*Diabetes mellitus:
Fußfibel.* Wiley-Blackwell
"When essential oils are
put in a lamp, inhaled,
applied to the skin, placed
in bathwater, or even
taken orally, a person can
feel relaxed, energized, or
uplifted. In this beautifully
illustrated book, a holistic
practitioner describes the

history and physiological
basis of aromatherapy,
tells how to extract and
store the oils, and gives
detailed information on 27
of the most important
essential oils, including
their dosages and
beneficial effects."--

In its brief but vigorous
history, gerontology has

spawned a broadening
range of specializations.
One of the newest of such
specializations is narrative
gerontology, so named for
its emphasis on the
biographical, or inside,
dimensions of the
experience of aging.
Telling stories about our
world, our relationships,
and ourselves is
fundamental to how we
make meaning.
Everything from our
history to our religion and
our memories to our

emotions is linked to the tales we tell ourselves, and others, about where we have come from and where we are going. They are central to who we are. The biographical side of human life is every bit as critical to fathom as the biological side, if we seek a more balanced, positive, and optimistic perspective on what aging is about; if we would honor the dignity and complexity, the humanity and uniqueness of the lives of older persons, no matter what their health or economic standing. In this

respect, a narrative approach is particularly suited to the exploration of such topics as meaning, spirituality, and wisdom, and the connections they share. This volume reflects a selection of new directions and insights, and constitutes a general broadening and deepening of narrative gerontology, exploring its implications for theory and research in the field of aging, and for the quality of life of older adults themselves. Such deepening indicates a

greater refinement of thought, method, and intervention. The evolution of narrative gerontology is also evidenced by a significant increase in the number of faculty and graduate students engaged in research in this area, as well as by increasing collaboration among researchers, practitioners, and administrators in applying narrative insights to contexts such as long term care - indeed, healthcare in general. These initiatives have given rise to the

phrase, "narrative care as core care".

Complete Aromatherapy Handbook

Barbara Gordon's groundbreaking memoir tells the extraordinary story of a woman who has it all, or thinks she does—a career as an Emmy-award-winning documentary producer, a man she loves, a world of friends, and a beautiful apartment in Manhattan. But beneath the façade, Barbara's life is spinning out of control. In spite of the pills

prescribed by her doctor, a nameless terror disrupting her daily life intensifies until she is besieged by crippling anxiety attacks. A formerly strong, independent, successful woman, Barbara's life becomes a nightmare of paralysis and fear. When Barbara finds herself unable to leave her apartment or walk the streets of New York alone, she decides to take charge of her life. She doesn't want pills, she wants answers. Instead of ending her fears, quitting

the medicine leads to the unraveling of what she thought was her perfect life, and Barbara becomes a casualty of a flawed and inept mental health system. Barbara had often spoken for the voiceless in her films, but she suddenly finds herself powerless, without a voice of her own. Though she feels frightened and misunderstood, the tenderness and love of another young patient, Jim, helps Barbara rediscover her voice and her identity. In the years since her memoir was first

published, thousands of readers all over the world have read her book, followed her descent into hell, traveled with her along the bumpy road to recovery, and celebrated as she creates a new life. I'm Dancing As Fast As I

Can is a strikingly honest look at a life gone off the rails. Throughout her journey, Gordon's hope and strength make her an incredible heroine worth rooting for.
