JOSIE BRYAN

Headache Clinics Verso
Books

This book posits a universal syntactic constraint (FPC) for code switching, using as its basis a study of different types of code-switching between French, Moroccan Arabic and Standard Arabic in a

language contact situation. After presenting the theoretical background and linguistic context under study, the author closely examines examples of syntactic constraints in the language of functional bilinguals switching between French and forms of Arabic, proposing that this hypothesis can also be applied in other comparable language contact and

translanguaging contexts worldwide. This book will be of interest to students and scholars of French, Arabic, theoretical linguistics, syntax and bilingualism.

The Syntax of Arabic and French Code Switching in Morocco

Universitätsverlag

Recent research into school effectiveness has corroborated the theory that the school leader

plays a pivotal role making their school a successful institution, and is most often cited as the key factor in a school's development. Reflecting the importance it is given in the today's education landscape, this book explores the latest trends in school leadership from both theoretical and practical perspectives. Each chapter provides insight into an aspect of current research, with detailed case studies coming from as far afield as Hong Kong and Canada. In the context of

the ever-increasing burden of responsibility placed on education management to safeguard and enhance the quality of education they provide, school leadership is now a core concern of policy makers. In addition, most countries are undertaking fundamental education reforms that will have a major influence on the nature of school leadership. Offering the most up-to-date research on this central issue, this book will both inform and shape the debate.
The World of Literacy

BRILL

This volume examines the implications and consequences of the idea of 'intangible heritage' to current international academic and policy debates about the meaning and nature of cultural heritage and the management processes developed to protect it. It provides an accessible account of the different ways in which intangible cultural heritage has been defined and managed in both national and international contexts, and aims to facilitate

international debate about the meaning, nature and value of not only intangible cultural heritage, but heritage more generally. Intangible Heritage fills a significant gap in the heritage literature available and represents a significant cross section of ideas and practices associated with intangible cultural heritage. The authors brought together for this volume represent some of the key academics and practitioners working in the area, and discuss research and practices

from a range of countries, including: Zimbabwe, Morocco, South Africa, Japan, Australia, United Kingdom, the Netherlands, USA, Brazil and Indonesia, and bring together a range of areas of expertise which include anthropology, law, heritage studies, archaeology, museum studies, folklore, architecture, Indigenous studies and history. Nursing Diagnosis Handbook Mosby
A reference to help nursing students and practising nurses select a

nursing diagnosis and write plans of care with ease and confidence. The book provides care plans for every NANDA diagnosis and provides a quick access index of appropriate nursing diagnoses for over 1200 clinical entities. *The Triptans* Springer Science & Business Media
The report describes the state of implementation of the Bologna Process in 2012 from various perspectives and with data ranging from 2010 to 2011 as well as with earlier trends data for

some statistical figures. --

Inequality in Education

vdf Hochschulverlag AG
Blockchain is widely
considered a new key
technology. The
Foundation for
Technology Assessment
(TA-SWISS) has proposed
a comprehensive
assessment of blockchain
technologies. With this
publication, TA-SWISS
provides the much-
needed social
contextualisation of
blockchain. The first,
more technical part of the
study takes an in-depth

look at how blockchain
functions and examines
the economic potential of
this technology. By
analysing multiple real-
world applications, the
study sheds light on
where the blockchain has
advantages over
traditional applications
and where existing
technologies continue to
be the better solution. The
second part of the study
examines how blockchain
became mainstream. It
explores the origins of
blockchain in the early
history of information
technology and computer

networks. The study also
reveals the impact
blockchain has on
industrial and public
spaces. Finally, it
discusses the social
implications and
challenges of blockchain
against the background of
a new socio-technical
environment.

Intangible Heritage

Algonquin Books
Headache is a huge public
health problem and
migraine alone cost 27
billion Euros per year in
Europe. It is therefore
important how the health
care service for headache

patients is organised throughout the world. Patients seen at headache clinics are more severely affected than those seen in general practice, and headache clinics need to be familiar with a long list of relatively rare headache disorders. Part of the "Frontiers in Headache Research" series, this volume is the first book to focus specifically on headache clinics, their classification and organization, their methods of diagnosis, and their approaches to multi-disciplinary management.

The clinical features of patients seen in headache clinics are thoroughly discussed. The value of a number of diagnostic laboratory techniques including when and how to use neuro-imaging is discussed. Also a number of more specialised methods employed only in referral headache centres are covered, such as nitro-glycerine challenge, indomethacin test, and oxygen breathing. The treatment options for severely affected patients are discussed including the possibilities of

combining two or more prophylactic medications, the use of epidural blood patch and the different methods for discontinuation of medication overuse. This volume will be an invaluable resource for neurologists, physicians in headache/pain clinics and interested general practitioners.

