The Enlightenment and the Book Yale University Press  
 In the late eighteenth century, an array of European political thinkers attacked the very foundations of imperialism, arguing passionately that empire-building was not only unworkable, costly, and dangerous, but manifestly unjust. *Enlightenment against Empire* is the first book devoted to the anti-imperialist political philosophies of an age often regarded as affirming imperial ambitions. Sankar Muthu argues that thinkers such as Denis Diderot, Immanuel Kant, and Johann Gottfried Herder developed an understanding of humans as inherently cultural agents and therefore necessarily diverse. These thinkers rejected the conception of a culture-free "natural man." They held that moral judgments of superiority or inferiority could be made neither about entire peoples nor about many distinctive cultural institutions and practices. Muthu shows how such arguments enabled the era's anti-imperialists to defend the freedom of non-European peoples to order their own societies. In contrast to

those who praise "the Enlightenment" as the triumph of a universal morality and critics who view it as an imperializing ideology that denigrated cultural pluralism, Muthu argues instead that eighteenth-century political thought included multiple Enlightenments. He reveals a distinctive and underappreciated strand of Enlightenment thinking that interweaves commitments to universal moral principles and incommensurable ways of life, and that links the concept of a shared human nature with the idea that humans are fundamentally diverse. Such an intellectual temperament, Muthu contends, can broaden our own perspectives about international justice and the relationship between human unity and diversity.

This book summary and analysis was created for individuals who want to extract the essential contents and are too busy to go through the full version. This book is not intended to replace the original book. Instead, we highly encourage you to buy the full version. The world is ending soon—or is it? Has progression truly become a far-fetched possibility for us? Steven Pinker, distinguished cognitive psychologist and author thinks otherwise. Indeed, the problems that we are facing today are becoming

more and more dreadful; but we have also conquered our primitive and ill-advised problem-solving approaches. In this book, Pinker stresses that Enlightenment's ideal of using science and reason over the impractical and perilous implications of excessively idealistic, religious and political beliefs has been instrumental in unlocking numerous advancements in economic growth, healthcare, food security, science and technology, safety and solidarity among nations. Backed by seventy-five comprehensive graphs, this book exhibits how intellectual reasoning and deduction, along with the significant improvements in technology, research and education, have proven that now is the best time to be alive. Check out Steven Pinker's *Enlightenment Now* and discover how its ideals are the key to continuously improving our lives.

**American Enlightenment** Independently Published  
Complete beginners can use this workbook for *Enlightenment Now: The Case for Reason, Science, Humanism, and Progress* by Steven Pinker and find immediate help in applying its major lessons. *Enlightenment Now*, Steven Pinker's newest book, offers a vast number of evidence and statistics that prove the beneficial results that the intellectual and philosophical movement called Enlightenment has caused in recent times. Pinker uses statistics and other evidence to prove his point of view, which states that positive aspects of people's lives are progressively improving while negative aspects are decreasing. Enlightenment has been acclaimed by Bill Gates as his favorite book and also became the number one bestseller of *The New York Times*. Enlightenment offers a great perspective that shows that the improvement of technology, education, and knowledge are results of scientific progress, which brings us closer to be an intelligent and humanistic society. Do you want to apply the major lessons to your daily life? The goal of this workbook is to help even the newest readers apply what may be the most critical lessons found in *Enlightenment Now: The Case for Reason, Science, Humanism, and Progress* by Steven Pinker. Results have shown that learning is retained best through repeated hands-on applications. With Max Help Workbooks, readers will be able to find distilled information categorized into major lessons with applicable exercise worksheets to maximize learning. Don't Miss the Following Content: - Succinct breakdown of the book categorized into major lessons - Read and use the exercises yourself or as a group - Easy-to-understand analysis of each lesson distilled for even the newest of readers - Simple and practical worksheets to further reader's application - Quiz questions as a resource to be used for yourself or others So, what are you waiting for? Get your copy now and take out a pencil, pen, or whatever digital technology to jot down, implement

