## LIZETH DECKER

*Health Promotion in Health Care – Vital Theories and Research* The Experiment, LLC  
 Praised by practitioners, students and instructors for its engaging approach to teaching a very complex subject, *Demystifying Opioid Conversion Calculations: A Guide for Effective Dosing*, has long been the go-to guide for learning how to calculate opioid conversions. Now in its second edition, this reference is a must-have for clinicians involved in pain management at all levels. Written by pain management expert Mary Lynn McPherson, PharmD, MA, MDE, BCPS, CPE, *Demystifying Opioid Conversion Calculations* focuses on the calculations that practitioners use in actual practice, providing realistic scenarios for decision making. The revised edition covers the entire spectrum of opioid analgesics used to manage patients with moderate-to-severe pain and serious life-limiting illnesses.

*Primary Care - E-Book* ASHP

An unequalled compendium of cutting-edge information on self neglect This authoritative resource in provides nurses and healthcare professionals with a comprehensive overview and analysis of self-neglect in older adults. With an aging global population, self-neglect is emerging as a complex problem that crosses multiple disciplines of health and social care. Characterized by a harmful inattention to health and hygiene, self-neglect manifests in a variety of ways across the world that healthcare professionals need to be able to recognize and manage. The only text with the latest analysis of theoretical perspectives, research, and evidence from global leaders in the field, chapters tackle the interdisciplinary problem of self-neglect to deliver current professional practice tools and clinical practice interventions. Replete with case studies that examine the ethical, legal, and medical issues of self-neglect, the content is immediately applicable to researchers and clinicians. An extensive list of contributors from the U.S., Ireland, England, Scotland, Australia, Israel, Canada, and Korea include respected researchers, practitioners, and academics from multiple health and social care disciplines along with health and social care services who have played a critical role in advancing research, public awareness, and policy on self-neglect. Key Features: Delivers multi-faceted, cutting-edge information on self-neglect in older adults for nurses and related healthcare professionals Addresses theory, research, evidence, assessment and measurement, and clinical practice interventions Includes practical applications, case studies, and illustrations in each chapter Authored by an international panel of authoritative leaders in gerontology Provides debate and discussion on self-neglect that will promote further enquiry and research

**Children and Families in Health and Illness** F.A. Davis

Nurses have a unique role in redefining the way we view partnerships in healthcare— Transitioning from individualized to family-focused care is not only advocated by the Institute of Medicine; it's becoming a way of life. Families want their perspectives and choices for their loved ones to be heard.

*Maternal Child Nursing Care - E-Book* F.A. Davis

Synthesizes the nursing research literature in health promotion of children, pediatric acute and chronic conditions, and children and families in the health care system.

*Health Literacy in Primary Care* Routledge

This flexible workbook has been designed to guide all levels of nurses and nurse learners in the creation of an evidence-based health promotion project for any community. The book begins with a foundational review of professional nursing concepts. The unique manual directs learners through the steps of the nursing process in identifying and addressing health opportunities. The workbook contains copyrighted models for community health assessment, critical thinking points, case studies, and a variety of exercises to reinforce understanding. A range of worksheets and templates allow

nurse learners to view the challenge of health promotion from differing perspectives. An algorithm for project design allows for consistent and timely student submissions. Instructors may select from the book resources to tailor the project design to specific time limitations, course objectives, and student learning outcomes. Instructor resources include discussion points, time-planning goal sheets, grading rubrics guides and more.

*Nurses and Families* John Wiley & Sons

This innovative text uses concrete examples and hands-on exercises to help readers clearly understand and apply the five steps of the nursing process. Wellness concepts and independent critical thinking, major emphases of this text, are incorporated into each step of the nursing process. Book provides extensive treatment of collaborative practice and delegation, critical thinking, case management and critical pathways. For those interested in understanding the nursing process within a framework for providing holistic care.

