The ninth book in the bestselling Chronicles of St Mary's series which follows a group of tea-soaked disaster magnets as they hurtle their way around History. If you love Jasper Fforde or Ben Aaronovitch, you won't be able to resist Jodi Taylor. They say you shouldn't push your luck. Max gives her own luck a massive shove every day - and it's only a matter of time until luck pushes back... January 1536 - the day of Henry VIII's infamous jousting accident. Historians

from St Mary's are there in force, recording and documenting. And, arguing - obviously. A chance meeting between Max and the Time Police leads to a plan of action. And, it's one that will have very serious consequences - especially for Max. Her private life is already more than a little rocky. But with Leon recovering and Matthew safe in the future there will never be a better opportunity to bring down Clive Ronan, once and for all. From Tudor England to the burning city of Persepolis - and from a medieval siege to a very nasty case of 19th century incarceration - Max is determined that this time, he will not escape. Readers love Jodi Taylor: 'Once in a

while, I discover an author who changes everything... Jodi Taylor and her protagonist Madeleine "Max" Maxwell have seduced me' 'A great mix of British properness and humour with a large dollop of historical fun'

'Addictive. I wish St Mary's was real and I was a part of it' 'Jodi Taylor has an imagination that gets me completely hooked' 'A tour de force'

New Perspectives on 2 Enoch HarperCollins UK
A bankrupt upper-class family rents a wonderful mansion for a ridiculously low price. The house belongs to Lord Listerdale, who has supposedly gone on a trip but no one knows where. Rupert, the son of Mrs. San Vicente, the tenant, believes that the man

is dead and that his body is hidden somewhere in the house. A series of coincidences will help the young man discover the mystery behind the former owner.

An Argumentation of Historians Star Collector

A brilliantly wide-ranging essay collection from the author of *My Struggle*, spanning literature, philosophy, art and how our daily and creative lives intertwine. In the *Land of the Cyclops* is Karl Ove Knausgaard's first collection of essays to be published in English, and these brilliant and wide-ranging pieces meditate on themes familiar from his groundbreaking fiction. Here, Knausgaard

discusses Madame Bovary, the Northern Lights, Ingmar Bergman, and the work of an array of writers and visual artists, including Knut Hamsun, Michel Houellebecq, Anselm Kiefer and Cindy Sherman. These essays beautifully capture Knausgaard's ability to mediate between the deeply personal and the universal, demonstrating his trademark self-scrutiny and his deep longing to authentically see, understand, and experience the world. 'Knausgaard is among the finest writers alive' New York Times *Empire of Ecstasy* Univ of California Press Suzanne Karr Schmidt's 'Interactive and Sculptural Printmaking in the Renaissance' tells the

story of a hands-on genre of prints: how innovative paper engineering redefined the relationship of early modern viewers to art, humanism, and science. Interactive and sculptural prints pervaded the European reading market of the sixteenth and seventeenth centuries. Single sheets and book illustrations featured movable flaps and dials, and functioned as kits to build three-dimensional scientific instruments. These hybrid constructions - part text, part image, and part sculpture - engaged readers; so did the polemical, satirical, and, occasionally, erotic content. By manipulating dials and flaps, or building and using the instruments, viewers learned to

think through images as well as words, interacting visually with desires, social critique, and knowledge itself.

The Frankfurt School philosopher Herbert Marcuse (1898–1979) studied with Martin Heidegger at Freiburg University from 1928 to 1932 and completed a dissertation on Hegel’s theory of historicity under Heidegger’s supervision. During these years, Marcuse wrote a number of provocative philosophical essays experimenting with the possibilities of Heideggerian Marxism. For a time he believed that Heidegger’s ideas

could revitalize Marxism, providing a dimension of experiential concreteness that was sorely lacking in the German Idealist tradition. Ultimately, two events deterred Marcuse from completing this program: the 1932 publication of Marx’s early economic and philosophical manuscripts, and Heidegger’s conversion to Nazism a year later. Heideggerian Marxism offers rich and fascinating testimony concerning the first attempt to fuse Marxism and existentialism. These essays offer invaluable insight concerning Marcuse’s early philosophical evolution. They document one of the century’s most important Marxist

philosophers attempting to respond to the “crisis of Marxism”: the failure of the European revolution coupled with the growing repression in the USSR. In response, Marcuse contrived an imaginative and original theoretical synthesis: “existential Marxism.”

Many of us are being misled. Claiming to know dark secrets about public officials, hidden causes of the current economic situation, and nefarious plans and plots, those who spread rumors know precisely what they are doing. And in the era of social media and the Internet, they know a lot about how to manipulate the mechanics of false

rumors—social cascades, group polarization, and biased assimilation. They also know that the presumed correctives—publishing balanced information, issuing corrections, and trusting the marketplace of ideas—do not always work. All of us are vulnerable. In On Rumors, Cass Sunstein uses examples from the real world and from behavioral studies to explain why certain rumors spread like wildfire, what their consequences are, and what we can do to avoid being misled. In a new afterword, he revisits his arguments in light of his time working in the Obama administration.

