When Yvone Lenard returned to her native France and purchased

a house in a hilltop village of Provence, an enchanted world of food, wines, and unusual adventures—including chicken rustling, flirtatious advances from neighbors, and a séance—opened up before her. This is her

account of the spell cast on her by Provence, from her first morning's visit by a charming prince bearing a jug of the village's vin rose to the growth of her friendship with a duchess in the local chateau. Lenard shares tales of travels to St. Tropez and visits from American friends who find unexpected romance and magic in Provence. Told with verve, wit, and Lenard's deep understanding of the French language and culture, this memoir includes tales of others who have been drawn to the region, including Vincent van Gogh, Brigitte Bardot, and Princess Caroline of Monaco. Ways to re-create the magic of the region's sensuous way of life include recipes

for food and drinks, as well as tips for entertaining in the Provençal style. *Studies on Discourse, Power, and History* Walter de Gruyter World War I created a set of forces that affected the political arrangements and economies of all the countries involved. This period in global economic history between World War I and II offers rich material for studying international monetary and sovereign debt policies. *Debt and Entanglements between the Wars* focuses on the experiences of the United States, United Kingdom, four countries in the British Commonwealth (Australia, New Zealand, Canada, Newfoundland),

France, Italy, Germany, and Japan, offering unique insights into how political and economic interests influenced alliances, defaults, and the unwinding of debts. The narratives presented show how the absence of effective international collaboration and resolution mechanisms inflicted damage on the global economy, with disastrous consequences.

"Sphinxes are legion in Egypt—what is so special about this one? . . . We shall take a stroll around the monument itself, scrutinizing its special features and analyzing the changes it experienced throughout its history. The evidence linked to

the statue will enable us to trace its evolution . . . down to the worship it received in the first centuries of our own era, when Egyptians, Greeks, and Romans mingled together in devotion to this colossus, illustrious witness to a past that was already more than two millennia old."—from the Introduction

The Great Sphinx of Giza is one of the few monuments from ancient Egypt familiar to nearly everyone. In a land where the colossal is part of the landscape, it still stands out, the largest known statue in Egypt. Originally constructed as the image of King Chephren, builder of the second of the Great Pyramids, the Sphinx later acquired new fame in the guise

of the sun god Harmakhis. Major construction efforts in the New Kingdom and Roman Period transformed the monument and its environs into an impressive place of pilgrimage, visited until the end of pagan antiquity. Christiane Zivie-Coche, a distinguished Egyptologist, surveys the long history of the Great Sphinx and discusses its original appearance, its functions and religious significance, its relation to the many other Egyptian sphinxes, and the various discoveries connected with it. From votive objects deposited by the faithful and inscriptions that testify to details of worship, she reconstructs the cult of

Harmakhis (in Egyptian, Har-em-akhet, or "Horus-in-the-horizon"), which arose around the monument in the second millennium. "We are faced," she writes, "with a religious phenomenon that is entirely original, though not unique: a theological reinterpretation turned an existing statue into the image of the god who had been invented on its basis." The coming of Christianity ended the Great Sphinx's religious role. The ever-present sand buried it, thus sparing it the fate that overtook the nearby pyramids, which were stripped of their stone by medieval builders. The monument remained untouched, covered by its desert blanket, until the first

excavations. Zivie-Coche details the archaeological activity aimed at clearing the Sphinx and, later, at preserving it from the corrosive effects of a rising water table.

As the visual representation of an essentially oral text, Sylvia Huot points out, the medieval

illuminated manuscript has a theatrical, performative quality. She perceives the tension between implied oral performance and real visual artifact as a fundamental aspect of thirteenth- and fourteenth-century poetics. In this generously illustrated volume, Huot examines manuscript texts both from the performance-oriented lyric tradition of *chanson courtoise*, or courtly love lyric, and from the self-consciously literary tradition of Old French narrative poetry. She demonstrates that the evolution of the lyrical romance and dit, narrative poems which incorporate thematic and rhetorical elements of the lyric, was responsible for a

progressive redefinition of lyric poetry as a written medium and the emergence of an explicitly written literary tradition uniting lyric and narrative poetics. Huot first investigates the nature of the vernacular book in the thirteenth and fourteenth centuries, analyzing organization, page layout, rubrication, and illumination in a series of manuscripts. She then describes the relationship between poetics and manuscript format in specific texts, including works by widely read medieval authors such as Guillaume de Lorris, Jean de Meun, and Guillaume de Machaut, as well as by lesser-known writers including Nicole de

