Police Education and Training Revisited: Drawbacks and Advances Taylor & Francis

Rooted in an international political economy theoretical framework, this book provides unique insights into the global forces and local responses that are shaping education systems in Central America and the Latin Caribbean (CALC). The book covers all Spanish-speaking countries of the CALC region and examines the effects of macro-economic pressures, geopolitical intervention, neo-colonial relationships, global pandemics, transnational gang networks, and the influence of international organizations. Chapters analyse the challenges and opportunities these global forces present to education systems in the region as well as highlighting the local efforts to address, mitigate, and counteract them. In doing so, the book illuminates how education can contribute to either maintaining or challenging inequalities and exclusion in the face of pressures from the global to local levels.

Evidence CRC Press

NSCA's Essentials of Tactical Strength and Conditioning is the ideal preparatory guide for those seeking TSAC-F certification. The book is also a great reference for fitness trainers who work with tactical populations such as military, law enforcement, and fire and rescue personnel.

Hidden Youth and the Virtual World Hachette Books

In recent years, scholars have noted the rise of a particular type of authoritarianism worldwide, in which rulers manipulate institutions designed to implement the rule of law so that they instead facilitate the exercise of arbitrary power. Even as scholars puzzle over this seemingly new phenomenon, scholarship on African politics offers helpful answers. This book places literature on the post-colonial African state in conversation with literature on modern authoritarianism, using this to frame over ten months of qualitative field research on Uganda's informal security actors - including vigilante groups, local militias, and community police. Based on this research, the book presents an original framework - called 'institutionalized arbitrariness' - to explain how modern authoritarian rulers project arbitrary power even in environments of relatively functional state institutions, checks and balances

and the rule of law. In regimes characterized by institutionalized arbitrariness, the state's stochastic assertions and withdrawals of power inject unpredictability into the political relationship between both local authorities and citizens. This arrangement makes it difficult for citizens to predict which authority, if any, will claim jurisdiction in a given scenario, and what rules will apply. This environment of pervasive political unpredictability limits space for collective action and political claim-making, while keeping citizens marginally engaged in the democratic process. The book is grounded in empirical research and literature theorizing the African state, while seeking to inform a broader debate about contemporary forms of authoritarianism, state-building, and state consolidation. Oxford Studies in African Politics and International Relations is a series for scholars and students working on African politics and International Relations and related disciplines. Volumes concentrate on contemporary developments in African political science, political economy, and International Relations, such as electoral politics, democratization, decentralization, gender and political representation, the political impact of natural resources, the dynamics and consequences of conflict, comparative political thought, and the nature of the continent's engagement with the East and West. Comparative and mixed methods work is particularly encouraged, as is interdisciplinary research and work that considers ethical issues relating to the study of Africa. Case studies are welcomed but should demonstrate the broader theoretical and empirical implications of the study and its wider relevance to contemporary debates. The focus of the series is on sub-Saharan Africa, although proposals that explain how the region engages with North Africa and other parts of the world are of interest. Series Editors: Nic Cheeseman, Professor of Democracy and International Development, University of Birmingham; Peace Medie, Senior Lecturer in Gender and International Politics, University of Bristol; and Ricardo Soares de Oliveira, Professor of the International Politics of Africa, University of Oxford. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations.

Proceedings of IAC in Vienna 2022 Routledge

This book considers the status of constitutional literacy in the United States along with ways to assess and improve it. The author argues that pervasive constitutional illiteracy is a problem for both law enforcement agencies and for ordinary citizens. Based on the author's decades of teaching in law enforcement agencies around the country, this book argues for the moral and pragmatic value of constitutional literacy and its application in twenty-first century society.

Race on the Brain Human Kinetics

The proceedings of the "Economics and Business Competitiveness International Conference" (EBCICON) provides a selection of papers, either research results or literature reviews, on business transformation in the digital era. Nine major subject areas, comprising accounting and governance, customer relations, entrepreneurship, environmental issues, finance and investment, human capital, industrial revolution 4.0, international issues, and operations and supply chain management are presented in the proceedings. These papers will provide new insights into the knowledge and practice of business and economics in the digital era. Therefore, parties involved in business and economics such as academics, practitioners, business leaders, and others will be interested in the contents of the proceedings.

A City Divided: Race, Fear and the Law in Police Confrontations Routledge

Andrew Choo's 'Evidence' provides a lucid and concise account of the principles of the law of civil and criminal evidence in England and Wales. Critical and thought-provoking, it is the ideal text for undergraduate law students.

