A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated *Architecture: Form, Space, and Order* has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment. Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, *Architecture: Form, Space, and Order* encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

A sequel to her widely used A Companion to Familia Romana (now in its second edition), Jeanne Marie Neumann's A Companion to Roma Aeterna offers a running commentary, in English, of the Latin grammar covered in Hans H. Ørberg's Roma Aeterna, and includes the complete text of the Ørberg ancillaries Grammatica Latina and Latin-English Vocabulary II. It also serves as a substitute for Ørberg's Instructions, on which it is based. Though designed especially for those approaching Roma Aeterna at an accelerated pace, this volume will be useful to anyone seeking an explicit exposition of that volume's implicitly presented grammar. In addition to many revisions of the text, A Companion to Roma Aeterna also includes new units on cultural context, tied to the narrative content of the chapter.

La obra presenta novedades importantes respecto al tratamiento clásico del tema. Así, en el capítulo cinco, además de los métodos combinatorios clásicos, los Grafos eulerianos y los Grafos coloreados, se presenta una introducción a la teoría de las funciones recursivas, funciones que tienen gran importancia en Computación. En el capítulo seis hay una introducción rigurosa al estudio de las máquinas y autómatas finitos, de importancia hoy en Informática Teórica y Computación. En el capítulo siete se desarrolla con cierta extensión la teoría de Ramsey, que puede considerarse una de las partes más interesantes del análisis combinatorio no elemental y que tiene aplicaciones en la teoría de grafos coloreados.

The product of five years' investigative reporting, the subject of intense national controversy, and the source of death threats that forced the National Human Rights Commission to assign two full-

time bodyguards to its author, Anabel Hernández, Narcoland has been a publishing and political sensation in Mexico. The definitive history of the drug cartels, Narcoland takes readers to the front lines of the “war on drugs,” which has so far cost more than 60,000 lives in just six years. Hernández explains in riveting detail how Mexico became a base for the mega-cartels of Latin America and one of the most violent places on the planet. At every turn, Hernández names names – not just the narcos, but also the politicians, functionaries, judges and entrepreneurs who have collaborated with them. In doing so, she reveals the mind-boggling depth of corruption in Mexico’s government and business elite. Hernández became a journalist after her father was kidnapped and killed and the police refused to investigate without a bribe. She gained national prominence in 2001 with her exposure of excess and misconduct at the presidential palace, and previous books have focused on criminality at the summit of power, under presidents Vicente Fox and Felipe Calderón. In awarding Hernández the 2012 Golden Pen of Freedom, the World Association of Newspapers and News Publishers noted, “Mexico has become one of the most dangerous countries in the world for journalists, with violence and impunity remaining major challenges in terms of press freedom. In making this award, we recognize the strong stance Ms. Hernández has taken, at great personal risk, against drug cartels.”