**The Case for The Enlightenment** Goldmine Reads  
INSTANT NEW YORK TIMES BESTSELLER A NEW YORK TIMES NOTABLE BOOK OF 2018 ONE OF THE ECONOMIST'S BOOKS OF THE YEAR "My new favorite book of all time." --Bill Gates If you think the world is coming to an end, think again: people are living longer, healthier, freer, and happier lives, and while our problems are formidable, the solutions lie in the Enlightenment ideal of using reason and science. By the author of the new book, *Rationality*. Is the world really falling apart? Is the ideal of progress obsolete? In this elegant assessment of the human condition in the third millennium, cognitive scientist and public intellectual Steven Pinker urges us to step back from the gory headlines and prophecies of doom, which play to our psychological biases. Instead, follow the data: In seventy-five jaw-dropping graphs, Pinker shows that life, health, prosperity, safety, peace, knowledge, and happiness are on the rise, not just in the West, but worldwide. This progress is not the result of some cosmic force. It is a gift of the Enlightenment: the conviction that

reason and science can enhance human flourishing. Far from being a naïve hope, the Enlightenment, we now know, has worked. But more than ever, it needs a vigorous defense. The Enlightenment project swims against currents of human nature--tribalism, authoritarianism, demonization, magical thinking--which demagogues are all too willing to exploit. Many commentators, committed to political, religious, or romantic ideologies, fight a rearguard action against it. The result is a corrosive fatalism and a willingness to wreck the precious institutions of liberal democracy and global cooperation. With intellectual depth and literary flair, *Enlightenment Now* makes the case for reason, science, and humanism: the ideals we need to confront our problems and continue our progress.

**ENLIGHTENMENT NOW - Summarized for Busy People**  
Penguin

A provocative reassessment of the concept of an American golden age of European-born reason and intellectual curiosity in the years following the Revolutionary War The accepted myth of the "American Enlightenment" suggests that the rejection of monarchy and establishment of a new republic in the United States in the eighteenth century was the realization of utopian philosophies born in the intellectual salons of Europe and radiating outward to the New World. In this revelatory work, Stanford historian Caroline Winterer argues that a national mythology of a unitary, patriotic era of enlightenment in America was created during the Cold War to act as a shield against the threat of totalitarianism, and that Americans followed many paths toward political, religious, scientific, and artistic enlightenment in the 1700s that were influenced by European models in more complex ways than commonly thought. Winterer's book strips away our modern inventions of the American national past, exploring which of our ideas and ideals are truly rooted in the eighteenth century and which are inventions and mystifications of more recent times.

[Enlightenment Now](#) Penguin

Provides a panoramic account of the radical ways that life began to change for ordinary people in the age of Locke, Voltaire, and Rousseau. In this book, familiar Enlightenment figures share places with voices that have remained largely unheard until now, from freethinkers and freemasons to French materialists, anticlerical Catholics, pantheists, pornographers, readers, and travelers. Jacob reveals how this newly secular outlook was not a wholesale rejection of Christianity but rather a new mental space in which to encounter the world on its own terms. She takes readers from London and Amsterdam to Berlin, Vienna, Turin, and Naples, drawing on rare archival materials to show how ideas central to the emergence of secular democracy touched all facets of daily life. Jacob demonstrates how secular values and pursuits took hold of eighteenth-century Europe, spilled into the American colonies, and left their lasting imprint on the Western world for generations to come. --Adapted from publisher description.

