CARNEY CULLEN

Electrical Installation Work

Routledge

This popular guide
focuses on common
misconceptions in the
application of the
Wiring Regulations. It
explains in clear
language those parts
of the Regs that most
need simplifying,
outlining the correct

procedures to follow
and those to avoid.
Emphasis has been
placed on areas where
confusion and
misinterpretation is
common, such as
earthing and bonding,
circuit design and
protection, and in
particular the
increased use of RCDs.
It is an affordable
reference for all
electrical contractors
and other workers
involved in electrical
installations. It will

enable safe and efficient compliance and help answer queries quickly to ensure work complies with the latest version of the Wiring Regulations. With the coverage carefully matched to the syllabus of the City & Guilds Certificate in the Requirements for Electrical Installations (2382-10 and 2382-20) and containing sample exam questions and answers, it is also an ideal revision guide. Brian Scaddan, I Eng, MIET, is a consultant for and an Honorary Member of City & Guilds. He has over 35 years' experience in Further Education and training. He is Director of Brian Scaddan Associates Ltd, an approved City and Guilds and NICEIC training centre offering

courses on all aspects of Electrical Installation Contracting including the C&G 2382 series.

He is also a leading author of books on electrical installation.

Guidance Note 8: Earthing & Bonding
Routledge

A Notting Hill children's opera is suddenly on the world stage when terrorists try to kidnap one of the children.

17th Edition IEE Wiring Regulations: Explained and Illustrated Big Mouth House

This book covers both theory and practice for the trainee who wants to understand not only how, but why electrical installations are designed, installed and tested in particular ways. It complies with the latest IEE Wiring Regulations.
