Living on a damaged planet challenges who we are and where we live. This timely anthology calls on twenty eminent humanists and scientists to revitalize curiosity, observation, and transdisciplinary conversation about life on earth. As human-induced environmental change threatens multispecies livability, *Arts of Living on a Damaged Planet* puts forward a bold proposal: entangled histories, situated narratives, and thick descriptions offer urgent "arts of living." Included are essays by scholars in anthropology, ecology, science studies, art, literature, and bioinformatics who posit critical and creative tools for collaborative survival in a more-than-human Anthropocene. The essays are organized around two key figures that also serve as the publication's two openings: Ghosts, or landscapes haunted by the violences of modernity; and Monsters, or interspecies and intraspecies sociality. Ghosts and Monsters are tentacular, windy, and arboreal arts that invite readers to encounter ants, lichen, rocks, electrons, flying foxes, salmon, chestnut trees, mud volcanoes, border zones, graves, radioactive waste—in short, the wonders and terrors of an unintended epoch.

Schelling is often thought to be a protean thinker whose work is difficult to approach or interpret. Devin Zane Shaw shows that the philosophy of art is the guiding thread to understanding Schelling's philosophical development from his early works in 1795-1796 through his theological turn in 1809-1810. Schelling's philosophy of art is the 'keystone' of the system; it unifies his idea of freedom and his philosophy of nature. Schelling's idea of freedom is developed through a critique of the formalism of Kant's and Fichte's practical philosophies, and his nature-philosophy is developed to show how subjectivity and objectivity emerge from a common source in nature. The philosophy of art plays a dual role in the system. First, Schelling argues that artistic activity produces through the artwork a sensible realization of the ideas of philosophy. Second, he argues that artistic production creates the possibility of a new mythology that can overcome the socio-political divisions that structure the relationships between individuals and society. Shaw's careful analysis shows how art, for Schelling, is the highest expression of human freedom.

A philosopher makes the case for thinking of works of art as tools for investigating ourselves In his new book, *Strange Tools: Art and Human Nature*, the philosopher and cognitive scientist Alva Noë raises a number of profound questions: What is art? Why do we value art as we do? What does art reveal about our nature? Drawing on philosophy, art history, and cognitive science, and making provocative use of examples from all three of these fields, Noë offers new answers to such questions. He also shows why recent efforts to frame questions about art in terms of neuroscience and evolutionary biology alone have been and will continue to be unsuccessful.

We all know what "the political landscape" is, and politicians and journalists never tire of referring to it. But in this ingenious and original book, Martin Warnke takes that well-worn metaphor literally and uses it to reveal just how politicized the real landscape of continental Europe has been for centuries. The author finds his evidence of humanity's intervention in nature in the form of monuments and

milestones, gardens, roads and border crossings, in landscape paintings and maps – even, in fact, in the anthropomorphic interpretations once given to formations of hills and rocks. The Political Landscape is underpinned with a fascinating array of examples and illustrations, many of which will be new even to experts in the art of landscape and related disciplines.

Arts of Living on a Damaged Planet Echo Point Books & Media, LLC

Our story opens with a cat stuck in a tree, an ordinary-enough occurrence. Fletcher the cat, having run up the tree in a moment of thoughtless abandon, cannot get back down. Then strange things begin to happen: Fletcher finds in his tree a steamer trunk full of hats, and among the hats a papier-mâché egg that opens to reveal Zenobia, a worldly talking doll who was locked in the egg by an unfeeling child named Mabel. To cheer each other up, Fletcher and Zenobia decide to throw a party, complete with cake, peach ice cream, and punch from a silver punch bowl. The hats come in handy, and a moth, drawn to the festivities, soon becomes the vehicle of an unexpected escape plan. A story of metamorphosis and friendship, like *The Owl and the Pussycat* crossed with *Alice in Wonderland*, Fletcher and Zenobia is a wildly imaginative tale of wish fulfillment and freedom. At once silly and zany, it is not without a certain delicacy of feeling that older children, and adults, will also appreciate.