Drugs and Driving

Springer Nature

As higher education has made deliberate strides in recent decades to become more inclusive and accessible, the number of

students from non-traditional backgrounds has increased dramatically. There has been much study of the effects of higher education on previously underserved populations, showing that it can lead to higher lifetime income and higher status. But there has been little research on what happens to those students once they are in a university. This book fills that gap, taking a close look at this issue and drawing on case studies from the United States, the United

Kingdom, and Australia to illuminate the problems that face non-traditional students, the resources they and their families are able to draw on, and the ways that administrators and staff can help them succeed. This paperback edition is well suited to postgraduate students and practitioners and alike.

*Inequality in Education:
Comparative and
International Perspectives*
is a compilation of
conceptual chapters and
national case studies that
includes a series of
methods for measuring
education inequalities.
The book provides up-to-
date scholarly research on
global trends in the
distribution of formal
schooling in national
populations. It also offers
a strategic comparative

and international education policy statement on recent shifts in education inequality, and new approaches to explore, develop and improve comparative education and policy research globally. Contributing authors examine how education as a process interacts with government finance policy to form patterns of access to education services. In addition to case perspectives from 18 countries across six geographic regions, the volume includes six

conceptual chapters on topics that influence education inequality, such as gender, disability, language and economics, and a summary chapter that presents new evidence on the pernicious consequences of inequality in the distribution of education. The book offers (1) a better and more holistic understanding of ways to measure education inequalities; and (2) strategies for facing the challenge of inequality in education in the processes of policy

formation, planning and implementation at the local, regional, national and global levels.

Auguste Comte and the Religion of Humanity

Springer Science & Business Media

This 2001 book is a critique of Comte's concept of religion and its place in his thinking on politics, sociology and philosophy of science.

Lost and Living (In Archives: Collectively Shaping New Memories

Springer Science & Business Media

Memoirs of a Soviet

military commander in the course of World War II. *The Crusade Indulgence* Springer Science & Business Media
The System of Objects is a tour de force—a theoretical letter-in-a-bottle tossed into the ocean in 1968, which brilliantly communicates to us all the live ideas of the day. Pressing Freudian and Saussurean categories into the service of a basically Marxist perspective, The System of Objects offers a cultural critique of the commodity in consumer society.

Baudrillard classifies the everyday objects of the “new technical order” as functional, nonfunctional and metafunctional. He contrasts “modern” and “traditional” functional objects, subjecting home furnishing and interior design to a celebrated semiological analysis. His treatment of nonfunctional or “marginal” objects focuses on antiques and the psychology of collecting, while the metafunctional category extends to the useless, the aberrant and even the

“schizofunctional.” Finally, Baudrillard deals at length with the implications of credit and advertising for the commodification of everyday life. The System of Objects is a tour de force of the materialist semiotics of the early Baudrillard, who emerges in retrospect as something of a lightning rod for all the live ideas of the day: Bataille’s political economy of “expenditure” and Mauss’s theory of the gift; Reisman’s lonely crowd and the “technological society” of Jacques Ellul; the

structuralism of Roland Barthes in *The System of Fashion*; Henri Lefebvre's work on the social construction of space; and last, but not least, Guy Debord's situationist critique of the spectacle.

Dupuytren's Disease

Ministerio de Educación

At what level of physical existence does "quantum behavior" begin? How does it develop from classical mechanics? This book addresses these questions and thereby sheds light on fundamental conceptual problems of quantum

mechanics. It elucidates the problem of quantum-classical correspondence by developing a procedure for quantizing stochastic systems (e.g. Brownian systems) described by Fokker-Planck equations. The logical consistency of the scheme is then verified by taking the classical limit of the equations of motion and corresponding physical quantities. Perhaps equally important, conceptual problems concerning the relationship between classical and quantum

physics are identified and discussed. Graduate students and physical scientists will find this an accessible entrée to an intriguing and thorny issue at the core of modern physics.