*Multicultural Health* Cambridge University Press

Written by and for Nurse Practitioners from a unique collaborative perspective, *Primary Care: A Collaborative Practice*, 4th Edition, prepares you to provide care for all of the major disorders of adults seen in the outpatient setting. Evidence-based content reflects the latest guidelines for primary care of hundreds of conditions, including hypertension, diabetes, and sexually transmitted infections. Now in full color, the 4th Edition includes chapters on emerging topics such as genetics, obesity, lifestyle management, and emergency preparedness. Combining a special blend of academic and clinical expertise, the author team provides a practical text/reference that promotes a truly collaborative primary care practice. Comprehensive, evidence-based content incorporates the latest standardized guidelines for primary care in today's fast-paced, collaborative environment. Unique! A collaborative perspective, reflecting the key roles of NPs, MDs, PAs, PharmDs, and others, promotes seamless continuity of care. A consistent format from chapter to chapters facilitates learning and clinical reference value. Diagnostics and Differential Diagnosis boxes provide a quick reference for diagnosing disorders and helping to develop effective management plans. Physician Consultation icons highlight situations or conditions in which consultation is either recommended or necessary. Emergency Referral icons identify signs and symptoms that indicate the need for immediate referral to an emergency facility. Co-management with Specialists discussions help you provide truly collaborative care in the outpatient setting. Complementary and alternative therapies are addressed where supported by solid research evidence.

*Introduction to Community Based Nursing* Springer Publishing Company

This introduction to community based nursing roles and concepts focuses on nursing care of the individual in a community setting. The text is divided into four units that cover the knowledge base for concepts and the application of concepts. Basic concepts are presented in the first unit, with discussion of practice settings, levels of prevention, health promotion, the family and cultural considerations. Three basic skills of the community based nursing - communicating, educating and managing - are examined in the second unit. The third unit explains the application of skills and concepts to continuity of care, discharge planning, community resources and referrals and home health practice. The fourth unit prepares the reader for what's ahead, with a look into future trends in community based nursing.

*Community/Public Health Nursing Online for Stanhope and Lancaster, Public Health Nursing (User Guide, Access Code and Textbook Package)* SAGE

-- Completely new to this edition and to family practice: how to do 15-minute family interviews in a variety of clinical settings -- The only practical and detailed "how-to" guide for the nursing of families -- Excellent in-depth clinical guide to nursing assessment and intervention with families, with clinical examples -- Updated and expanded Calgary Family Assessment Model -- Updated and revised Calgary Family Intervention Model -- Emphasizes diversity issues such as ethnicity, race, culture,

sexual orientation, gender, and socioeconomic class in numerous clinical examples -- Supplies detailed clinical guidelines of how to prepare, conduct, and document a family interview

*The Collaborative Partnership Approach to Care - A Delicate Balance* F.A. Davis

The Collaborative Partnership Approach to Care: A Delicate Balance, 1e, brings together the insights and discoveries by expert clinicians and teachers who use a collaborative approach to care. The primary focus of this book is on the relationships between professionals and the people they care for -- not just between professionals. Based on the "McGill Model of Nursing", the authors stress the value of working in collaboration with the client, family, or community. Written for nursing students of all levels, it also will be of interest to health care and mental health professionals. Uses a variety of formats to present ideas about collaboration. Describes ideas about collaboration from the perspective of expert clinicians who have been using collaboration as their approach to nursing care. Integrates quotes from interviews with expert clinicians to illustrate ideas about collaboration. Uses examples from clinical practice to help the reader understand how these theoretical ideas are translated into practice. Describes ideas used in teaching students about collaboration. Raises questions that can guide further research in this area.

