Worldwide interest in
Yiddish has often
concentrated on its
secular forms of
expression: its literature,

its theater, its journalism
and its political-party
associations. This all-
encompassing study,
covers these phenomena
as well as investigating
the demographic and
political mushrooming of
Yiddish-speaking Ultra-
Orthodoxy, both in
America and in Israel. As
the title suggests, this
volume attempts to show
that Yiddish is now finally

on the path towards recovery. The volume consists of 17 papers grouped into five sections: Yiddish and Hebrew: Conflict and Symbiosis; Yiddish in America; Corpus Planning: The ability to change and grow; Status Planning: The Tshernovits Conference of 1908; Stock-taking: Where are we now? Each section is prefaced by an introduction. In addition there are also five papers written in Yiddish. The work emphasises an empirical and theoretical

approach to the growing Ultra-Orthodox sector, that until now, has largely been ignored. Fishman's interest in Yiddish (among other Jewish languages) has previously been difficult to access and it is hoped that the appearance of this book will go some way toward alleviating this situation. The volume also includes a statistical appendix bringing together data on Yiddish for the past 100 years from the Czarist Empire, the USSR, Poland, Israel, the USA, and other parts of the world. This

extensive and enlightening study should be of interest to sociolinguists and all those engaged in efforts on behalf of small languages everywhere. [Hebrew Union College-Jewish Institute of Religion at One Hundred Years](#) Princeton Review Language Contact and the Development of Modern Hebrew, edited by Edit Doron, presents twenty four different innovative syntactic constructions of Modern Hebrew, attributing them to syntactic change due to

the impact of contact languages on previous stages of Hebrew. The contents of this volume was also published as a special double issue of *Journal of Jewish Languages*, 3: 1-2 (2015). [Yiddish: Turning to Life \[Cincinnati\]](#) : Hebrew Union College Press

The Handbook of Classroom Assessment takes a multi-dimensional approach to classroom assessment. A successful combination of theory and practice, the book emphasizes the assessment of classroom

learning within content areas and the development of standards for evaluation. Most chapters are devoted to the assessment of learning and achievement and discuss current theories. The book also features assessment of academic self-concept and subjective well-being in children and adolescents. The Handbook provides successfully field-tested examples of assessment techniques and strategies within the content areas of mathematics, social

studies, foreign languages, and the visual arts. Contributing chapter authors share the unique distinction of having backgrounds that include both the development of assessment theory and first hand experience translating theory into practice at the classroom, school site, state, or national level. The book is divided into four sections. Section I discusses the top five theories with respect to what learning is, how it's related to achievement, and how we assess both in the

classroom setting. Section II on standardized assessment briefly covers all major standardized achievement tests used in preschool, K-6, and 7-12. Assessment of classroom learning, Section III, presents test instruments and techniques specific to the measurement of math skills, social science skills, and artistic talent across ages and grades. Section IV on classroom practices includes an assessment of general reasoning skills and performance and how to develop a grading philosophy. Key Features

* Explains the why, what, and how of classroom assessment * Combines theory and practice for a multidimensional approach to assessment * Presents test instruments and techniques specific to measuring various skills * Uses field-tested examples of assessment techniques * Provides a resource for staff development at the school site

Elegant, passionate, and filled with the love of God's creation, Abraham Joshua Heschel's *The Sabbath* has been hailed as a classic of Jewish spirituality ever since its original publication--and has been read by thousands of people seeking meaning in modern life. In this brief yet profound meditation

on the meaning of the Seventh Day, Heschel, one of the most widely respected religious leaders of the twentieth century, introduced the influential idea of an 'architecture of holiness' that appears not in space but in time. Judaism, he argues, is a religion of time: it finds meaning not in space and the materials things that fill it but in time and the eternity that imbues it, so that 'the Sabbaths are our greatcatherdrals.'

Georgetown University Round Table on Languages and Linguistics (GURT) 1989: Language Teaching, Testing, and Technology Routledge
The growth of secularisation, pluralism and globalisation have placed the West's traditional monoreligious education under pressure. Christianity no longer possesses a privileged position in Western Europe. Since the 1970's, a number of scholars have

been trying to formulate an answer to this question of multireligiosity by developing a multireligious concept of religious education. As both a critique on, and alternative for, the multireligious model, scholars in the 1990s developed the interreligious model of religious education. This approach distinguishes itself from monoreligious pedagogy through acknowledging plurality among the pupils as both a part of departure and as a possible end result of

religious education. Moreover, it openly approaches the plurality of religions and worldviews as a learning opportunity. Religious education thus becomes a place of encounter and dialogue between different religious convictions. Interreligious learning further distinguishes itself from the multireligious model by overcoming a purely objective representation of the multitude of religions. In the interreligious model, students are not only

informed, but are introduced to the cognitive and value commitments underlying the different religions, giving them the opportunity to enrich and develop their own personal religious identity. The teacher takes an explicit and particular religious (Christian) standpoint, but also tries to bring in other committed religious and philosophical voices. The interreligious model aims to teach students that holding a proper religious identity while having an

openness to the religious other is not necessarily self-contradictory. What is more, that authentic religiosity is able to welcome the other in his/her vulnerability and strength as a witness to God. In this volume, scholars from various disciplines (theology, pedagogy, psychology and ethics) and from different religious backgrounds (Jews, Christians and Muslims) face up to a total of ten challenges related to interreligious learning. Challenges that may act