Concours Infirmier - Epreuve Orale - IFSI 2017-2018

Routledge
Pour convaincre votre jury lors de l'épreuve orale du concours infirmier, un bon niveau de culture générale ne suffit pas. Au-delà de vos seules connaissances, il est essentiel de maîtriser la méthodologie de l'oral,

d'adopter une démarche singulière et surtout de vous entraîner. Cet ouvrage innovant et synthétique vous propose tous les outils nécessaires pour y parvenir, il se compose de 4 parties : I. Se préparer à devenir infirmier. Tout ce que vous devez savoir sur la profession d'infirmier (l'historique, les conceptions du soin, les valeurs, les besoins), afin de vous projeter dans votre futur métier, en particulier pour ceux qui n'ont pas eu la chance d'effectuer suffisamment

de stages. II. Culture générale. Un traitement synthétique et visuel des grands thèmes sanitaires et sociaux, afin d'alimenter votre exposé sans vous perdre dans les détails. Des conseils vous permettent également de planifier vos révisions : Quelle culture générale ? Sur quels thèmes ? Où chercher l'information ? Comment apprendre ? III. Méthodologie. Une fois pioché votre sujet, le temps de préparation est très court. Cette méthodologie ciblée vous apporte tous les outils

nécessaires pour gagner du temps : Comment se déroule l'oral ? Quels sont les critères d'évaluation ? Comment présenter votre parcours ? Qu'est-ce qu'un projet professionnel ? IV. Entraînements et exercices. À partir d'exemples concrets issus de situations vécues, un entraînement intensif vous permet d'aiguiser votre esprit critique et d'assimiler les étapes incontournables de l'oral. Très pédagogique, cet ouvrage se révèle indispensable pour convaincre votre jury,

revenir en IFSI et devenir infirmier !

Treaty Series London : Cassell

"This volume is already the 50th in the book series Global Perspectives on Higher Education ! In this book, the editors and authors paid special attention to this important anniversary. The 50th volume in the book series 'Global Perspectives on Higher Education' offers a stimulating and thoughtful assessment of higher education from a global perspective which addresses the challenges

and prospects for the next decade. The challenges now faced by higher education and its likely future prospects and patterns are examined in terms of policy papers and case studies. Five broad topics are considered: the situation of academic faculty, the demand for access, the role of the university in society and its governance, funding trends, and higher education's international dimensions. The volume brings together as authors fourteen of the thirty

participants of the Fulbright New Century Scholars 2005/2006 program, whose research addressed the topic of Higher Education in the 21st Century: Global Challenge and National Response and was published in a volume edited by the program leaders, Philip G. Altbach and Patti McGill Peterson, Higher Education in the New Century: Global Challenges and Innovative Ideas (2007). The present book not only continues the examination and assessment of current

global trends in higher education, but also bears witness to the enduring power of Senator Fulbright's vision of furthering mutual international understanding and offering collaborative study opportunities which extend the frontiers of knowledge"--

Bibliography on Smoking and Health Elsevier IDRC pub. Monograph on a literature survey of literacy issues - discusses educational policy, educational planning, educational

administration, educational expenditure, and requirements for education of women and functional literacy, factors affecting learning, such as teacher recruitment, teacher training and teaching methods, Motivation, enrolment and dropouts, curriculum development, use of audiovisual aids, etc. Bibliography pp. 120 to 128, photographs and statistical tables. *Social Inclusion and Higher Education* Jonathan Cape
"A heart-wrenching,

beautiful, darkly comic, deeply necessary tale that stuns again and again with razor-sharp prose and glittering wit. Robert Goolrick is, without question, one of the greatest storytellers of our time." —Téa Obrecht, author of *The Tiger's Wife*
In the spellbinding new novel from #1 New York Times bestselling author Robert Goolrick, 1980s Manhattan shimmers like the mirage it was, as money, power, and invincibility seduce a group of young Wall Street turks. Together

they reach the pinnacle, achieving the kind of wealth that grants them access to anything--and anyone. Until, one by one, they fall. Goolrick's literary chops are on full display, painting an authentic portrait of a hedonistic era, tense and stylish, perfectly mixing adrenaline and melancholy. Stunning in its acute observations about great wealth and its absence, and deeply moving in its depiction of the ways in which these

men learn to cope with both extremes, it's a true tour de force. "An addictive slice of semiautobiographical fiction . . . Goolrick vividly plumbs the depths of fortune and regret. The result is a compulsively readable examination of the highs and lows of life in the big city."
—Publishers Weekly "A compelling, wholly seductive narrative voice . . . Goolrick's stellar prose infuses this redemption story with a good deal of depth and despair,

making it read like the literary version of *The Wolf of Wall Street*."
—Booklist "A dark, intoxicating morality tale . . . With his impeccable prose, Goolrick focuses his unflinching eye on the grittiness beneath the sleek facade of nightclubs, fashion, and monied Manhattan extravagance. Beautifully crafted, seductive, and provocative." —Garth Stein, author of *A Sudden Light* and *The Art of Racing in the Rain*