**Handbook of Clinical Nursing Research** W. W. Norton

Master the essentials of maternity and pediatric nursing with this comprehensive, all-in-one text! Maternal Child Nursing Care, 7th Edition covers the issues and concerns of women during their childbearing years and children during their developing years. It uses a family-centered, problem-solving approach to patient care, with guidelines supported by evidence-based practice. New to this edition is an emphasis on clinical judgment skills and a new chapter on children with integumentary dysfunction. Written by a team of experts led by Shannon E. Perry and Marilyn J. Hockenberry, this book provides the accurate information you need to succeed in the classroom, the clinical setting, and on the Next Generation NCLEX-RN® examination. Focus on the family throughout the text emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Information on victims of sexual abuse as parents and human trafficking helps prepare students to handle these delicate issues. Nursing Alerts highlight critical information that could lead to deteriorating or emergency situations. Guidelines boxes outline nursing procedures in an easy-to-follow format. Evidence-Based Practice boxes include findings from recent clinical studies. Emergency Treatment boxes describe the signs and symptoms of emergency situations and provide step-by-step interventions. Atraumatic Care boxes teach students how to manage pain and provide competent care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes highlight important information nurses need to communicate to patients and families. Cultural Considerations boxes describe beliefs and practices relating to pregnancy, labor and birth, parenting, and women's health. Family-Centered Care boxes draw attention to the needs or concerns of families that students should consider to provide family-centered care.

*Health Promotion* American Pharmacists Association (APhA)

Unit I: The Foundations: Introduction to multicultural health -- Theories and models related to multicultural health -- Worldview and health decisions -- Complementary and alternative medicine -- Religion, rituals and health -- Communication and health promotion in diverse societies. Unit II: Specific Cultural Groups: Hispanic and Latino American populations -- American Indian and Alaskan Native populations -- African American populations -- Asian American populations -- European and Mediterranean American populations -- Nonethnic cultures. Unit III: Looking Ahead: Closing the gap: strategies for eliminating health disparities.

*Canadian Maternity and Pediatric Nursing* Elsevier Health Sciences

From leading experts in cognitive-behavioral therapy (CBT)--including CBT originator Aaron T. Beck and many who have worked closely with him--this book provides an overview of where the field is today and presents cutting-edge research and clinical applications. Contributors explain how Beck's cognitive model has been refined and tested over the last 45 years and describe innovative CBT approaches that integrate mindfulness, imagery, emotion-focused interventions, and other strategies. Chapters on specific clinical problems cover the conceptualization and treatment of depression, anxiety disorders, posttraumatic stress disorder, obsessive-compulsive disorder, insomnia, suicidality, substance abuse, couple and family problems, bipolar disorder, psychosis, and personality disorders. y

*Self-Neglect in Older Adults* Elsevier Health Sciences

This money-saving package includes the 8th edition of Community/Public Health Nursing Online for Stanhope and Lancaster, Public Health Nursing (User Guide and Access Code) and Public Health Nursing, 8th edition textbook.

*Wright & Leahey's Nurses and Families* Lippincott Williams & Wilkins

Prepare for the real world of family nursing care! Explore family nursing the way it's practiced today—with a theory-guided, evidence-based approach to care throughout the family life cycle that responds to the needs of families and adapts to the changing dynamics of the health care system. *Science and Practice in Cognitive Therapy* SAGE

Offering specific guidelines for nurses when preparing for, conducting, and documenting family meetings from initial interview through discharge, this guide provides practical how to guidelines for assessment and interventions with families. the focus on practical applications for clinical practice offers the opportunity for students to promote improved health care with families. Includes the revised Calgary Family Assessment Model.

**Nurses and Families** Springer Publishing Company

An easy-to-read, contemporary and evidence-based approach to managing psychiatric emergencies. Recognize and assess psychiatric problems promptly and accurately, intervene safely, and provide treatment and case disposition.

*Child and Adolescent Behavioral Health* Independently Published

This open access textbook represents a vital contribution to global health education, offering insights into health promotion as part of patient care for bachelor's and master's students in health care (nurses, occupational therapists, physiotherapists, radiotherapists, social care workers etc.) as well as health care professionals, and providing an overview of the field of health science and health promotion for PhD students and researchers. Written by leading experts from seven countries in Europe, America, Africa and Asia, it first discusses the theory of health promotion and vital concepts. It then presents updated evidence-based health promotion approaches in different populations (people with chronic diseases, cancer, heart failure, dementia, mental disorders, long-term ICU patients, elderly individuals, families with newborn babies, palliative care patients) and examines different health promotion approaches integrated into primary care services. This edited scientific anthology provides much-needed knowledge, translating research into guidelines for practice.

