HUDSON HUERTA

Urban-Think Tank Companions

He was born in Eschershausen. After attending gymnasia in Holzminden and Wolfenbüttel, he entered a bookstore in Magdeburg as apprentice in 1849. He used this opportunity for wide reading and enriched himself with the tales and folklore of his own and other countries. He remained an apprentice until 1854.

The Men Who Loved Trains Cambridge University Press

The varied past of this building reflects German social and political history. Initially erected by the Nazis, it then became party headquarters of the SED, and in future it will be the "Auswärtiges Amt" of Germany.

Middle East Railways Elsevier

In Helen Callaghan's chilling, tightly-spun debut novel of psychological suspense, a teenage girl's abduction stirs dark memories of a twenty-year-old cold case... Margot Lewis is a teacher at an exclusive high school in the English university town of Cambridge. In her spare time, she writes an advice column, "Dear Amy", for the local newspaper. When one of Margot's students, fifteen-year-old Katie, disappears, the school and the town fear the worst. And then Margot gets a "Dear Amy" letter unlike any of the ones she's received before. It's a desperate plea for

rescue from a girl who says she is being held captive and in terrible danger—a girl called Bethan Avery, who was abducted from the local area twenty years ago...and never found. The letter matches a sample of Bethan's handwriting that the police have kept on file since she vanished, and this shocking development in an infamous cold case catches the attention of criminologist Martin Forrester, who has been trying to find out what happened to her all those years ago. Spurred on by her concern for both Katie and the mysterious Bethan, Margot sets out—with Martin's help—to discover if the two cases are connected. But then Margot herself becomes a target...

The Diary of the Rev. Ralph Josselin, 1616-1683 Bethany House

A "very readable" history of Jewish conversions to Christianity over two centuries that "tracks the many fascinating twists and turns to this story" (Library Journal). When the Nazis came to power and created a racial state in the 1930s, they considered it an urgent priority to identify Jews who had converted to Christianity over the preceding centuries. With the help of church officials,

a vast system of conversion and intermarriage records was created in Berlin, the country's premier Jewish city. Deborah Hertz's discovery of these records, the Judenkartei, was the first step on a long research journey that led to this compelling book. Hertz begins the book in 1645, when the records begin, and traces generations of German Jewish families for the next two centuries. The book analyzes the statistics and explores letters, diaries, and other materials to understand in a far more nuanced way than ever before why Jews did or did not convert to Protestantism. Focusing on the stories of individual Jews in Berlin, particularly the charismatic salon woman Rahel Levin Varnhagen and her husband, Karl, a writer and diplomat, Hertz brings out the human stories behind the documents, sets them in the context of Berlin's evolving society, and connects them to the broad sweep of European history.

Processing the Past Springer Science & Business Media

Urban-Think Tank (U-TT), an interdisciplinary design practice emerging from the turbulent political environment of Chávez-era Caracas, has pursued projects

in Latin America, Europe, and Africa for almost twenty years. Their diverse work positioned the firm at the forefront of a social turn in architecture in the late 1990s, with concrete urban interventions encouraging social cohesion in the megacities of the Global South and Europe's evolving metropolises. U-TT has also produced numerous media projects that harness film, theater, exhibitions, and print to create new discursive spaces and question how our cities are shaped, and for whom. Most notable is its work on the squatted skyscraper for which the firm shared the Golden Lion at the Venice Biennale of Architecture in 2012. This book looks forward as well as back, imagining new spaces for a hyper-urbanized world and gaining insight from informal settlements, spatial play, and artistic interventions in public space.