Shakespeare Survey 74 Policy Press

Based on unprecedented empirical research conducted with lower levels of the Afghan police, this unique study assesses how institutional legacy and external intervention have shaped the structural conditions of corruption in the police force and the state. Taking a social constructivist approach, the book combines an in-depth analysis of internal political, cultural and economic drivers with references to several regime changes affecting policing and security, from the Soviet occupation and Mujahidin militias to Taliban religious police. Crossing disciplinary boundaries, Singh offers an invaluable contribution to the literature and to anti-corruption policy in developing and conflict-affected societies.

Introduction to Policing Edward Elgar Publishing

Contemporary police service delivery and performance are complex phenomena. Law enforcement, particularly at the local level, must therefore face the additional challenges of globalization, cybercrime, counter-terrorism and calls for reform, at a time when extreme budgetary constraints are being implemented. Policing operations encompass multiple critical tasks and responsibilities not routinely measured and evaluated, such as response to incidents involving medical assistance, homelessness, mental illness, community engagement, and neighborhood problem-solving endeavors. This volume aims to provide government, criminal justice and policing administrators, policy makers and criminal justice scholars and researchers with comprehensive analyses of the critical issues impacting the challenges inherent in providing effectual public safety, security and service, all from a global perspective. It takes into account popular criticism, extreme budgetary constraints, and the relatively novel and overwhelming challenges of terrorism and cybercrime. The book merges study and practice to identify avenues to best serve community interests, ensure organizational success, and enhance public confidence in policing and in rule of law.

Police Trauma, Loss, and Resilience Taylor & Francis

Shakespeare Survey is a yearbook of Shakespeare studies and production. Since 1948, *Survey* has published the best international scholarship in English and many of its essays have become classics of Shakespeare criticism. Each volume is devoted to a theme, or play, or group of plays; each also contains a section of reviews of that year's textual and critical studies and of the year's major British performances. The theme for Volume 74 is 'Shakespeare and Education'. The complete set of *Survey* volumes is also available online at <https://www.cambridge.org/core/what-we-publish/collections/shakespeare-survey> This fully searchable resource enables users to browse by author, essay and volume, search by play, theme and topic and save and bookmark their results.

The Nonsense Factory Taylor & Francis

The need for evidence-based practice to enhance current and future police training and assessment has never been greater. This need focuses on the procedures and findings of research within the field of police work along with the philosophy guiding these research approaches and commentaries on the methods being used. With many future directions for the science of police training and assessment, the focus on new training techniques and technologies for improving performance is of the utmost importance to find the best current, evidence-based practices for policing. In addition to these practices, understanding the practical realities and challenges of implementing cutting-edge

procedures is essential in gaining a holistic view on police well-being and performance. *Interventions, Training, and Technologies for Improved Police Well-Being and Performance* is a critical publication that explores new training methods and technologies. The future of policing is poised to change, making the need for developments in evidence-based practices more important than ever before. New technology and techniques for improving performance and the perception of the police force can guide the policies and practices of law enforcement, trainers and academies, government officials, policymakers, psychologists, psychiatrists, therapists, to a more effective implementation of training and procedures. Including the perspective of police officers within the publication, this text offers insight into an often neglected viewpoint when creating training and policies. This text is also beneficial for researchers, academicians, and students interested in the new training techniques, technologies, and interventions for police performance and well-being.

Handbook of Research on Cross-Disciplinary Uses of Gamification in Organizations IGI Global

This insightful book analyzes the evolution of the operational tasks and cooperation of the European Border and Coast Guard Agency (FRONTEX), the European Asylum Support Office (EASO) and the European Union Agency for Law Enforcement Cooperation (EUROPOL). Exploring the recent expansion of the legal mandates of these decentralized EU agencies and the activities they undertake in practice, David Fernández-Rojo offers a critical assessment of the EU migration agencies.

The Power to Arrest Charles C Thomas Publisher

In a critical analysis of conventional understanding, leading authors Claire Davis and Marisa Silvestri present bold new conceptualisations of police leadership. Drawing on empirical research in criminology, sociology and leadership studies, they present a thoughtful critique of the nature and practice of leadership in contemporary policing. The book: - Critically explores the identities of leaders and their positions within wider organisational structures and processes; - Provides a critique of contemporary reform to police professionalisation, training and education, equalities and diversity by situating these developments within wider historical, social and political context; - Draws on critical theory to offer an alternative, challenging and novel interpretation of police leaders as not simply the result of individual experiences and attitudes, but of the social, institutional and historical processes of policing and the cultures that exist within it; - Points towards future directions and a reimagining of leadership in the police. Accessible and stimulating, this is an essential text for policing students and valuable reading for current leaders and those interested in policing, criminology and leadership.

