An in-depth analysis of the specific aspects of justice, equality and tax law "Justice, Equality and Tax Law" is a topic that is both old and new at the same time. Even if the society changes, the demands that tax needs to be just and equal seem to be immutable. What changes, of course, is the perception of the content of those demands. International taxation post-BEPS has been fraught with new challenges that warranted urgent responses. These challenges were mainly provoked by the

unprecedented rise of the digital economy which truly marked a change in the way business is conducted, how value is created, and how goods and services are produced and consumed. Digitalization, in turn, had repercussions on all aspects of taxation - direct taxation, indirect taxation, and even tax procedures. For instance, the quest for more justice and equality in profit taxes was the reason why, in October 2021, a historical deal based on a two-pillar solution to address the tax challenges arising from the digitalization of the economy was negotiated within the OECD/G20 Inclusive Framework on Base Erosion and Profit Shifting and agreed upon by 137 member countries. It was also the motive behind the shift from a typical vendor collection model to an intermediary collection model supported by centralized registration points in

indirect taxes, notably the VAT/GST. Abundant data from the European Union or the OECD signaled an ever-increasing gap between expected VAT revenues and VAT actually collected, making it obvious that the classical system of VAT/GST collection was unable to respond to challenges posed by the digital economy. Therefore, new solutions based on the participation of digital platforms as intermediaries had been introduced. Finally, new technologies, such as blockchain, paved new avenues in enhancing tax compliance. In this context, this volume entitled "Justice, Equality, and Tax Law" contains not only a selection of the best master's theses of the full-time LL.M. programme in 2021/2022 but also represents an in-depth analysis of various aspects of this evergreen topic.

Complete Guide to Career Planning Springer

Economic globalization is transforming practically every service sector. The legal industry that has long remained insulated too has not remained untouched by the effects of globalization. The outsourcing of legal services in the past one decade has transformed the legal landscape. Legal outsourcing to India is becoming increasingly popular among U.S. and European law firms and corporations. This

book broadly seeks to discuss three main topics surrounding legal process outsourcing (LPO): its emerging trends, the legal challenges it raises and the hitherto unrecognized potential it holds. Firstly, this book clarifies concepts of LPO and its operating models practiced by U.S. and U.K. law firms and corporations. Secondly, the outsourcing of legal services creates significant challenges for ethics rules including conflict of interests, attorney-client privilege, supervision and fee sharing. Thirdly, this research explores the hidden potential of LPO to improve access to justice. This book develops an altogether new proposal where Indian LPO professionals could help alleviate the access to justice problem among indigent and low-income populations of the United States.