An argument that social, political, and economic systems maintain power by discarding certain people, places, and things. Discard studies is an emerging field that looks at waste and wasting broadly construed. Rather than focusing on waste and trash as the primary objects of study, discard studies looks at wider systems of waste and wasting to explore how some materials,

practices, regions, and people are valued or devalued, becoming dominant or disposable. In this book, Max Liboiron and Josh Lepawsky argue that social, political, and economic systems maintain power by discarding certain people, places, and things. They show how the theories and methods of discard studies can be applied in a variety of cases, many of which do not involve waste, trash, or pollution. Liboiron and Lepawsky consider the partiality of knowledge and offer a theory of scale, exploring the myth that most waste is municipal solid waste produced by consumers; discuss peripheries, centers, and power, using content moderation as an example of how

dominant systems find ways to discard; and use theories of difference to show that universalism, stereotypes, and inclusion all have politics of discard and even purification—as exemplified in “inclusive” efforts to broaden the Black Lives Matter movement. Finally, they develop a theory of change by considering “wasting well,” outlining techniques, methods, and propositions for a justice-oriented discard studies that keeps power in view.

A sweet little cat drives a man to insanity and murder.... The grim death known as the plague roams a masquerade ball dressed in red.... A dwarf seeks his final revenge on his captors.... A sister calls to her beloved twin from beyond the grave.... Prepare yourself. You are about to enter a world where you will be shocked, terrified, and, though you'll be too scared to admit it at first, secretly thrilled. Here are four tales -- The Black Cat, The Masque of the Red Death, Hop-Frog, and The Fall of

the House of Usher -- by the master of the macabre, Edgar Allan Poe. The original tales have been ever so slightly dismembered -- but, of course, Poe understood dismemberment very well. And he would shriek in ghoulish delight at Gris Grimly's gruesomely delectable illustrations that adorn every page. So prepare yourself. And keep the lights on.

Rath and Storm Brill's Studies in Intellectual "International interest in Holocaust education has reached new heights in recent years. This historic event has long been central to

cultures of remembrance in those countries where the genocide of the Jewish people occurred. But other parts of the world have now begun to recognize the history of the Holocaust as an effective means to teach about mass violence and to promote human rights and civic duty, testifying to the emergence of this pivotal historical event as a universal frame of reference. In this new, globalized context, how is the Holocaust represented and taught? How do teachers handle this excessively complex and emotionally loaded subject in fast-changing multicultural European societies still haunted by the crimes perpetrated by the Nazis and their

collaborators? Why and how is it taught in other areas of the world that have only little if any connection with the history of the Jewish people?

Holocaust Education in a Global Context will explore these questions."--page 10.

This book explores the role of the social and natural sciences in supporting the development of indigenous knowledge systems. It looks at how indigenous knowledge systems can impact on the transformation of knowledge generating institutions such as scientific and higher education institutions on the one hand, and the policy domain on the other.

Ernest Jones's three-volume *The Life and Work of Sigmund Freud* was first published in the mid-1950s. This edited and abridged volume omits the portions of the trilogy that dealt principally with the technical aspects of Freud's work and is designed for the lay reader. Jones portrays Freud's childhood and adolescence; the excitement and trials of his four-year engagement to Martha Bernays; his early experiments with hypnotism and cocaine; the slow rise of his reputation and constant battles against distortion and slander; the painful defections of close

associates; the years of international eminence; the onset of cancer and his stoicism in the face of an agonizing death. “One of the outstanding biographies of the age... It gives us an unmatched — and unretouched — portrait of Freud as a human being.” — The New York Times “The definitive life of Freud and one of the great biographies of our time... Charged with intellectual excitement, it is a chronicle of heroic struggle and adventurous discovery.” — The Atlantic “A landmark of literature, a remarkable appreciation of one of the remarkable spirits of the modern age.” — Scientific American “Superb drama... Dr. Jones has managed to

illuminate some obscure corners of Freud’s first years with a thoroughness that would have astonished, and might well have dismayed, the reticent and august Freud.” — The New Yorker “A masterpiece of contemporary biography... The letters are also a fascinating guide to the man. From them emerges suddenly a tough, jealous, ferocious figure.” — Time

 New Perspectives on 2 Enoch: No Longer Slavonic Only presents a collection of papers from the fifth conference of the Enoch Seminar. The conference re-examines 2 Enoch, an early Jewish apocalyptic text

previously known to scholars only in its Slavonic translation, in light of recently identified Coptic fragments. This approach helps to advance the understanding of many key issues of this enigmatic and less explored Enochic text. One of the important methodological lessons of the current volume lies in the recognition that the Adamic and Melchizedek traditions, the mediatorial currents which play an important role in the apocalypse, are central for understanding the symbolic universe of the text. The volume also contains the recently identified Coptic fragments of 2 Enoch, introduced to scholars for the first time during the conference.

Working with manuscripts has become a digital affair. But, are there downsides to digital photos? And how can you take advantage of the incredible computing power you have literally at your fingertips? Cornelis van Lit explains in detail

what happens when manuscript studies meets digital humanities. In *Among Digitized Manuscripts* you will learn why it is important to include a note on the photo quality in your codicological description, how to draw, collect, and publish glyphs of paleographic interest, what standards (such as TEI and IIIF) to abide by when transcribing a text, how to write custom software for image recognition, and much more. The leading principle is that learning a little about computers will already be of great benefit.
