### Schreiben in der Zweitsprache

The European Language Portfolio aims to foster the development of learner autonomy, intercultural awareness and plurilingualism. Teachers of particular languages working on their own can use the ELP to promote learner autonomy, but the goals of intercultural awareness and plurilingualism invite us to use the ELP in all foreign language classes at all levels in the school. The guide introduces the language education policy that underpins the ELP, explores the key concepts that it embodies, and explains how to plan, implement and evaluate whole-school ELP projects. The ten case studies published on the project website illustrate various dimensions of ELP use and include practical suggestions and activities for teachers and learners.

Multilingual Matters

After coming to Vienna from Sudan to win a better life for himself, Hamza struggles to escape from the margins of society and the stigma of the immigrant. Following several years of hardship, his fortunes begin to change when he meets Sandra, a young Austrian woman, who shows him the Palm House. In this famous Viennese greenhouse, the frost of Hamza's heart begins to thaw, and he slowly opens himself to Sandra, revealing his bitter yet beautiful past in Sudan and beyond. This masterful novel draws on the 1001 Nights as well as Sudanese folk traditions, and demonstrates the remarkable power of storytelling to overcome even the most dire circumstances. Critically acclaimed across the Arab world, this novel can be read on its own, or as a sequel to Eltayeb's first novel, *Cities without Palms* (AUC Press, 2009).

Mehrsprachigkeit begegnet uns im Klassenzimmer in unterschiedlichen Formen und wer heute selbst eine Sprache neu erlernt oder Lernende beim Sprachenlernen begleitet, kann beobachten, wie sehr ungesteuerter und gesteuerter Spracherwerb ineinandergreifen. Aus dem Vergleich der beiden Zugänge lassen sich wichtige Folgerungen für die institutionelle Sprachvermittlung ziehen, wobei auch der Blick in mehrsprachige Regionen Aufschlüsse über Erwerbs- und Aneignungsprozesse liefert. Wissen über die unterschiedlichen Aneignungsprozesse sowie über die Entwicklung lingua-kultureller Kompetenzen von Lernenden in gesteuerten und ungesteuerten Kontexten kann Lehrpersonen in ihrem

The term has a variety of meanings in different sociocultural and political contexts, including “self-strength, control, self-power, self-reliance, own choice, life of dignity in accordance with one’s values, capable of fighting for one’s rights, independence, own decision making, being free, awakening, and capability” (The World Bank, 2002, p. 10). However, the World Bank report observed that most definitions focus on issues of “gaining power and control over decisions and resources that determine the quality of one’s life” (p. 10). This interpretation of empowerment provides a useful starting point for the development of the series of interconnected arguments explored

here. Establishment of the basis for understanding, identifying and developing strategies through education necessary for individuals to be able to make choices that influence the quality of their lives is the main aim of this book. There are a number of assumptions and boundaries that frame this analysis. First, the book focuses on “agents”; however, empowerment is often conceptualised in terms of relationships between agency and structure (e. g. , Alsop, Bertelsen, & Hland, 2006). Agency could be defined as “an actor’s or group’s ability to make purposeful choices – that is, the actor is able to envisage and purposively choose options” (p. 11).

Beyond the hype of online learning lies a straightforward question: how do you really deliver worthwhile learning online? This book, based on action research, provides a simple answer to this fundamental question by exploring a key technique that enables teachers and learners to use available technologies happily and successfully. So, what are e-tivities? They are motivating, engaging, purposeful activities developed and led by an e-moderator. They are frameworks for active and interactive online learning. E-tivities are in the hands of the teachers themselves and promote active e-learning. This is not a book about the technology of online learning. Practical, accessible and direct, it looks at personalizing and customizing teaching and learning. Written for use in any topic, subject or course, E-tivities explores: the importance of activities in online learning; designing and running e-tivities; the five-stage model of teaching and learning online. Backed up extensive illustrations and case studies, and including a unique collection of 35

Resources for Practitioners, this is a book for all professionals involved in online learning.

The Power of Religion in the Public Sphere represents a rare opportunity to experience a diverse group of preeminent philosophers confronting one pervasive contemporary concern: what role does or should religion play in our public lives? Reflecting on her recent work concerning state violence in Israel-Palestine, Judith Butler explores the potential of religious perspectives for renewing cultural and political criticism, while Jürgen Habermas, best known for his seminal conception of the public sphere, thinks through the ambiguous legacy of the concept of "the political" in contemporary theory. Charles Taylor argues for a radical redefinition of secularism, and Cornel West defends civil disobedience and emancipatory theology. Eduardo Mendieta and Jonathan VanAntwerpen detail the immense contribution of these philosophers to contemporary social and political theory, and an afterword by Craig Calhoun places these attempts to reconceive the significance of both

religion and the secular in the context of contemporary national and international politics.

This book deals with bilingual education in general, but it pays special attention to bilingual education in monolingual areas. One central aim is to study the effects of bilingual programmes during the final stages of Primary and Secondary Education in contexts where the L2 (English) is not normally used as an instrument of social communication in the students' environment, but instead is used only at school, where some subject areas are undertaken totally or partially in this language. The reader interested in bilingual education will find a valuable source of information on different bilingual programmes in the USA and Spain: what schools do and the contents they teach, their timetable and extracurricular activities; the specific objectives that they aim to achieve and the methodology they use, with special reference to the CLIL approach, the schools and the students' level of success with bilingual education, the most common problems that they have to face in monolingual areas and how to solve them.

Graeme Ritchie advocates a cognitive science approach to humour research, aiming for higher levels of detail and formality than has been customary in humour research, and argues the case for analyzing jokes and humour.

"Cognate Object Constructions in

English..." is the first comprehensive description of linguistic expressions such as Both died an unheroic death or Jamie grinned his tired grin, viewed from a Cognitive Linguistic perspective. Redefining the category of "cognate objects", the book provides a systematic account of prototypical and less prototypical instances of this pattern. Based on real-usage data from the BNC, the study presents a family of constructions which are equipped with their own syntactic and lexical idiosyncrasies and their own semantic-pragmatic functions, such as event structuring and event intensification. In a step-by-step fashion, the author develops a network of constructional schemas ranging from abstract to concrete, thereby investigating and corroborating the plausibility of a lexis-syntax continuum - one of the main assumptions of the Cognitive Linguistics enterprise. The book offers important insight on concepts such as argument structure and transitivity and demonstrates the fruitful interrelationship between Cognitive Linguistics and statistical corpus linguistics.