Yet There Isn't a Train I Wouldn't Take

Springer Science & Business Media
Seit der Herausgabe des umfassenden Werkes von GHJLROV (1964) über die boden bewohnenden Insektenlarven hat sich unser Wissen über Käferlarven bedeutend erweitert. GHJLROV führt bei gleicher Auffassung der Familien in seinem

Familien schlüssel 70 Taxa an (hier 93). Nach den Tabellen der einzelnen Familien sind durch sein Buch ca. 470 Gattungen bestimmbar (hier 653). Außerdem wurden in den vorliegenden Band 16 Familien aufgenommen, für die GHJLROV keinen Gattungsschlüssel bringt. Es ist nicht möglich gewesen, Tabellen bis zur Art (wie bei GHJLROV) aufzunehmen. Für später ist eine Fortführung dieses Buches geplant, und es sollen Bestimmungstabellen bis zu den Arten geschaffen werden. Auf den ersten Blick mag es verwunderlich erscheinen, wenn Familien, die vorwiegend in Pilzen leben (z. B. Mycetophagidae), Bewohner faulenden Holzes (z. B. Serropalpidae) oder Familien, die vorwiegend in der Kraut- und Strauchschicht leben (z. B. Oocinellidae) in dieses Buch aufgenommen wurden. Tatsächlich ist es aber so, daß alle hier behandelten Familien in Material aus Bodenfallen mehr oder minder regelmäßig gefunden werden. Die eigentlich nicht zur Fauna des Bodens oder der Bodenoberfläche gehörenden Oocinellidae wurden beispielsweise mit 15,4% aller Käferlarven bei einer Untersuchung über die epigäische Fauna

von Fichtenwäldern nachgewiesen. Es wurde darauf verzichtet, dieser Arbeit eine vergleichende Morphologie der Coleopterenlarven voranzustellen. Die wesentlichsten Bestimmungsmerkmale werden anschließend in einer kurzen Übersicht erläutert. Ziel des vorliegenden Buches ist eine möglichst leichte Diagnose von Käferlarven.

When We Rode the Rails Hatje Cantz

An award-winning account of a crisis in railroad history: "This absorbing book takes you on an entertaining ride."
—Chicago Tribune
A saga about one of the oldest and most romantic enterprises in the land—America's railroads—*The Men Who Loved Trains* introduces the chieftains who have run the railroads, both those who set about grabbing power and big salaries for themselves, and others who truly loved the industry. As a journalist and associate editor of *Fortune* magazine who covered the demise of Penn Central and the creation of Conrail, Rush Loving often had a front-row seat to the foibles and follies of this group of men. He uncovers intrigue, greed, lust for power, boardroom battles, and takeover wars and turns them into a page-turning story. He

recounts how the chairman of CSX Corporation, who later became George W. Bush's Treasury secretary, managed to make millions for himself while his company drifted in chaos. Yet there were also those who loved trains and railroading—and who played key roles in reshaping transportation in the northeastern United States. This book will delight not only the rail fan, but anyone interested in American business and history. Includes photographs

HarperCollins

This tribute to Professor Detlev Vagts of the Harvard Law School brings together his colleagues at Harvard and the American Society of International Law, as well as academics, judges and practitioners, many of them his former students. Their essays span the entire spectrum of modern transnational law: international law in general; transnational economic law; and transnational lawyering

and dispute resolution. The contributors evaluate established fields of transnational law, such as the protection of property and investment, and explore new areas of law which are in the process of detaching themselves from the nation-state such as global administrative law and the regulation of cross-border lawyering. The implications of decentralised norm-making, the proliferation of dispute settlement mechanisms and the rising backlash against global legal interdependence in the form of demands for preserving state legal autonomy are also examined.

Teuthonista of Duijtschlender Oxford University Press

The primary purpose of this book is to trace the theoretical methodological foundations of American educational technology. It must be emphasized that this work is essentially as history of the process of educational technology rather than of products in the form of devices or media. Although media have played an important role in educational technology, the reader should not lose sight of the central process which characterizes and underlies the true historical meaning and

function of educational technology. Moreover, the assumption is made that all current theory, methodology, and practice rests upon the heritage of the past. Indeed, a common problem in the field has been the failure, in many instances, to take adequate account of past history in planning for the present or the future. A related purpose of this book is to provide a selective survey of research in educational technology as it relates to the American public schools. Such research reviews are not intended to be comprehensive, but were included because of their historical importance and their relevance in understanding the process of educational technology.