[Summary of Enlightenment Now: the Case for Reason, Science, Humanism, and Progress by Steven Pinker](#) Cambridge University Press

\* Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. As you read this summary, you will learn that the Enlightenment, i.e. reason, science, humanism and progress, are more than ever current values. You will also learn : that in the Middle Ages, natural disasters were interpreted as signs of God's wrath; that the German philosopher Immanuel Kant is the most important theorist of the Enlightenment; that several members of the Trump administration were convinced of collusion with Russia; that Donald Trump is in favor of lifting the taboo on the use of nuclear weapons; that Donald Trump has publicly claimed that

Barack Obama was born in Kenya, while the latter was born in the United States; that science has freed mankind from terror and superstition. This book is one of the writings inspired by Donald Trump's presidency. In the face of the anti-progression rhetoric of the current U.S. president, the blood of Steven Pinker, a world-renowned scientist and academic, has done just one trick. He felt compelled to write a true summation, recapitulating the contribution of the Enlightenment to the world and to humanity, as well as the colossal progress made under its auspices. And this in all fields. If only to make lie all the skeptics who desperately cling to formulas from another age, from another time, which no enlightened person can want anymore. Yes, a thousand times yes, the Enlightenment and progress are still relevant in the 21st century. \*Buy now the summary of this book for the modest price of a cup of coffee!

*The Dream of Enlightenment: The Rise of Modern Philosophy*  
Independently Published

A public intellectual, author and cognitive scientist Steven Pinker writes an elegant assessment of the human race's condition during the third millennium in his book *Enlightenment Now: The Case for Reason, Science, Humanism, and Progress*. In this book, Pinker urges his readers to step back and look away from the gory news headlines that we see every day and the prophecies of doom that come with them. According to Pinker, this plays a big role in how we form our psychological biases. What he advises instead is to follow the data. In presenting the seventy-five jaw-dropping graphs, Steven Pinker showed that health, life, safety, prosperity, knowledge, peace, and happiness are actually on the rise. It's not only evident in the West, but also worldwide. Pinker notes that this progress is not a direct result of some cosmic force but it is actually a gift of the Enlightenment. He defines it as the conviction that science and reason actually enhance the flourishing of the human race. *Enlightenment Now* defends the case for science, reason, and humanism. These are the ideals that Pinker says we need to confront the problems we face and move forward in our progress. In this comprehensive look into *Enlightenment Now: The Case for Reason, Science, Humanism, and Progress* by Steven Pinker, you'll gain insight with this essential resource as a guide to aid your discussions. Be prepared to lead with the following: More than 60 "done-for-you" discussion prompts available Discussion aid which includes a wealth of information and prompts Overall brief plot synopsis and author biography as refreshers Thought-provoking questions made for deeper examinations Creative exercises to foster alternate "if this was you" discussions And more! Please Note: This is a companion guide based on the work *Enlightenment Now* by Steven Pinker not affiliated to the original work or author in any way and does not contain any text of the original work. Please purchase or read the original work first.

**Summary: Steven Pinker's Enlightenment Now: The Case for Reason, Science, Humanism, and Progress** Oxford University Press

It's no wonder that *The Power of Now* has sold over 16 million copies worldwide and has been translated into over 30 foreign languages. Much more than simple principles and platitudes, the book takes readers on an inspiring spiritual journey to find their true and deepest self and reach the ultimate in personal growth and spirituality: the discovery of truth and light. In the first chapter, Tolle introduces readers to enlightenment and its natural enemy, the mind. He awakens readers to their role as a creator of pain and shows them how to have a pain-free identity by living fully in the present. The journey is thrilling, and along the way, the author shows how to connect to the indestructible essence of our Being, "the eternal, ever-present One Life beyond the myriad forms of life that are subject to birth and death." Featuring a new

preface by the author, this paperback shows that only after regaining awareness of Being, liberated from Mind and intensely in the Now, is there Enlightenment.

*Summary and Analysis of Enlightenment Now* House of Anansi  
NOTE: This is a summary guide and is meant as a companion to, not a replacement for, the original book.

