Kaiser is the independent photographic tribute to the human body. We showcase an embodiment of culture through artistic, sensual and conceptual portraits of the female and male body. We stand against the rising wave of cultural censorship and social networks bigotry for more conscious enjoyment of the body shapes in any artist representation. We are based in the heart of Europe, while our photographers come from all over the world.

Since its first appearance in the study-edition of Rudolf Steiner's lecture-cycle *Eurythmy as Visible Speech* (Anastasi Ltd, 2005) this contribution "Eurythmy and the English Language" by Annelies Davidson has proved its value. Packed with useful observations, and above all, an examination of the living principles, this essay is recognised as the definitive introduction to an important area of eurythmy research and practice. The writer reflects on years of artistic exploration of the English language with Marguerite Lundgren and on her own extensive work. Marguerite Lundgren was a living example of how it is possible to develop an ear for the creative impulses available especially in music and the sounds of speech. Along with other authorities, mention is made here of Marguerite's respect for the sensitive scholarship of Adam Bittleston - particularly evident in the study of Shakespeare - and of the insights of the philosopher of language Owen Barfield. These scholars were profoundly aware of the work of the polymath and linguist Professor Hermann Beckh, who, as a foremost pupil of Rudolf Steiner, followed up Novalis' claim for "genetic etymology," for the creative sounds of speech. This Mystery wisdom goes back to the first known theory of language in Plato's dialogue *Cratylus*. Eurythmists attempt to access the primal creativity still available, as Steiner points out, in the language we speak today. In this way, in pursuing their art eurythmists aim to contribute to the renewal of the word in our time. ANNELIES DAVIDSON was born and educated in Holland. In 1974 she graduated from the London School of Eurythmy, England, taught around London and performed with the London Stage Group which toured Europe and the USA. From 1986-2002 she taught in the Eurythmy School, Spring Valley, New York and performed with the Ensemble. She currently works freelance as a teacher and director, focussing on eurythmy in relation to the spoken word.

In the face of killer storms, fires, piracy, and terrorism, container ships the length of city blocks and more than a dozen stories high carry 90 percent of the world's trade. This is an account of one ship's voyage and of the sailors who daily risk their lives to deliver six million containers a year to United States ports alone. Inside these twenty-foot and forty-foot steel boxes are the thousands of imports -- from chinos and Game Boys to garlic and frozen shrimp -- without which North America's consumer society would collapse. To explore this little-known and dangerous universe of modern seafaring, Richard Pollak joined the Colombo Bay in Hong Kong and over the next five weeks sailed with her and her 3,500 containers across the South China Sea, the Indian Ocean, the Mediterranean, and the Atlantic. En route, this mammoth vessel called at Singapore and Colombo, passed through the Suez Canal (toll: \$250,000), then put in at Malta and Halifax before tangling with Hurricane Karen on the two-day run to New York. Here is the story of the ship's unheralded twenty-four-man company; of the unflappable British captain, Peter Davies, a veteran of four decades at sea; of Federico Castrojas, who like the rest of the hard-working Filipino crew must daily confront the loneliness of being away from his family for nine months at a stretch; of Simon Westall, the twenty-one-year-old third mate, who reveals what it is like to be gay in the broad-shouldered world of the merchant service. It is a world where

pirates in the Malacca Strait sneak up behind ships at night in fast power boats, then clamber aboard and either rob the unarmed sailors at gunpoint and escape into the dark or throw the crew into the sea and hijack the ship, plundering her cargo and sometimes repainting her and setting out to do business under another name and flag. It is a world where families desperate to get to the United States or Europe pay thousands of dollars to the Chinese Snakeheads and other criminal gangs, who secrete these wretched migrants in stifling containers; after a week or more at sea these stowaways arrive in the Promised Land either starving or dead. Pollak sailed on September 13, 2001, into a changed world, on one of 7,000 container ships whose millions of uninspected boxes suddenly had become potential Trojan horses in which terrorists could transport weapons of mass destruction into the heart of the United States. Throughout his riveting narrative, Pollak interweaves the insights of Herman Melville and Joseph Conrad, whose masterful portrayals of seafaring make the voyage of the Colombo Bay a dramatic reminder of what a hard and rarely reported life merchant seamen have always led out on the "unhooped oceans of this planet."

