Sexuality Now: Embracing Diversity The Red Sea Press

The second edition of this highly praised human sexuality text continues to be a product of author Janell Carroll's partnership with her students to answer the questions and concerns that they have about themselves and their

sexuality with scientific fact, sensitivity, humor and unmatched candor. Janell Carroll clearly conveys foundational biological and health issues, extensively cites both current and classic research, and addresses all material in a fresh and fun way; her book helps teach students what they need, and want, to know about sexuality. Her focus takes into account the social, religious, ethnic, racial, and cultural contexts of today's students. Dr. Carroll has used feedback from the first edition to add even further value to this popular title-streamlining student pedagogy and providing dynamic learning opportunities through Active Summaries at the end of chapters, a new online student tutorial, new video components, and content for Classroom Response Systems. This continues to be the text most representative of today's students, incorporating new sexual position art, a new pronunciation guide, and (for instructors) a new cross-cultural Slang Guide. Notes on the Somali Language PMPH-USA

Maxamed Xaashi Dhamac "Gaariye" (1951-2012) was a well-known Somali speaking contemporary poet. Originally from Hargeysa, Somaliland he was among many of his contemporaries living in Mogadishu in the 1970s, and whose works are credited with having great influence upon the prevalent sociopolitical situation in the country today. Though largely motivated and moved by patriotic sentiments they were also sympathetic to the leftist political movements which were internationally popular in that era. Many themes such as an indefatigable advocacy of human rights, freedom of thought and expression, and a vehement hatred of all forms of human degradation were so brilliantly articulated in his poetry. In this

volume, alongside biography material, is a selection of some of Gaarriye's most lauded poetry, such as his master pieces on 'Nuclear Weapons', 'Nelson Mandela', 'Watergate' and 'Zimbabwe'. This book is the fifth in the "Iswaydaarsi" (Exchange) series which aspires to translate Somali literature and wisdom into other languages, and at the same time providing specific knowledge of international classical literature to the Somali speaking readership.

The reader will greatly benefit from the coverage of topics not found in most comprehensive physiology books. PDQ Physiology is more focused on significant points; more current in cardiac, renal, and muscle functions; and is more descriptive in sexuality, reproduction and birth.

The Microbial Challenge Cengage Learning

"Babies with CVI: Nurturing Visual Abilities and Development in Early Childhood is a guide through the history and best practices related to the treatment of CVI in children from birth to 36 months. This book is based on the author's nearly five-decade career working with families in homes and classrooms. Understanding and knowledge about effective interventions to address the visual skills of children with CVI evolved enormously over that period. Babies with CVI reflects that evolution. The book presents specific approaches and strategies that families and visual impairment professionals can use to meet the unique learning needs of a child with CVI. It stresses the importance of early intervention, proper evaluation, and integrating teaching opportunities into the child's daily routine"--

PDQ Histology is a concise laboratory guide and handy study aid for Histology students. The text deals with the basics of the subject, presented in a clear, rational manner. The content covers the fundamentals and important features of microscopic recognition. It focuses the reader's attention on the main structural features found in standard sections taken from the student's slide box and emphasizes the particular combination of histological criteria that characterizes

each section. It represents a mini-review of the distinctive microscope features that permit histological preparations of the various tissues and organs of the body to be correctly identified. PDQ Histology is the only introductory book on the subject that presents short selections of reliable tissue recognition criteria suitable for revision purposes. Strength Through Reappraisal F.A. Davis Through the Ages, women the world over, have lived under subjugation; women in India have been subjected to various atrocities as well. Nonetheless, despite the odds stacked against them, many have become shining examples for others to follow; not for them the phrase: Frailty thy name is woman. So it is with the characters, whose stories appear on the pages of this book. Their names may be ordinary, but their show of resilience is extraordinary. Kavita, Pushpa, Poonam, Deepa, Charu, Aru and Madhuri, hailing from different cities and different strata of the Indian Society, all run into problems not of their making. From fighting to keep their foetuses alive, to confronting the problem of impotency, to avoiding unwarranted advances, to being involved in murders, to giving birth to a baby who talks about his past, to taking care of a son who has cancer, to sustaining a brain haemorrhage, to having a tumour and a baby growing together, to being looked down upon as a divorcee - they face it all. But, their never-say-die attitude stands them in good stead. They tackle their individual problems and come up triumphant.