How Jews Became Germans Cambridge University Press

Drawing parallels between the period in American history in which the West was won and the equally exciting period of digital upheaval we are faced with today is a useful way of avoiding against repeating the mistakes of history and instead learning from the stories of the Wild West in order to establish a Digital Society built on the rule of law and basic common sense. Tim Cole is one of the first internet

journalist and the author of the the very first blog in Germany. His books and keynotes have influenced decision makers almost two decades. Together with his friend Ossi Urchs, he anchored the TV show "eTalk" on ntv, the German cnn affiliate.

Der Deutsche Baumeister Sydney : Landsdowne

Processing the Past explores the dramatic changes taking place in historical understanding and archival management, and hence the relations between historians and archivists. Written by an archivist and a historian, it shows how these changes have been brought on by new historical thinking, new conceptions of archives, changing notions of historical authority, modifications in archival practices, and new information technologies. The book takes an "archival turn" by situating archives as subjects rather than places of study, and examining the increasingly problematic relationships between historical and archival work. By showing how nineteenth- and early twentieth-century historians and archivists in Europe and North America came to occupy the same conceptual and

methodological space, the book sets the background to these changes. In the past, authoritative history was based on authoritative archives and mutual understandings of scientific research. These connections changed as historians began to ask questions not easily answered by traditional documentation, and archivists began to confront an unmanageable increase in the amount of material they processed and the challenges of new electronic technologies. The authors contend that historians and archivists have divided into two entirely separate professions with distinct conceptual frameworks, training, and purposes, as well as different understandings of the authorities that govern their work. Processing the Past moves toward bridging this divide by speaking in one voice to these very different audiences. Blouin and Rosenberg conclude by raising the worrisome question of what future historical archives might be like if historical scholars and archivists no longer understand each other, and indeed, whether their now different notions of what is archival and historical will ever again be joined.

Urban Energy Transition, second edition, is the definitive science and practice-based compendium of energy transformations in the global urban system. This volume is a timely and rich resource for all, as citizens, companies and their communities, from remote villages to megacities and metropolitan regions, rapidly move away from fossil fuel and nuclear power, to renewable energy as civic infrastructure investment, source of revenue and prosperity, and existential resilience strategy.

Corpus Christi Bodley Head Childrens
In October 2017, actress Alyssa Milano sparked the #MeToo movement. The ensuing protests quickly encompassed far more than Harvey Weinstein and the entertainment industry. They expressed women's outrage at male workplace behavior in every sector and social class

and even helped elect a new generation of women leaders in 2018. But what has been the effect of #MeToo in the entertainment industry itself? This book traces the movement's influence on the stories being told, on changing representations of women's lives and bodies, and on the slow changes among the producers who shape the stories. Analyzing a wide set of TV and film genres--including crime, legal and medical dramas, comedies, horror and reality programming--this book covers the complex ways that media respond to social movements: They sometimes give voice to brand-new or previously silenced stories, but just as often make facile references that can blunt the potential for change, or even fuel cultural backlash.

Yet there isn't a train goes by all day But I hear its whistle shrieking.... Yet there isn't a train I wouldn't take, No matter where it's going. —Edna St. Vincent Millay, "Travel" "Yet there isn't a train I wouldn't take" is a collection of stories about favorite train journeys by an inveterate railway enthusiast and train traveler. A half century career as an engineer, Naval officer, and university administrator took Bill Middleton to almost every part of the globe, and everywhere he took with him an abiding interest in railways, and a notebook and camera to record his

experiences. His North American journeys have included experiences as diverse as the long journey north through Manitoba to polar bear country on Hudson Bay, a trip to Minnesota's Mesabi Range to haul a boatload of iron ore to Lake Superior behind a giant Yellowstone articulated steam locomotive, and the trip between Costa Rica's Atlantic and Pacific coasts by narrow gauge railway. His European travels have ranged from a Pullman seat on the crack London-Paris Golden Arrow to the slow trip across Thrace on one of the last runs of the celebrated Simplon-Orient Express. In Asia he traveled through the Toros Mountains of Turkey on the famous Istanbul-Baghdad Toros Express, experienced modern high-speed railroading in the cab of Japan's Bullet Train, and rode to Asia's highest mountain east of the Himalayas on the little trains of Taiwan's Ali Shan Forestry Railway.