"Once in a great while a popular scientific book opens a whole new field. *Plants, Man and Life* is such a book."—The New York Times What's the difference between wild and cultivated plants? Why has the study of cultivated plants been neglected, and why is so little known about the common plants that have endured since ancient times? This innovative ecological survey examines the long history of human and plant interactions. Author Edgar Anderson, a distinguished botanist, analyzes suggestive pieces of evidence in a reader-friendly narrative that recounts the origins and evolution of plant life with all the intrigue of a good detective story. In tracing the development of human influence on plant life, Anderson focuses particularly on crops, which he reveals as having started out as weeds--hybrids that sprang up from the dump heaps and gardens of early humans. His investigation of the tangled and continuing history of weeds and cultivated plants

ranges from autumnal European greens and the American sunflower to backyard landscapes in developing countries, where fruit trees, flowers, vines, and vegetables mingle with the sources for fibers, poisons, narcotics, and other drugs.

This classic text, the last major work by the great Hebrew Bible scholar Gerhard von Rad, has long been unavailable in North America. It is now being reissued in paperback form to satisfy the continuing demand for copies of the book. In brief, the subject of von Rad's study of Hebrew wisdom is Israel's willingness to ground faith in encounter with the world as the creation of God. Those familiar with the author's Old Testament Theology will recall how he identified two great watersheds in the history of Israel's thought. The first was the rise of the prophetic movement, which occasioned a radical reinterpretation of Israel's religious traditions as expressed in the earliest creedal formulations found in the Pentateuch. The second watershed, which preceded the prophetic movement and was a basically different assessment of Israel's relation to Yahweh, was achieved by wisdom teachers at the start of the monarchy. This book studies this first and somewhat novel break with Israel's older sacral traditions. Von Rad bases the study on a wide range of literary materials principally concerned with the books of Proverbs, Job, Ecclesiastes, and the Wisdom of Ben Sirach. "No finer introduction to the fundamental theological questions raised by the wisdom literature of Israel is available." *Theology Today* Gerhard von Rad was for many years Professor of Old Testament at the University of Heidelberg.

Steep verdant rice terraces, ancient rainforest and fire-breathing volcanoes create the landscape of the world's largest archipelago. Indonesia is a travellers' paradise, with cuisine as vibrant and thrilling as its scenery. For these are the original spice islands, whose fertile volcanic soil grows ingredients that once changed the flavour of food across the world. On today's noisy streets, chilli-spiked sambals are served with rich noodle broths, and salty peanut sauce sweetens chargrilled sate sticks. In homes, shared feasts of creamy coconut curries, stir-fries and spiced rice are fragrant with ginger, tamarind, lemongrass and lime. The air hangs with the tang of chilli and burnt sugar, citrus and spice. Eleanor Ford gives a personal, intimate portrait of a country and its cooking, the recipes exotic yet achievable, and the food brought to life by stunning photography.

Seeds in the Wind tells about Rick Wienecke's journey into the suffering of the Jewish people in the Holocaust and the crucifixion of Jesus. In the mid 1970's, Rick's life style leads him into a place of desperation where he begins searching for God. Rick becomes fascinated with the birthing of Israel as a nation only three years after the Holocaust. While working on a Kibbutz for six months, the Lord attaches Rick to the Jewish people, the Land of Israel and to the Jewish Messiah Jesus. Rick's God-given language through sculpting grows and develops alongside these other points of relationship. After their marriage, Rick and Dafna learn to step out in faith and eventually obey the 'Heavenly

Commission' of creating the "Fountain of Tears". This 'dialogue of suffering' between the Holocaust and the Crucifixion is in Arad and soon will be also in Auschwitz-Birkenau. Seeds in the Wind is the story of how God uses a talented artist to share the message of the Father's heart to His people.

This is the fascinating story of a group of reformers who tried to go too fast, bungled their reform, and so changed the course of history. Hengel's thesis is that Hellenistic influences were, and had been for centuries, smoothly penetrating Judaism even in Jerusalem; there was respect on both sides between Jew and Greek. Then the Greek party tried to go too fast, make Hellenization obligatory and outlaw the Law. This occasioned a furious defensive reaction; Judaism clammed up, became xenophobic and rigoristic, producing the attitude which in its turn created the defensive reaction of anti-Semitism which has stained so many centuries. The defensive rigidity set up in Judaism made it unable to respond to Jesus' creative reinterpretation of the Law, and so led to the rejection of Christianity. This is a truly important scholarly work. The exhaustive collection of evidence will make it a fundamental textbook for the period' (The Tablet). 'A foundation book and essential as a source book and as a guide to trends in present research' (The Expository Times). Martin Hengel was Professor of New Testament and Early Judaism in the University of Tübingen. *Wisdom in Israel*
