#1 NEW YORK TIMES BESTSELLER • “The
Uninhabitable Earth hits you like a
comet, with an overflow of insanely
lyrical prose about our pending
Armageddon.”—Andrew Solomon, author
of *The Noonday Demon* NAMED ONE OF
THE BEST BOOKS OF THE YEAR BY The
New Yorker • The New York Times Book
Review • Time • NPR • The Economist •

The Paris Review • Toronto Star • GQ •
The Times Literary Supplement • The
New York Public Library • Kirkus Reviews
It is worse, much worse, than you think.
If your anxiety about global warming is
dominated by fears of sea-level rise, you
are barely scratching the surface of what
terrors are possible—food shortages,
refugee emergencies, climate wars and
economic devastation. An “epoch-
defining book” (The Guardian) and “this
generation’s *Silent Spring*” (The
Washington Post), *The Uninhabitable
Earth* is both a travelogue of the near

future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. The Uninhabitable Earth is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today’s.

LONGLISTED FOR THE PEN/E.O. WILSON
LITERARY SCIENCE WRITING AWARD

“The Uninhabitable Earth is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously

documented, white-knuckled tour through the cascading catastrophes that will soon engulf our warming planet.”—Farhad Manjoo, *The New York Times* “Riveting. . . . Some readers will find Mr. Wallace-Wells’s outline of possible futures alarmist. He is indeed alarmed. You should be, too.”—*The Economist* “Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the ‘eerily banal language of climatology’ in favor of lush, rolling prose.”—Jennifer Szalai, *The New York Times* “The book has potential to be this generation’s *Silent Spring*.”—*The Washington Post* “The Uninhabitable Earth, which has become a best seller, taps into the underlying emotion of the

day: fear. . . . I encourage people to read this book.”—Alan Weisman, *The New York Review of Books*

What on Earth Happened? Farrar, Straus and Giroux (BYR)

The instant New York Times Bestseller •

Nominated for the 2019 National Book Award for Fiction “A lyrical work of self-discovery that’s shockingly intimate and insistently universal...Not so much briefly gorgeous as permanently stunning.” —Ron Charles, *The Washington Post* Ocean Vuong’s debut novel is a shattering portrait of a family, a first love, and the redemptive power of storytelling *On Earth We’re Briefly Gorgeous* is a letter from a son to a mother who cannot read. Written when the speaker, Little Dog, is in his late twenties, the letter unearths a family’s history that began before he was born — a history whose epicenter is rooted in Vietnam — and serves as a doorway into parts of his life his mother has never known, all of it leading to an unforgettable revelation. At once a

witness to the fraught yet undeniable love between a single mother and her son, it is also a brutally honest exploration of race, class, and masculinity. Asking questions central to our American moment, immersed as we are in addiction, violence, and trauma, but undergirded by compassion and tenderness, *On Earth We're Briefly Gorgeous* is as much about the power of telling one's own story as it is about the obliterating silence of not being heard. With stunning urgency and grace, Ocean Vuong writes of people caught between disparate worlds, and asks how we heal and rescue one another without forsaking who we are. The question of how to survive, and how to make of it a kind of joy, powers the most important debut novel of many years. Named a

Duggan Books

A People's Curriculum for the Earth is a collection of articles, role plays, simulations, stories, poems, and graphics to help breathe life into teaching about the environmental crisis. The book features some of the best articles from Rethinking Schools magazine alongside classroom-friendly readings on climate change, energy, water, food, and pollution—as well as on people who are working to make things better. A People's Curriculum for the Earth has the breadth and depth of Rethinking Globalization: Teaching for Justice in an Unjust World, one of the most popular books we've published. At a time when it's becoming increasingly obvious that life on Earth is at risk, here is a resource that helps students see

what's wrong and imagine solutions. Praise for *A People's Curriculum for the Earth* "To really confront the climate crisis, we need to think differently, build differently, and teach differently. *A People's Curriculum for the Earth* is an educator's toolkit for our times." — Naomi Klein, author of *The Shock Doctrine* and *This Changes Everything: Capitalism vs. the Climate* "This volume is a marvelous example of justice in ALL facets of our lives—civil, social, educational, economic, and yes, environmental. Bravo to the Rethinking Schools team for pulling this collection together and making us think more holistically about what we mean when we talk about justice." — Gloria Ladson-Billings, Kellner Family Chair in Urban Education, University of Wisconsin-

Madison "Bigelow and Swinehart have created a critical resource for today's young people about humanity's responsibility for the Earth. This book can engender the shift in perspective so needed at this point on the clock of the universe." — Gregory Smith, Professor of Education, Lewis & Clark College, co-author with David Sobel of *Place- and Community-based Education in Schools* *Earth Open Road Media* Part ribald farce, part lyrical contemplation, Wendell Berry's novel is the story of a place—Port William, Kentucky—the farm lands and forests that surround it, and the river that runs nearby. The rhythms of this novel are the rhythms of the land. ... *A Place on Earth* Wide Eyed Editions Ketchvar III's mission is simple: travel to

Planet Earth, inhabit the body of an average teenager, and determine if the human race should be annihilated. And so Ketchvar—who, to human eyes, looks just like a common snail—crawls into the brain of one Tom Filber and attempts to do his analysis. At first glance, Tom appears to be the perfect specimen—fourteen years old, good health, above average intelligence. But it soon becomes apparent that Tom Filber may be a little too average—gawky, awkward, and utterly abhorred by his peers. An alien within an alien's skin, Ketchvar quickly finds himself wrapped up in the daily drama of teenage life—infuriating family members, raging bullies, and undeniably beautiful next-door neighbors. And the more entangled Ketchvar becomes, the harder it is to

answer the question he was sent to Earth to resolve: Should the Sandovinians release the Gagnerian Death Ray and erase the human species for good? Or is it possible that Homo sapiens really are worth saving? Wickedly wry and hysterically skewed, David Klass's take on teen life on our fabulously flawed Planet Earth is an engrossing look at true friends, truer enemies, and awkward alien first kisses. Stuck on Earth is a 2011 Bank Street - Best Children's Book of the Year.

I Am Earth Penguin

In *What on Earth Happened?*, Christopher Lloyd tells our story from the very beginning of time to the present day, taking giant narrative leaps across millennia and continents. Along the way, he explains exactly how Muslim

conquest gave Spain its paella, how the Earth's collision with another young planet created the moon, how dragonflies the size of seagulls emerged out of the prehistoric waters, and how the Big Bang can be detected in your television. Accessible and endlessly entertaining, this massive book draws on disciplines as wide-ranging as astrophysics and anthropology and will appeal to experts, amateur enthusiasts and the simply curious alike. Completed by 250 colourful photographs, maps, historic paintings, engravings and specially commissioned illustrations, *What on Earth Happened?* takes an entertaining and informed sideways look at the last 13.7 billion years in the life of our universe.