THE BOOK: *Enlightenment Now* (2018) offers a refreshingly optimistic take on the state of the world today. With reams of data, charts and graphs, Steven Pinker shows how much progress we've made since the eighteenth century, when the Age of Reason, otherwise known as the Enlightenment, shifted society away from centuries of rule by superstition and paranoia. ABOUT THE AUTHOR: Steven Pinker is a professor of cognitive science and linguistics at Harvard University. He is also a frequent contributor to the *New York Times* and the *Atlantic* and sits on the usage panel at The American Heritage Dictionary. Many of his books on popular science have been influential cultural touchstones, including *How the Mind Works* and *The Language Instinct*. INTRODUCTION: Think things are bad today? If you get all your information from the daily news, you just might think we're living in the worst times ever. But the reality is, we occupy a period in time that's better than any other. If you look at the rates of violence, famine and poverty, they're each at all-time lows, while life expectancy, overall wealth and happiness levels are at all-time highs. Sure, the environment needs our attention, but even here, the rates of pollution are down drastically from what they were just a few decades ago. So rather than panic and despair, you actually have every reason to believe that things may continue to improve, with more diseases becoming things of the past, and even less poverty and hunger in the world. How has all this been possible? Thank the Enlightenment, the movement that took us out of the Dark Ages and emphasized science, reason and humanism as the principles that might guide us to a better tomorrow. In this guide, you'll discover -just how far life expectancy has improved since the dark ages; -why the poor in England used to be forced to grind bones; and -why you shouldn't waste time worrying about artificial intelligence.

[Summary and Analysis of Enlightenment Now](#) Penguin

"With this profound and magnificent book, drawing on his deep reservoir of thought and expertise in the humanities, James MacGregor Burns takes us into the fire's center. As a 21st-century philosopher, he brings to vivid life the incandescent personalities and ideas that embody the best in Western civilization and shows us how understanding them is essential for anyone who would seek to decipher the complex problems and potentialities of the world we will live in tomorrow." --Michael Beschloss, *New York Times* bestselling author of *Presidential Courage: Brave Leaders and How They Changed America, 1789-1989* "James MacGregor Burns is a national treasure, and *Fire and Light* is the elegiac capstone to a career devoted to understanding the seminal ideas that made America - for better and for worse - what it is." --Joseph J. Ellis, Pulitzer Prize and National Book Award winning author *Revolutionary Summer* Pulitzer Prize-winning and bestselling historian James MacGregor Burns explores the most daring and transformational intellectual movement in history, the European and American Enlightenment In this engaging, provocative history, James MacGregor Burns brilliantly illuminates the two-hundred-year conflagration of the Enlightenment, when audacious questions and astonishing ideas tore across Europe and the New World, transforming thought, overturning governments, and inspiring visionary political experiments. *Fire and Light* brings to vivid life the galaxy of revolutionary leaders of thought and action who, armed with a new sense of human possibility, driven by a hunger for change, created the modern world. Burns discovers the origins of a distinctive American

Enlightenment in men like the Founding Fathers Benjamin Franklin, John Adams, Thomas Jefferson, and James Madison, and their early encounters with incendiary European ideas about liberty and equality. It was these thinker-activists who framed the United States as a grand and continuing experiment in Enlightenment principles. Today the same questions Enlightenment thinkers grappled with have taken on new urgency around the world: in the turmoil of the Arab Spring, in the former Soviet Union, and China, as well as in the United States itself. What should a nation be? What should citizens expect from their government? Who should lead and how can leadership be made both effective and accountable? What is happiness, and what can the state contribute to it? Burns's exploration of the ideals and arguments that formed the bedrock of our modern world shines a new light on these ever-important questions.