Margival and Watriquet de Couvin. Huot focuses on the writers' characteristic modifications of lyric poetics; their use of writing and performance as theme; their treatment of the poet as singer or writer; and of the lady as implied reader or listener; and the ways in which these features of the text were elaborated by scribes and illuminators. Her readings reveal how medieval poets and book-makers conceived their common project, and how they distinguished their respective roles. [From Song to Book](#) Routledge Theatre: Art in Action teaches theater through hands-on performance-based exercises that have students assume the

roles of actor, director, designer, technician, producer, stage crew, publicist, etc., to gain an appreciation for and understanding of theater as an art form, today and through history. Written by Dr. Robert Taylor and Dr. Robert Strickland, *Theatre: Art in Action* is an award-winning theater text that from planning stage to center stage will prove the ideal high school theater resource.

 "... an important intervention in the conversation around social and ecological sustainability that draws on both micromarketing and macromarketing

scholarship to help the reader understand the challenges with illustrations from insightful cases both from emerging and developed economies. This compilation should be essential reading for the discerning student of sustainable consumption and production." -- Professor Pierre McDonagh, Associate Editor, *Journal of Macromarketing (USA)*; Professor of Critical Marketing & Society, University of Bath, UK
 Experts in the field of economics, management science, and particularly in the marketing domain have always been interested in and acknowledged the importance of sustaining profitable businesses while incorporating societal

and environmental concerns; however, the level of existing literature and availability of teaching cases reflect a dearth of real case studies, especially those focused on marketing for social good. This book of actual case studies will address that need. In addition, this book is important and timely in providing a case book for instructors (those in both industry and academia) to help them in teaching and training the next generation of leaders through corporate training and universities. Currently, marketing for social good is increasingly becoming a part of most curriculums under the umbrella of different titles, such as social marketing, green

marketing, and sustainability marketing. The relevance of these studies is increasing across the globe. This book is composed of long and short real cases with varying complexity in different sectors. This case book will also cover some review articles for an overview of the recent developments in the study area. With these case studies, collections of questions, teaching materials, and real-life marketing scenarios, this book offers a unique source of knowledge to marketing professionals, students, and educators across the world. The main objective of this case book is to understand the applicability of

marketing science (marketing for social good context, such as social marketing and sustainability marketing) in internet marketing related to e-buying behavior and e-WOM. In addition, it illustrates the various types of existing marketing practices that are relevant from both theoretical and practical points of view in this electronic era, as well as discussing other non-electronic marketing practices and focusing on consumer buying behavior. As a result, marketing managers can treat their customers according to their desired value. This book particularly explores the possibilities and advantages created by social marketing and sustainability

marketing through the presentation of thorough review articles and case studies. This case book helps corporate training centers and universities with compact teaching reference materials in their relevant courses.

The third edition of *Vis-À-vis* continues the excitement of the innovative second edition with a fully integrated and revised multimedia package and updated cultural information presented in the

“Correspondance” feature (chapter opening letter, postcard, or e-mail, which is answered in the mid-lesson “Correspondance” cultural spread) and in the new “Bienvenue dans le monde francophone” feature that recurs after every four chapters in the text. The overall goal of the revision remains the same as that of the second edition: to promote a balanced four-skills approach to learning French through a wide variety of listening, speaking, reading, and writing activities, while introducing students to the richness and diversity of the Francophone world. *French Industrialization in the Age of Revolution, 1750-1830*

The power of monarchs has traditionally been as much symbolic as actual, rooted in popular imagery of sovereignty, divinity, and authority. In *Mystifying the Monarch*, a distinguished group of contributors explores the changing nature of that imagery—and its political and social effects—in Europe from the Middle Ages to the present day. They demonstrate that, rather than a linear progression where perceptions of rulers moved inexorably from the sacred to the banal, in reality the history of monarchy

has been one of constant tension between mystification and demystification.

Credited with cofounding the movement with his Edwardian/Victorian themed albums, Paul Roland traces the

history of the genre, drawing on exclusive quotes from leading writers, artists, musicians, and filmmakers in the field. What began in the late 1980s as an underground community of science fiction and fantasy aficionados with a fetish for Victoriana now pervades almost every aspect of popular culture from music and movies to comics and computer games. Written by one of the godfathers of steampunk, this cultural history includes exclusive interviews with key figures including Cherie Priest, Mark Hodder, Kris Kuksi, Chaz Kemp, Professor Elemental, and Abney Park. This account demonstrates that steampunk is much

more than a retro-futuristic fashion statement or a subgenre of science fiction. On the surface its adherents profess a penchant for neo-Victorian fashion, fanciful clockwork accessories, and have a desire to live in an alternative reality inhabited by airships and eccentric inventions. But the literature, art, music, and movies of this burgeoning community offer a radical and irreverent reimagining of society the way it might have evolved had history taken a sharp detour prior to the industrial revolution giving us a world without electricity, the infernal (sic) combustion engine, and the technology that we take for granted today.