Enhancing Police Service Delivery SAGE

In countries with democratic traditions, police interactions with the mentally ill are usually guided by legislative mandates giving police discretion and possibly resulting in referrals for assistance and treatment. But all too frequently, the outcome of these interactions is far less therapeutic and leads to a cycle of arrests and ultimately incarceration. Stemming from an initiative in Memphis, Tennessee two decades ago, police departments in many parts of the world have set up specific programs with crisis intervention teams to facilitate police contact with the mentally ill. *Policing and the Mentally Ill: International Perspectives* examines how these types of programs have fared in jurisdictions across the world. The book begins with developments in North America and Europe—traditionally the locus of much of the innovation and change in policing and related areas. It demonstrates how a number of jurisdictions in Europe have only recently begun to recognize therapeutic intervention with the

mentally ill as a priority issue, and still frequently suffer from a lack of significant resources. The largest section of the book focuses on Australia, where local law enforcement agencies have displayed a remarkable enthusiasm for and commitment to change in their management of interactions with citizens with mental illness. Finally, the book examines the particular challenges of providing humane and effective policing for persons with mental illnesses in parts of the developing world. These challenges often involve dealing with entrenched cultural beliefs and practices based on superstition, fear, and prejudice regarding persons thought to be mentally ill. Interactions between police and persons with mental illnesses comprise an important and sensitive aspect of everyday policing. The 16 chapters in this book offer a wide range of cross-cultural perspectives on this essential aspect of policing, enabling police practitioners to develop a best practices approach to managing their interactions with this vulnerable segment of the community.

"Code of Massachusetts regulations, 2015" Policy Press

A withering and witty examination of how the American legal system, burdened by complexity and untrammelled growth, fails Americans and threatens the rule of law itself, by the acclaimed author of *A Generation of Sociopaths*. Our trial courts conduct hardly any trials, our correctional systems do not correct, and the rise of mandated arbitration has ushered in a shadowy system of privatized "justice." Meanwhile, our legislators can't even follow their own rules for making rules, while the rule of law mutates into a perpetual state of emergency. The legal system is becoming an incomprehensible farce. How did this happen? In *The Nonsense Factory*, Bruce Cannon Gibney shows that over the past seventy years, the legal system has dangerously confused quantity with quality and might with legitimacy. As the law bloats into chaos, it staggers on only by excusing itself from the very commands it insists that we obey, leaving Americans at the mercy of arbitrary power. By examining the system as a whole, Gibney shows that the tragedies often portrayed as isolated mistakes or the work of bad actors -- police misconduct, prosecutorial overreach, and the outrages of imperial presidencies -- are really the inevitable consequences of law's descent into lawlessness. The first book to deliver a lucid, comprehensive overview of the entire legal system, from the grandeur of Constitutional theory to the squalid workings of Congress, *The Nonsense Factory* provides a deeply researched and witty examination of America's state of legal absurdity, concluding with sensible options for reform.

Policing Across Organisational Boundaries Springer

Of the many obstacles to racial justice in America, none has received more recent attention than the one that lurks in our subconscious. As social movements and policing scandals have shown how far from being "postracial" we are, the concept of implicit bias has taken center stage in the national conversation about race. Millions of Americans have taken online tests purporting to show the deep, invisible roots of their own prejudice. A recent Oxford study that claims to have found a drug that reduces implicit bias is only the starkest example of a pervasive trend. But what do we risk when we seek the simplicity of a technological diagnosis—and solution—for racism? What do we miss when we locate racism in our biology and our brains rather than in our history and our social practices? In *Race on the Brain*, Jonathan Kahn argues that implicit bias has grown into a master narrative of race relations—one with profound, if unintended, negative consequences for law, science, and society. He emphasizes its limitations, arguing that while useful as a tool to understand particular types of behavior, it is only one among several tools available to policy makers. An uncritical embrace of implicit bias, to the exclusion of power relations and structural

racism, undermines wider civic responsibility for addressing the problem by turning it over to experts. Technological interventions, including many tests for implicit bias, are premised on a color-blind ideal and run the risk of erasing history, denying present reality, and obscuring accountability. Kahn recognizes the significance of implicit social cognition but cautions against seeing it as a panacea for addressing America's longstanding racial problems. A bracing corrective to what has become a common-sense understanding of the power of prejudice, *Race on the Brain* challenges us all to engage more thoughtfully and more democratically in the difficult task of promoting racial justice.