*The Enlightenment* Penguin

A TIMES BOOK OF THE YEAR 2021 'Punchy, funny and invigorating ... Pinker is the high priest of rationalism' Sunday Times 'If you've ever considered taking drugs to make yourself smarter, read Rationality instead. It's cheaper, more entertaining, and more effective' Jonathan Haidt, author of *The Righteous Mind* In the twenty-first century, humanity is reaching new heights of scientific understanding - and at the same time appears to be losing its mind. How can a species that discovered vaccines for Covid-19 in less than a year produce so much fake news, quack cures and conspiracy theorizing? In *Rationality*, Pinker rejects the cynical cliché that humans are simply an irrational species - cavemen out of time fatally cursed with biases, fallacies and illusions. After all, we discovered the laws of nature, lengthened and enriched our lives and set the benchmarks for rationality itself. Instead, he explains, we think in ways that suit the low-tech contexts in which we spend most of our lives, but fail to take advantage of the powerful tools of reasoning we have built up over millennia: logic, critical thinking, probability, causal inference, and decision-making under uncertainty. These tools are not a standard part of our educational curricula, and have never been presented clearly and entertainingly in a single book - until now. *Rationality* matters. It leads to better choices in our lives and in the public sphere, and is the ultimate driver of social justice and moral progress. Brimming with insight and humour, *Rationality* will enlighten, inspire and empower. 'A terrific book, much-needed for our time' Peter Singer

*The Secular Enlightenment* W. W. Norton & Company

Pinker's seminal research explores the workings of language and its connections to cognition, perception, social relationships, child development, human evolution, and theories of human nature. This eclectic collection spans Pinker's thirty-year career, exploring his favorite themes in greater depth and scientific detail. It includes thirteen of Pinker's classic articles, ranging over topics such as language development in children, mental imagery, the recognition of shapes, the computational architecture of the mind, the meaning and uses of verbs, the evolution of language and cognition, the nature-nurture debate, and the logic of innuendo and euphemism. Each outlines a major theory or takes up an argument with another prominent scholar, such as Stephen Jay Gould, Noam Chomsky, or Richard Dawkins. **The Better Angels of Our Nature** Oxford University Press, USA Sight, smell, hearing, taste, and touch—as they were celebrated during the Enlightenment and as they are perceived today. Blindfolding children from birth? Playing a piano made of live cats? Using tobacco to cure drowning? Wearing “flea”-colored clothes? These actions may seem odd to us, but in the eighteenth century, they made perfect sense. As often as we use our senses, we rarely stop to think about their place in history. But perception is not dependent on the body alone. Carolyn Purnell persuasively

shows that, while our bodies may not change dramatically, the way we think about the senses and put them to use has been rather different over the ages. Journeying through the past three hundred years, Purnell explores how people used their senses in ways that might shock us now. And perhaps more surprisingly, she shows how many of our own ways of life are a legacy of this earlier time. *The Sensational Past* focuses on the ways in which small, peculiar, and seemingly unimportant facts open up new ways of thinking about the past. You will explore the sensory worlds of the Enlightenment, learning how people in the past used their senses, understood their bodies, and experienced the rapidly shifting world around them. In this smart and witty work, Purnell reminds us of the value of daily life and the power of the smallest aspects of existence using culinary history, fashion, medicine, music, and many other aspects of Enlightenment life.

**The Sensational Past: How the Enlightenment Changed the Way We Use Our Senses** Oxford University Press, USA

Progress. It is one of the animating concepts of the modern era. From the Enlightenment onwards, the West has had an enduring belief that through the evolution of institutions, innovations, and ideas, the human condition is improving. This process is supposedly accelerating as new technologies, individual freedoms, and the spread of global norms empower individuals and societies around the world. But is progress inevitable? Its critics argue that human civilization has become different, not better, over the last two and a half centuries. What is seen as a breakthrough or innovation in one period becomes a setback or limitation in another. In short, progress is an ideology not a fact; a way of thinking about the world as opposed to a description of reality. In the seventeenth semi-annual Munk Debates, which was held in Toronto on November 6, 2015, pioneering cognitive scientist Steven Pinker and bestselling author Matt Ridley squared off against noted philosopher Alain de Botton and bestselling author Malcolm Gladwell to debate whether humankind's best days lie ahead.

