BEHAVIOR OF MARINE FISHES BEHAVIOR OF MARINE FISHES:
 Capture Processes and Conservation Challenges Understanding
 fish behavior in relation to capture processes in marine fisheries is
 of fundamental importance to reducing bycatch and discards, and
 to enhancing marine fisheries conservation efforts. A thorough
 understanding of this allows commercial fishers to more
 effectively capture target species while reducing the catch of
 unwanted species. Behavior of Marine Fishes: Capture Processes
 and Conservation Challenges provides the reader with principles,
 patterns, and characteristics on fish behavior and fish capture
 processes using several types of important commercial fishing
 gears. The book also highlights conservation challenges facing
 the marine capture fisheries in efforts to maintain sustainable use
 of marine resources and to reduce negative impacts to the marine
 ecosystem. This volume, with contributions from leading applied
 fish behaviorists and fishing gear technologists from around the
 world, will be a valuable reference for researchers, fishing gear
 technologists, fisheries managers, students, and conservationists.
SPECIAL FEATURES: Synthesis of current research and valuable

 Get submerged in the amazing world of sharks! Your expert host,
 award-winning marine biologist Dr. David Shiffman, will show you
 how—and why—we should protect these mysterious,
 misunderstood guardians of the ocean. Sharks are some of the
 most fascinating, most ecologically important, most threatened,
 and most misunderstood animals on Earth. More often feared
 than revered, their role as predators of the deep have earned
 them a reputation as a major threat to humans. But the truth is
 that sharks are not a danger to us—they're in danger from us. In
 Why Sharks Matter, marine conservation biologist Dr. David
 Shiffman explains why it's crucial that we overcome our
 misconceptions and rise above cinematic jump scares to embrace
 sharks as the imperiled and elegant ocean guardians they really
 are. Sharing his own fascinating experiences working with sharks,
 Shiffman tells us • why healthy shark populations are a must for
 supporting ocean ecosystems—and the coastal economies that
 depend on them • why we're in danger of losing many shark
 species forever • what scientists, conservationists, and readers

can do to help save these iconic predators • why so much of what
 you've heard about sharks and how to save them is wrong
 Exploring the core tenets of shark conservation science and
 policy, Shiffman synthesizes decades of scientific research and
 policymaking, weaving it into a narrative full of humor and
 adventure. Touching on everything from Shark Week to shark fin
 soup, overfishing to marine sanctuaries, Shiffman reveals why
 sharks are in trouble, why we should care, and how we can save
 them. Perfect for shark enthusiasts, Why Sharks Matter is an
 approachable, informative guide to the world of shark
 conservation and the passionate, fascinating, brilliant people who
 work to understand and protect our oceans. This fun read will
 have you looking at sharks with a fresh perspective and an
 understanding that the survival of sharks is crucial to the survival
 of another apex predator—ourselves.

Soldier King of Life Montlake Romance

Thomas Chandler is a criminal attorney and independent Harley
 rider; Earle Hastings is an outlaw biker, Harley mechanic, and
 president of the Vermont chapter of the Skuldmen Motorcycle
 Club, one of the most notorious outlaw 1%er motorcycle clubs in
 North America. Despite being from different worlds, the two men
 are the best of friends. While test riding the attorney's Harley,
 Earle overhears a conversation between three men of Eastern
 European descent, discussing a bombing they are planning. When
 the horror the world comes to know as the Boston Marathon
 Bombing occurs, Earle makes a connection to the event that
 shakes him to the core. After Earle is hunted down and shot by
 one of the terrorists, Thomas goes on a quest for revenge with
 guidance from two federal law enforcement agents. Enlisting
 several chapters of Skuldmen in New England to assist him in
 locating the third Boston bomber, the lawyer is conflicted as he
 straddles a fine line between the two worlds he lives in, and the
 choices he must make when it comes to moral justice, or biker
 justice.

A Card Shark's World AuthorHouse

A group of traders huddles around a pile of dried shark fins on a
 gleaming white floor in Hong Kong. A Papua New Guinean elder
 shoves off in his hand-carved canoe, ready to summon a shark
 with ancient magic. A scientist finds a rare shark in Indonesia and

forges a deal with villagers so it and other species can survive. In
 this eye-opening adventure that spans the globe, Juliet Eilperin
 investigates the fascinating ways different individuals and
 cultures relate to the ocean's top predator. Along the way, she
 reminds us why, after millions of years, sharks remain among
 nature's most awe-inspiring creatures. From Belize to South
 Africa, from Shanghai to Bimini, we see that sharks are still the
 object of an obsession that may eventually lead to their
 extinction. This is why movie stars and professional athletes go
 shark hunting in Miami and why shark's fin soup remains a
 coveted status symbol in China. Yet we also see glimpses of how
 people and sharks can exist alongside one another: surfers
 tolerating their presence off Cape Town and ecotourists swimming
 with sharks that locals in the Yucatán no longer have to hunt.
 With a reporter's instinct for a good story and a scientist's
 curiosity, Eilperin offers us an up-close understanding of these
 extraordinary, mysterious creatures in the most entertaining and
 illuminating shark encounter you're likely to find outside a steel
 cage.

The World of Kinsmen Family is everything. Talent is power. And
 revenge is sweet. In a distant, future world Kinsmen -- small
 powerful groups of genetically and technologically advanced
 families -- control vast financial empires. They are their own
 country, their own rulers, and their only limits are other Kinsmen.
 The struggle for power is a bloody, full-contact sport: in business,
 on the battlefield ... and sometimes in the bedroom. Claire
 Shannon is a killer ... and her weapon is her mind. Born on a
 planet torn by war for over 300 years, Claire is a soldier: a
 psyker, with the ability to read, control, and destroy the minds of
 enemy psychers and to infiltrate the biological network where
 they battle to death. When Claire's faction loses the war, she
 barely escapes extermination from both sides, as her talent
 brands her as too dangerous to society. By so-deeply burying her
 ability that she avoids detection, Claire is instead deported to
 Rada as a refugee, where she must find work to remain. She finds
 a job as personal assistant to Venturo Escana, a premiere
 kinsman; one of Rada's most wealthy entrepreneurs -- and most
 powerful psychers. She thought she had left war behind, but now
 she must hide her skills and her growing feelings from Venturo ...
 and this battle might just cost her everything ...