Today's medical approaches are highly developed; however, patients are human beings with a wholeness of body-mind-spirit. As such, providing high-quality and effective health care requires a holistic physical-psychological-social-spiritual model of health care is required. A great number of patients, both in hospitals and in primary health care, suffer from the lack of a holistic oriented health approach: Their condition is treated, but they feel scared, helpless and lonely. Health promotion focuses on improving people's health in spite of illnesses. Accordingly, health care that supports/promotes patients' health by identifying their health resources will result in better patient outcomes: shorter hospital stays, less re-hospitalization, being better able to cope at home and improved well-being, which in turn lead to lower health-care costs. This scientific anthology is the first of its kind, in that it connects health promotion with the salutogenic theory of health throughout the chapters. the authors here expand the understanding of health promotion beyond health protection and disease prevention. The book focuses on describing and explaining salutogenesis as an umbrella concept, not only as the key concept of sense of coherence.

*Family-Focused Nursing Care* Elsevier Health Sciences

**THE FIRST BOOK TO PRESENT THE SUCCESSES, CHALLENGES, AND OPPORTUNITIES OF GLOBAL HEALTH NURSING** This text is designed specifically for nurses and nursing students who have an interest in global health as a specialty, regardless of experience or education level. It reflects both the unique contributions of the nursing profession and of other disciplines, which is in keeping with the editors' perspective on how to bring about lasting change. The text views global health through a nursing lens, but maintains this awareness and appreciation of interprofessionalism throughout. The editors and contributors have firsthand experience of the complex dynamics in achieving global health, and bring a wealth of knowledge to this important field, which has grown as a course and specialty. The text depicts the worldwide expansion of nursing partnerships between resource-rich and resource-limited countries, discusses challenges and obstacles, and provides cases and guidance on how to achieve global health. It will appeal to all nurses, from student nurses embarking on a global health experience to more experienced global health nurses who offer professional nursing expertise from around the world. The text responds to a recent WHO mandate, which seeks the input of nurses and midwives as part of an interprofessional team of key strategists for facilitating global health. The Lancet report is also an important document used throughout the text, and an interview with Dr. Julio Frenk, author of that report, is included. Social, political, cultural, economic, and environmental factors—including climate change—are integrated into determinants of global health. The text covers the foundations of global health, including the emerging concept of climate justice, the ethical context of global health, and the importance of interprofessional education. It addresses key issues of global health with a focus on poor and vulnerable individuals—particularly women and children—and those living in areas of conflict. In addition to describing notable accomplishments toward achieving global health, the book focuses on the need for increasing access to primary care, improving clinical practice through expanded education, and engaging interdisciplinary researchers in discovery of viable solutions. The book includes the perspectives of nurses and colleagues from other disciplines in both resource-rich and resource-limited countries. References provide resources for additional study, and PowerPoint slides and a test bank for instructors accompany the text. **KEY FEATURES** Case studies depict real-world experiences Presents firsthand knowledge of global health dynamics, challenges, and opportunities Provides a wealth of information from multiple perspectives Authored by contributors across a variety of clinical and academic roles who are experienced in global health nursing and global health Includes chapters written by nurses from both resource-limited and resource-rich countries

*Illness Beliefs* Elsevier Health Sciences

Designated a Doody's Core Title! At the intersection of health care delivery and practice there lies a large area of patient care with no manual: how to provide the best care to patients who have a critically low level of comprehension and literacy. Because all patients play a central role in the outcome of their own health care, competent health care becomes almost impossible for caregivers when the boundary of low literacy skills is present. In a concise and well-written format you will learn: Common myths about low literacy Examples of low health care literacy How to recognize patients with low literacy Strategies to help patients with low literacy and reduce medical errors Cultural issues in health literacy Ways to create a patient-friendly office environment How to improve patient communication Guidelines to target and overcome common problems practitioners encounter This clear, well written book is packed with examples and tips and will serve as a much needed guide for primary care providers, nurse practitioners, hospital administrators, and others who are looking for ways to improve their communication with patients and provide the most beneficial health care to their low-literacy patients.