*The Big Ratchet* Macmillan

If you've been feeling like the world has been getting worse off, that violence is on the rise, or that humanity has already "peaked" then this book will challenge everything you've been feeling. Delve deep into the world of data where Pinker presents rock-solid arguments for the betterment of humanity as a whole. Steven Pinker wants to prove that we are living in a world that is better off than it has ever been, and it will only continue to get better. In *Enlightenment Now*, Pinker argues that the best tools we have come from the 18th century ideals of reason, science, progress and humanism, and we can leverage them in very 21st century ways by using data to tell the story of our modern world. What does this ZIP Reads Summary Include? A synopsis of the original book An overview of the core tenets of Enlightenment thinking Detailed chapter-by-chapter breakdowns Key takeaways including major data points from Pinker's book A in-depth editorial review of the merits and shortcomings of the original title Editorial Review of the original book Short bio of Steven Pinker About the Original Book: *Enlightenment Now* is Steven Pinker's love letter to the Enlightenment. Knowledge, he argues, is our best tool against the traps set by atrophying political parties, salacious media, and theocratic social norms. With reason, science, and humanism—the foundational principles of the Enlightenment—and our modern ways of measuring progress by way of data, Pinker elegantly proves that the world is in a better place than it used to be, and things will only keep getting better so long as we stay committed to those principles that have served us and still do. **DISCLAIMER:** This book is intended as a companion to, not a replacement for, *Enlightenment Now: The Case for Reason, Science, Humanism, and Progress*. ZIP Reads is

wholly responsible for this content and is not associated with the original author in any way.

**The Sense of Style** BookSummaryGr

The late eighteenth century witnessed an explosion of intellectual activity in Scotland by such luminaries as David Hume, Adam Smith, Hugh Blair, William Robertson, Adam Ferguson, James Boswell, and Robert Burns. And the books written by these seminal thinkers made a significant mark during their time in almost every field of polite literature and higher learning throughout Britain, Europe, and the Americas. In this magisterial history, Richard B. Sher breaks new ground for our understanding of the Enlightenment and the forgotten role of publishing during that period. The Enlightenment and the Book seeks to remedy the common misperception that such classics as *The Wealth of Nations* and *The Life of Samuel Johnson* were written by authors who eyed their publishers as minor functionaries in their profession. To the contrary, Sher shows how the process of bookmaking during the late eighteenth-century involved a deeply complex partnership between authors and their publishers, one in which writers saw the book industry not only as pivotal in the dissemination of their ideas, but also as crucial to their dreams of fame and monetary gain. Similarly, Sher demonstrates that publishers were involved in the project of bookmaking in order to advance human knowledge as well as to accumulate profits. *The Enlightenment and the Book* explores this tension between creativity and commerce that still exists in scholarly publishing today. Lavishly illustrated and elegantly conceived, it will be must

reading for anyone interested in the history of the book or the production and diffusion of Enlightenment thought.

**Simple Sabotage Field Manual** University of Chicago Press

Explains what the mind is, how it evolved, and how it allows us to see, think, feel, laugh, interact, enjoy the arts, and ponder the mysteries of life.

**The Power of Now** Blurb

This New York Times bestseller is an exciting and fearless investigation of language from the author of *Rationality*, *The Better Angels of Our Nature* and *The Sense of Style* and *Enlightenment Now*. "Curious, inventive, fearless, naughty." --The New York Times Book Review Bestselling author Steven Pinker possesses that rare combination of scientific aptitude and verbal eloquence that enables him to provide lucid explanations of deep and powerful ideas. His previous books - including the Pulitzer Prize finalist *The Blank Slate* - have catapulted him into the limelight as one of today's most important popular science writers. In *The Stuff of Thought*, Pinker presents a fascinating look at how our words explain our nature. Considering scientific questions with examples from everyday life, *The Stuff of Thought* is a brilliantly crafted and highly readable work that will appeal to fans of everything from *The Selfish Gene* and *Blink* to *Eats, Shoots & Leaves*.