The world of steampunk as explored here is the elegant gas lit world of Jules Verne and H. G. Wells, of Michael Moorcock and their literary antecedents for whom the digital age never dawned.

This volume appears now finally in English, sixty years after the death of its author, Lucien Tesnière. It has been translated from the French original into German, Spanish, Italian, and Russian, and now at long last into English as well.

The volume contains a comprehensive approach to the syntax of natural languages, an approach that is foundational for an entire stream in the modern study of syntax and grammar. This stream is known today as dependency grammar (DG). Drawing examples from dozens of

languages, many of which he was proficient in, Tesnière presents insightful analyses of numerous phenomena of syntax. Among the highlights are the concepts of valency and head-initial vs. head-final languages. These concepts are now taken for granted by most modern theories of syntax, even by phrase structure grammars, which represent, in a sense, the opposite sort of approach to syntax from what Tesnière was advocating. For the first time in human history, the vast majority of the

world's population is connected through trade, travel, production, media and politics. Ours is an era of ubiquitous mobile communication, economic outsourcing, mass migration and imported consumer goods. At the same time, people everywhere are concerned to keep their identities rooted and sense of place in the face of momentous change. This new edition of Thomas Hylland Eriksen's concise and engaging landmark textbook outlines the main debates and controversies around globalization, and develops a unique perspective to show how globalization is an inherently double process, taking place both from above and

below. Each chapter is supported by boxed case studies and bullet points summarizing the core information, suggestions for further reading, and essay and discussion questions, making this the ideal guide for both the classroom and independent study. Focusing on key concepts of globalization and drawing on international examples, this book is essential for anyone wishing to understand the fundamental processes underlying the contemporary world and the consequences these have for all of us. *An Introduction to Literature, Criticism and Theory* McGraw-Hill Education Lively, original and highly readable, An Introduction to

Literature, Criticism and Theory is the essential guide to literary studies. Starting at 'The Beginning' and concluding with 'The End', chapters range from the familiar, such as 'Character', 'Narrative' and 'The Author', to the more unusual, such as 'Secrets', 'Pleasure' and 'Ghosts'. Now in its fifth edition, Bennett and Royle's classic textbook successfully illuminates complex ideas by engaging directly with literary works, so that a reading of Jane Eyre opens up ways of thinking about racial difference, for example, while Chaucer, Raymond Chandler and Monty Python are all invoked in a discussion of literature and laughter.

The fifth edition has been revised throughout and includes four new chapters - 'Feelings', 'Wounds', 'Body' and 'Love' - to incorporate exciting recent developments in literary studies. In addition to further reading sections at the end of each chapter, the book contains a comprehensive bibliography and a glossary of key literary terms. A breath of fresh air in a field that can often seem dry and dauntingly theoretical, this book will open the reader's eyes to the exhilarating possibilities of reading and studying literature.

Thinking French
Translation Amsterdam University Press
 An eclectic history of human curiosity, a

great feast of ideas, and a memoir of a reading life from an internationally celebrated reader and thinker Curiosity has been seen through the ages as the impulse that drives our knowledge forward and the temptation that leads us toward dangerous and forbidden waters. The question "Why?" has appeared under a multiplicity of guises and in vastly different contexts throughout the chapters of human history. Why does evil exist? What is beauty? How does language inform us? What defines our identity? What is our responsibility to the world? In Alberto Manguel's most personal book to date, the author tracks his own life of curiosity

through the reading that has mapped his way. Manguel chooses as his guides a selection of writers who sparked his imagination. He dedicates each chapter to a single thinker, scientist, artist, or other figure who demonstrated in a fresh way how to ask "Why?" Leading us

through a full gallery of inquisitives, among them Thomas Aquinas, David Hume, Lewis Carroll, Rachel Carson, Socrates, and, most importantly, Dante, Manguel affirms how deeply connected our curiosity is to the readings that most astonish us, and how essential to the soaring of our own imaginations.
