be viewed as parallel processes, with the result that li- long learning (LLL) must be considered as more than just a catch phrase within our society, it is an undisputed necessity. Today, we are facing a tremendous increase in educational technologies of all kinds and, although the influence of these new technologies is enormous, we must never forget that learning is both a basic cognitive and a social process - and cannot be replaced by technology.

Little Owl howls and howls. Everyone in the neighborhood—from the hedgehog and the crow to the squirrel, mole, and stag beetle—tries to comfort her. They rock her in a large cobweb. They give her a nut. But even the mole's necklace of flowers does not calm her down. Could it be that she just needs a hug?

**The Value of Shame** Booksales

This volume combines empirical research-based and theoretical perspectives on shame in cultural contexts and from socio-culturally different perspectives, providing new insights and a more comprehensive cultural base for contemporary research and practice in the context of shame. It examines shame from a positive psychology perspective, from the angle of defining the concept as a psychological and cultural construct, and with regard to practical perspectives on shame across cultures. The volume provides sound foundations for researchers and practitioners to develop new models, therapies and counseling practices to redefine and re-frame shame in a way that leads to strength, resilience and empowerment of the individual.

**MiniMax Interventions** Broadleaf Books

In *MiniMax Interventions*, Manfred Prior presents therapeutic communication strategies that are designed to achieve a lot with

just a few linguistic alterations: maximum results for minimal effort. These tried-and-tested communication strategies can be used in an effective way by any therapeutic practitioner, in almost any kind of session. The step-by-step methods can make a huge contribution to helping patients and clients solve their problems and clarify their goals more quickly. They are easy to understand and put into practice and, as such, their profound effect will be readily observable. It takes a lot of time and experience to condense such a lot of information into such a short book, and such powerful transformative effects into short therapeutic phrases. Manfred Prior has studied the speech patterns of successful communication in psychotherapy, medicine and counselling for more than 30 years. As one of the most renowned hypnosis instructors in the German-speaking world, he has taught effective communication techniques and methods to psychotherapists, doctors and dentists since the mid-eighties. For the first time, his insights are now available in the English-speaking world. The book, originally published in German as the bestselling *MiniMax-Interventionen: 15 minimale Interventionen mit maximaler Wirkung*, is translated by Professor Paul Bishop. *MiniMax* interventions provide the basis for efficient communication as well as human encounter. They help reduce resistance from patients or more precisely do not let it build up. They strengthen the relationship between therapist and patient and build motivation and willingness to cooperate. Finally, they demonstrate time and again how a few short words can have long-lasting therapeutic consequences. Suitable for psychotherapists, counsellors, supervisors, coaches and organisational consultants. If you want to improve your

communication skills in a decisive yet practical way this succinct, accessible book is for you.

Written in collaboration with critically acclaimed NATIONAL BOOK AWARD finalist Patricia McCormick, Malala tells her story - from

her childhood in the Swat Valley to the shooting, her recovery and new life in England. She's a girl who loves cricket, gossips with her best friends, and, on the day of the shooting, nearly overslept and missed an exam. A girl who saw women suddenly banned from public, schools blown up, the Taliban seize control, and her homeland descend into a state of fear and repression. This is the story of her life, and also of her passionate belief in every child's right to education, her determination to make that a reality throughout the world, and her hope to inspire others.

**The Prince Who Was Just Himself** Springer-Verlag

Sinn gesucht - Gott erfahren 3 stellt die klassische Jugendgruppenarbeit, die Arbeit mit Konfirmanden und Firmlingen sowie den Religionsunterricht in den Mittelpunkt, deren Form meist zeitlich und räumlich begrenzt ist. Auch in 45-Minuten-Einheiten können wichtige Erfahrungen vermittelt werden - nah dran an der Lebenswelt und den Lebensthemen junger Menschen. Durch diese Form der erlebnispädagogischen Übungen kommen Lernprozesse in Gang, die über den zeitlich und räumlich begrenzten Rahmen hinausgehen. Sie bieten die Chance, den oftmals eintönigen, reizarmen und körperlich wenig herausfordernden Alltag zu durchbrechen. So werden Erfahrungen in realen Zusammenhängen ermöglicht, die neu motivieren, ganzheitlich zu denken und zu lernen. Sinn gesucht - Gott erfahren 3 schließt an den Erfolg der ersten beiden Bände an und geht mit seinen Übungen einen Schritt weiter: hin zu neuen Herausforderungen und Chancen der klassischen Gruppenarbeit. "Erlebnispädagogik in 45 Minuten?! Was eigentlich ein Ding der Unmöglichkeit ist, gelingt den Autoren in hervorragender Weise: Sie liefern fundierte Impulse, Theorien

und Methoden für eine Erlebnispädagogik in zeitbegrenzten Räumen – die in der Praxis auch wirklich funktionieren!" Stefan Westhauser, CVJM-Hochschule, Leitung Institut für Erlebnispädagogik

*Kognitive Verhaltenstherapie für Patienten mit leichter Alzheimer-Demenz und ihre Angehörigen* Vandenhoeck & Ruprecht

As the public grows disillusioned with therapeutic quick fixes, people are looking for a deeper psychotherapeutic experience to make life more meaningful and satisfying. What really happens in therapy? What promises and perils does it hold for them? No one writes about therapy - or indeed the dilemmas of the human condition - with more acuity, style, and heart than Irvin Yalom. Here he combines the storytelling skills so widely praised in Love's Executioner with the wisdom of the compassionate and fully engaged psychotherapist. In these six compelling tales of therapy, Yalom introduces us to an unforgettable cast of

characters: Paula, who faces death and stares it down; Magnolia, into whose ample lap Yalom longs to pour his own sorrows; Irene, who learns to seek out anger and plunge into it. And there's Momma, old-fashioned, ill-tempered, who drifts into Yalom's dreams and tramples through his thoughts. At once wildly entertaining and deeply thoughtful, Momma and the Meaning of Life is a work of rare insight and imagination.

In this charming book, children will delight in the sounds animals make as they come together to help a young bird find a friend. It's spring and everywhere birds are calling out to each other. But one bird has forgotten which sound to make. He tries "Woof," and meets a dog, who encourages him to try "Oink," with the expected result. Moo, Hee-Haw, Baa, Meow--each successive call adds another animal friend to the page. Will the young bird find another bird friend? As young readers are introduced to each type of animal and their sounds, Hendrik Jonas's clever illustrations grow increasingly crowded. The result is a beautiful celebration of friendship that will delight young children everywhere.