Policing Anthem Press

Why do so many South Africans prefer taking the law into their own hands to relying on the police? Why are those who do so often cheered or sympathised with? Of the unprecedented 27 000 recorded murders in South Africa in 2022, at least 1 894 – or 7 per cent – were attributed to mob justice and vigilantism, more than double the number from five years before. In the first nine months of 2023, a further 1 472 mob justice deaths had already been registered. Mob justice is nothing new, but in recent years it has taken on an undeniably desperate, furious edge. From the breathtakingly violent Zandspruit massacre in May 2021, to the killings during the July unrest two months later, to the march of Operation Dudula across the nation in 2022, vigilantism – and the condoning of it – has never before captured the zeitgeist of South Africa so sharply. What has changed in the past few years, and what does it augur for the future? Following three recent cases of mob justice, from the hellish metropolitan townships of Gauteng to the far-flung bushveld of northern Limpopo, and drawing on extensive research and interviews, *Why We Kill* explores the roots, realities and consequences of South Africa's current crisis of vigilantism.

Introduction to Criminal Justice Routledge

The United Arab Emirates (UAE) has elaborated its own philosophy of security. Driven by emergencies and increasing risks, both in the region and globally, Emirati authorities have developed a sense of anticipation as well as an agility to react promptly to new threats through the ability to assess the risks in any given situation. War and the avatars of conflict are a constant reality in the Middle East. Transnational threats, including the regional context, the war in Yemen, insecurity in the Levant and tensions with Iran affect the overall stability of the Peninsula and consequently that of the UAE. Owing to the inclusion of the UAE in the networks of globalization, non-traditional security issues are not relegated to the background. Issues such as COVID-19, immigration, cybersecurity and human trafficking need to be addressed domestically as well as globally. This volume offers a comprehensive and multifaceted examination of the traditional and non-traditional security measures present in the UAE that allow the country to remain politically stable in an otherwise volatile region, and aims to offer a comprehensive overview of all forms of security in the UAE.

Facets of Security in the United Arab Emirates Routledge

This book promotes new theoretical frameworks and research questions that seek to advance knowledge of policing across internal and external organisational boundaries, specifically at the structural level of analysis. It addresses police theory, policy and practice, and also provides new directions for future research on intra- and inter-organisational policing. Analysing boundaries is of increasing global importance for policing policy and practice. Boundaries reflect the division-of-labour inherent to complex organisations and their specialist units. In order to operate

effectively, however, these boundaries must be crossed, and strong and reliable linkages must be built. Intra-organisationally, it is vital to understand how specialist units form and function and interact with other units. Inter-organisationally, it is fundamental to recognise the place of boundaries in contexts such as international police cooperation. Chapters 3 and 4 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Police Unlimited Oxford University Press

Gaming is increasingly prevalent in our society and everyday lives as a form of leisure or competition. The typical aim of gaming is to gain a pleasant experience from the game. Because of the saturation of gaming in global society, the gamification concept and its operationalization in non-gaming contexts has become a growing practice. This technological novelty is the basis for an innovative change in many types of environments such as education, commerce, marketing, work, health, governance, and sustainability, among others. The service sector especially has shown widespread adoption of the method as it seeks to increase and motivate audiences and promote brands. However, little research is available on the adoption of gamification in organizations, leading to a need for literature that investigates best practices for utilization and implementation. *The Handbook of Research on Cross-Disciplinary Uses of Gamification in Organizations* is a comprehensive and timely reference book that explores the field of gamification for economic and social development. This book provides dynamic research from this emerging field. Covering topics such as distance learning, health behaviors, and workplace training, this book is a valuable reference for researchers, marketing managers, students, managers, executives, software developers, IT specialists, technology developers, faculty of P-12 and higher education, teachers, professors, government officials, and academicians.

Policing and the Mentally Ill Frontiers Media SA

Police auditing merits the attention of both practitioners and academicians for two primary reasons. First, police auditing meets the need of police administrators to know about the economy, efficiency, and effectiveness of their organization and operations. Second, it provides an important mechanism for the public and its elected officials to fulfill their oversight responsibilities. This book provides a comprehensive examination of theories, standards, procedures, applications, and evaluations of police audits to allow the reader to obtain a detailed understanding of different aspects and types of police audits and apply the principles of auditing and data collection to various police programs. The book is readable for different audiences as it provides a review of police auditing along with discussions of planned change and incorporates standards and procedures in police auditing into social scientific research process and methods. The book is aimed at three types of readers. First, it provides police executives and managers with a timely and necessary understanding of police auditing as they conduct budget reviews and organizational diagnoses. Second, it serves as a valuable source of information for auditors and researchers who are either charged with the responsibility to perform police audits directly or engaged in evaluating audited police programs. Third, students in criminal justice programs will benefit from this book in courses that address research methods and police accountability issues.