as obstacles to the acceptance of this possible new paradigm for religious education. *Annual Report of the Librarian of the Hebrew Union College* Princeton Review Ben-Yehuda's vision of a modern Hebrew eventually came to animate a large part of the Jewish world, and gave new confidence and pride to Jewish youth during the most difficult period of modern history, infusing Zionism with a dynamic cultural content. This book examines the

many changes that occurred in the transition to Modern Hebrew, acquainting new students of the language with its role as a model for other national revivals, and explaining how it overcame many obstacles to become a spoken vernacular. The author deals primarily with the social and political use of the language and does not cover literature. Also discussed are the dilemmas facing the language arising from the fact that Israelis and Jews in the Diaspora "don't

speak the same language," while Israeli Arabs and Jews often do. *Hebrew Union College, and Other Addresses*

This is the first textbook written for the purpose of teaching biblical Hebrew to college-level students who already know some modern, Israeli Hebrew. Marc Brettler provides a clear, comprehensive book with numerous well-constructed exercises to help students either make the transition from modern Israeli Hebrew to

biblical Hebrew or deepen their understanding of biblical Hebrew. The book is also ideal for individuals who might like to study independently, and for serious Jewish adult-education programmes. Biblical Hebrew for Students of Modern Israeli Hebrew is unique in its emphasis on phonology, based on the conviction that a strong grounding in phonology makes it possible to learn biblical Hebrew grammar in a much more systematic fashion. This method also allows verbal conjugations

to be taught much more quickly and systematically. Although the text is not inductive, it uses authentic biblical texts throughout to illustrate fundamental points, and it contains many biblical texts in the exercises. Students progressing through the book will quickly be encouraged by a sense of accomplishment as they encounter and understand well-known biblical passages. Biblical Hebrew for Students of Modern Israeli Hebrew Lincoln, Neb :

Buros Institute of Mental Measurements, University of Nebraska-Lincoln Historical Continuity in the Emergence of Modern Hebrew offers a new perspective on the emergence processes of Modern Hebrew and its relationship to earlier forms of Hebrew. Based on a textual examination of select case studies of language use throughout the modernization of Hebrew, this book shows that due to the unconventional sociolinguistic circumstances in the

budding speech community, linguistic processes did not necessarily evolve in a linear manner, blurring the distinction between true and apparent historical continuity. The emergent language's standardization involved the restructuring of linguistic habits that had initially taken root among the first speakers, often leading to a retreat from early contact-induced or non-classical phenomena. Yael Reshef demonstrates that as a result, superficial similarity to

earlier forms of Hebrew did not necessarily stem from continuity, and deviation from canonical Hebrew features does not necessarily stem from change.

BEFORE an illustrious
gathering of scholars and
statesmen and Zionist
leaders from the four cor-
ners of the earth Dr.
Chaim Weizmann
dedicated the new
Hebrew University on
historic Mount Scopus in
April 1925. It was a

symbolic gesture. Once
before, in 1918, just as
General Allenby had
liberated Jerusalem, he
made the heroic ges ture
of laying the corner stone
of the future Uni-7 versity.
Both were acts of infinite
faith, of long dreams, of
ardent hopes, of eternal
longing, and of great
courage. There was
nothing on Mount Scopus
in 1918, and only one or
two laboratory buildings
and an open air
amphitheatre in 1925. Not
a University as yet but an
idea, and the promise of
one. The promise has

been kept. Over tortuous
paths, midst trials and
tribulations, through joy
and sorrow, the ideal has
been turned into a reality.
Today there is a modern
Hebrew University, the
first one in history, in the
holy city of Jerusalem, on
the sacred soil of Israel.
And so we give thanks,
and rejoice, and com-
memorate the event,
however inadequately, in
the volume before us.
With pride and humility,
with hope for the future,
we record the semi
jubilee. Twenty-five years
are but a brief moment in

the life of a University. Traditions are not built overnight. Classrooms and laboratories and libraries and campuses alone do not make a university. Great teachers and scholars do. Above all there must be a tradition of learning and a rich cultural heritage. These take time to strike abiding roots, to grow and to flourish. Fortunately for the Hebrew University, the Jewish people have a very old tradition of learning. Academies have flourished almost uninterruptedly from the

days before Hillel and Shammai through the ages down to the Yeshivahs of our own days. The very hills and valleys of Palestine echo the voices and traditions of ages. The soil of Israel is congenial to the spirit of the University. Its roots will strike deep in the city of David, and the Torah will continue to go forth from Zion. American Jews have watched over the growth of the Hebrew University with special interest and affection. For, though the University is in Jerusalem and belongs to

the state of Israel, it also belongs to the whole Jewish people. It is not and will not be a state university. And it will continue to be a house of learning for all people, free and untrammelled. In it will dwell ethics and morals and social justice and the spirit of democracy. To fulfill its destiny the Hebrew University must be strengthened and be made to grow into a great academy of learning. It is the blessed opportunity of American Jewry to dedicate itself to this task. Despite the

great love of American Jews for Israel and their generous aid in the building of the land, the University has not received the support which it so richly deserves. The University has a great deal to give us, as we have much to give in return. The new University-Temple will provide the spiritual link between Israel and the Diaspora...
