The classic story by E. B. White, author of the Newbery Honor Book *Charlotte's Web* and *The Trumpet of the Swan*, about one small mouse on a very big adventure. Now available as an ebook!

Illustrations in this ebook appear in vibrant full color on a full-color device and in rich black-and-white on all other devices. *Stuart Little* is no ordinary mouse. Born to a family of humans, he lives in New York City with his parents, his older brother George, and Snowbell the cat. Though he's shy and thoughtful, he's also a true lover of adventure. Stuart's greatest adventure comes when his best friend, a beautiful little bird named Margalo, disappears from her nest. Determined to track her down, Stuart ventures away from home for the very first time in his life. He finds adventure aplenty. But will he find his friend? *Stuart Little* joins E. B. White favorites *Charlotte's Web* and *The Trumpet of the Swan* as classic illustrated novels that continue to speak

to today's readers. Whether you curl up with your young reader to share these books or hand them off for independent reading, you are helping to create what are likely to be all-time favorite reading memories.

English in Mind Level 4 Workbook  
McGraw Hill Professional  
Fundamentals of Ohio Real Estate Law is written in the author's engaging conversational style. Abstract concepts are supported by clear examples and supplemental materials to help students

gain a thorough understanding. Focusing on Ohio real estate principles, the author has designed the text to anticipate students' questions as they arise and answer them along the way. Ohio real estate law is filled with idiosyncrasies. As one of the key states in the westward expansion, Ohio became a testing ground for many different real estate surveying systems, which are still used today. Fundamentals of Ohio Real Estate Law is organized in a logical manner, introducing basic concepts in early chapters and building to more complex topics, while focusing on real-world issues. This text covers the new real estate closing requirements effective in 2015. In addition to the content for an undergraduate real estate law course, this book contains three chapters for the

required law prelicensing course for Ohio real estate agents. Teaching materials include test questions, sample syllabus and additional notes and resources. The World Governments workbook explores how governments are formed, what institutions and processes are needed to sustain a government, and how governments around the world are similar and different. *World Governments* compares 13 nations and

governments from around the world. Each nation is profiled with information about the country, a brief summary of the type of government, and a discussion of current issues that are important to the nation. The reading selection is followed by review exercises that include matching, fill-in-the-blank, and critical thinking exercises. This workbook is correlated to current national, state, and provincial standards. Mark Twain Media Publishing Company specializes in providing engaging supplemental books and decorative resources to complement middle- and upper-grade classrooms. Designed by leading educators, the product line covers a range of subjects including mathematics, sciences, language arts, social studies, history, government, fine

arts, and character.

An antidote to mathematical rigor mortis, teaching how to guess answers without needing a proof or an exact calculation. In problem solving, as in street fighting, rules are for fools: do whatever works—don't just stand there! Yet we often fear an unjustified leap even though it may land us on a correct result. Traditional mathematics teaching is largely about solving exactly stated problems exactly, yet life often hands us partly defined problems needing only moderately accurate solutions. This engaging book is an antidote to the rigor mortis brought on by too much mathematical rigor, teaching us how to guess answers without needing a proof

or an exact calculation. In *Street-Fighting Mathematics*, Sanjoy Mahajan builds, sharpens, and demonstrates tools for educated guessing and down-and-dirty, opportunistic problem solving across diverse fields of knowledge—from mathematics to management. Mahajan describes six tools: dimensional analysis, easy cases, lumping, picture proofs, successive approximation, and reasoning by analogy. Illustrating each tool with numerous examples, he carefully separates the tool—the general principle—from the particular application so that the reader can most easily grasp the tool itself to use on problems of particular interest. *Street-Fighting Mathematics* grew out of a short course taught by the author at MIT for students ranging from first-year undergraduates

to graduate students ready for careers in physics, mathematics, management, electrical engineering, computer science, and biology. They benefited from an approach that avoided rigor and taught them how to use mathematics to solve real problems. *Street-Fighting Mathematics* will appear in print and online under a Creative Commons Noncommercial Share Alike license. *T'es Branché? You work hard. You put in the hours. Yet you feel like you are constantly treading water with "Good Work" that keeps you going but never quite moves you ahead. Or worse, you are mired in "Bad Work"—endless meetings and energy-draining bureaucratic traps. Do More Great Work gets to the heart of the problem: Even the best performers are spending less than a fraction of their time doing "Great Work"—the kind of innovative work that pushes us forward, stretches our creativity, and truly satisfies us. Michael Bungay Stanier,

Canadian Coach of the Year in 2006, is a business consultant who's found a way to move us away from bad work (and even good work), and toward more time spent doing great work. When you're up to your eyeballs answering e-mail, returning phone calls, attending meetings and scrambling to get that project done, you can turn to this inspirational, motivating, and at times playful book for invaluable guidance. In fifteen exercises, Do More Great Work shows how you can finally do more of the work that engages and challenges you, that has a real impact, that plays to your strengths—and that matters. The exercises are "maps"—brilliantly simple visual tools that help you find, start and sustain Great Work, revealing how to: Find clues to your own Great

Work—they're all around you Locate the sweet spot between what you want to do and what your organization wants you to do Generate new ideas and possibilities quickly Best manage your overwhelming workload Double the likelihood that you'll do what you want to do All it takes is ten minutes a day, a pencil and a willingness to change. Do More Great Work will not only help you identify what the Great Work of your life is, it will tell you how to do it.
