An Introduction to Regional Economics

Cambridge University Press

An East Asian Renaissance, by a World Bank team led by Chief Economist for East Asia & Pacific, Dr Homi Kharas and Economic Adviser, Dr Indermit Gill is the first comprehensive analysis of the new forces and challenges at play in the region since the Bank's seminal report of 1993, The East Asian Miracle. The report argues that regional flows of goods, finance and technology are helping even smaller East Asian countries reap the benefits of economies of scale and that this regional integration must be encouraged. But it also points out that these measures have to be supported by actions at the domestic level to ease the stresses and strains that rapid economic growth leaves in its wake. East Asia must now turn to the urgent domestic challenges of inequality, social cohesion, corruption and environmental degradation arising from its economic success.

This volume offers an original perspective on the questions the great economists have asked and looks at their significance for today's world. Written in a provocative and accessible style, it examines how the diverse traditions of political economy have conceptualised economic issues, events and theory. Going beyond the orthodoxies of mainstream economics it shows the relevance of political economy to the debates on the economic meaning of our times. Reconstructing Political Economy is a timely and thought-provoking contribution to a political

economy for our time. In this light it offers fresh insights into such issues as modern theories of growth, the historic relations between state and market and the significance of globalisation for modern societies.

TIP 35: Enhancing Motivation for Change in Substance Use Disorder Treatment (Updated 2019) Taylor & Francis

This work is a comprehensive collection of cutting-edge scholarship on the economic, international business, political, legal, and environmental ramifications of globalization--one of the hottest topics of the day. International trade is as old as nations. During the last five decades, however, advances in technology and transportation have changed the scope and method of international trade. Disputes rage about the effects of these changes; advocates for different positions offer argument, but little factual or theoretical analysis. Globalization offers all the information readers need to sort out the arguments. Written with the highest degree of scholarship, intended for college students or working professionals, the encyclopedia provides both introductory material to broad economic, legal, political, and environmental theory, and in-depth analysis of how theory interacts with practice in the framework of global trade. A trader in New York can, in a matter of seconds, execute a billion-dollar currency transaction in Hong Kong. What does this transaction mean to New Yorkers, to residents of Hong Kong, and to the rest of the world? This book gives readers the tools to answer those questions. 100 A-Z entries

covering the major issues of globalization Reproduces the founding documents for the World Trade Organization and other international trade organizations Maps of trade blocs and regional organizations such as the European Union, Association of Southeast Asian Nations (ASEAN), and Mercado Común del Sur (MERCOSUR) Charts, figures, and graphs illustrating data trends and statistical information Includes contributions from more than 100 specialists in economics, law, business, and other applicable fields

The book aims to analyse and evaluate the strategic positioning of China's participation in terms of firm-level performance in the generation of infrastructure capacity in African countries. Africa counts among its development challenges a major bottleneck of infrastructure capacity and shortage of investable capital. China's long period of high growth generates the strengths to secure availability of energy from Africa by enhancing infrastructure provision for the region. To achieve this complementary macro-level development, beyond the traditional dimension of infrastructure provision (ODA), Chinese IMNEs become the vital players on the intersection of these processes. Thus this research makes practical and analytical contributions to international business studies and development issues by making concrete the analysis of bilateral development processes from a macro context to a micro level framework (e.g. focusing on ICT and construction sectors), then fitting this into the real world story. Infrastructure itself is a key element for potential investment and development processes. Therefore, how IMNEs achieve not only exist simply in a way of

a commercial-oriented investment, but also in their implications for development and political related issues.

The Great Divide in Economic Thought Routledge

There is growing dissatisfaction with the economic policies advocated by the IMF and other international financial institutions - policies that have often resulted in stagnating growth, crises, and recessions for client countries. This book presents an alternative to "Washington Consensus" neo-liberal economic policies by showing that both macro-economic and liberalization policy must be sensitive to the particular circumstances of developing countries. One-size-fits-all policy prescriptions are likely to fail given the vast differences between countries. This book discusses how alternative approaches to economic policy can better serve developing countries both in ordinary times and in times of crisis.

Housing: The Essential Foundations The Hamilton Project

One-in-seven adults and one-in-five children in the United States live in poverty. Individuals and families living in poverty not only lack basic, material necessities, but they are also disproportionately afflicted by many social and economic challenges. Some of these challenges include the increased possibility of an unstable home situation, inadequate education opportunities at all levels, and a high chance of crime and victimization. Given this growing social, economic, and political concern, The Hamilton Project at Brookings asked academic experts to develop policy proposals confronting the various challenges of America's poorest citizens, and to introduce innovative approaches to addressing

poverty. When combined, the scope and impact of these proposals has the potential to vastly improve the lives of the poor. The resulting 14 policy memos are included in The Hamilton Project's Policies to Address Poverty in America. The main areas of focus include promoting early childhood development, supporting disadvantaged youth, building worker skills, and improving safety net and work support.

Sustainable Development and Governance in the Age of Extremes
Routledge

Economics for Business and Management is a concise introductory economics textbook which meets the needs of business studies and management students. The text focuses upon microeconomics, which accurately reflects the concerns of management students. The macroeconomics focuses on business cycles and the macroeconomic factors which affect firms (such as inflation and employment), and the balance of payments and exchange rates.

Throughout the text there are case studies and examples which place economics within a business context.

Against the backdrop of growing anti-globalisation sentiments and increasing fragmentation of the production process across countries, this book addresses how the Indonesian economy should respond and how Indonesia should shape

its trade and industrial policies in this new world trade environment. The book introduces evaluation not on tariffs but on new trade instruments such as non-tariff measures (SPS, TBT, export measures and beyond border measures), and looks at industrial policies from a broader perspective such as investment, accessing inputs, labour, services, research and innovation policies.

Construction Economics provides students with the principles and concepts underlying the relationship between economic theory and the construction industry. The New Approach adopts an argument that economics is central to government initiatives concerning sustainable construction. This edition has been revised to explain the effects of the current economic crisis on the construction industry. In addition, sections relating to less developed countries, the economics of sustainable development and theories relating to a firm's bid strategy have all been rewritten. With new data, examples, initiatives, readings, glossary items and references, the third edition of this established core text builds on the strengths of the previous edition: a clear and user-friendly style use of a second colour to highlight important definitions and formulae regular summaries of key points a glossary of key terms extensive

use of tables and figures extracts from the academic journal Construction Management and Economics to consolidate and prompt discussion reviews of useful websites This invaluable textbook is essential reading across a wide range of disciplines from construction management and civil engineering to architecture, property and surveying.

First published in 1981, Professor Mishan's Economic Efficiency and Social Welfare: Selected Essays on Fundamental Aspects of the Economic Theory of Social Welfare is a collection of 22 pioneering essays written while the author was teaching at the London School of Economics and chosen to indicate landmarks in the development of his own thought. Professor Mishan, who also enjoys an international reputation as a popular writer on the impact of modern economic growth on social welfare, is among the foremost authorities in the field of resource allocation, and his influence in his subject area has been profound. Mishan's essays, while generally accessible to the layman due to the author's lucidity, his economy in the use of mathematical notation and his concern with perspective, are invaluable reading for the economics undergraduate. The essays are particularly relevant to upper level students of project appraisal, welfare economics and cost benefit analysis requiring a coherent survey of their field of study.
