The ideas and techniques featured in Patient Sedation Without Medication were conceived and refined in clinical practice. By following the book's step-by-step guidelines, healthcare professionals can help their patients better cope with anxiety and pain when undergoing their procedures; thus enabling patients to either forgo or reduce their needs for

medication. Authors Elvira Lang, MD—one of the world's leading experts in procedure hypnosis—and Eleanor Laser, PhD—clinical psychologist and international advocate of procedure hypnosis—drew on extensive controlled research with more than 700 patients, and 17 years of field experience in writing Patient Sedation Without Medication. "Lang and Laser really get it; patients' fears, their helplessness when caught in the midst of medical procedures, and the huge need of patients to be treated with dignity and

respect."- Judy Foreman, Nationally Syndicated Health Columnist Winner of the 2010 Arthur Shapiro Award for Best Book on Hypnosis- Patient Sedation Without Medication contains detailed ready-to-use examples, scripts, and authentic case studies to provide practical help for doctors, nurses, medical and radiological technologists, chiropractors, dentists, phlebotomists, physical therapists, and other caregivers. Also, the book will benefit patients who will learn how their well-being can be improved. The book prepares you for instant application of the techniques. In fact, you can begin practicing Patient Sedation Without Meditation techniques just minutes after reading the book!

Depression is a widespread condition affecting approximately 7.5 million parents in the U.S. each year and may be putting at least 15 million children at risk for adverse health outcomes. Based on evidentiary studies, major depression in either parent can interfere with parenting quality and increase the risk of children developing mental, behavioral and social problems. Depression in Parents, Parenting, and Children highlights disparities in the prevalence, identification, treatment, and prevention of parental depression among different sociodemographic populations. It also outlines strategies for effective intervention and identifies the need for a more interdisciplinary approach that takes biological, psychological,

behavioral, interpersonal, and social contexts into consideration. A major challenge to the effective management of parental depression is developing a treatment and prevention strategy that can be introduced within a two-generation framework, conducive for parents and their children. Thus far, both the federal and state response to the problem has been fragmented, poorly funded, and lacking proper oversight. This study examines options for widespread implementation of best practices as well as strategies that can be effective in diverse service settings for diverse populations of children and their families. The delivery of adequate screening and successful detection and treatment of a depressive illness and prevention of its effects on parenting

and the health of children is a formidable challenge to modern health care systems. This study offers seven solid recommendations designed to increase awareness about and remove barriers to care for both the depressed adult and prevention of effects in the child. The report will be of particular interest to federal health officers, mental and behavioral health providers in diverse parts of health care delivery systems, health policy staff, state legislators, and the general public.

Experts from across all industrial-organizational (IO) psychology describe how increasingly rapid technological change has affected the field. In each chapter, authors describe how this has

altered the meaning of IO research within a particular subdomain and what steps must be taken to avoid IO research from becoming obsolete. This Handbook presents a forward-looking review of IO psychology's understanding of both workplace technology and how technology is used in IO research methods. Using interdisciplinary perspectives to further this understanding and serving as a focal text from which this research will grow, it tackles three main questions facing the field. First, how has technology affected IO psychological theory and practice to date? Second, given the current trends in both research and practice, could IO psychological theories be rendered obsolete? Third, what are the highest priorities for both research

and practice to ensure IO psychology remains appropriately engaged with technology moving forward?

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care Child Health Nursing: Partnering with Children

& Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as

electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. High Acuity Nursing Cambridge University Press Sacred Playgrounds explores the wisdom of camping ministry for Christian education and faith formation, examining its rich history and fundamental characteristics with compelling stories, groundbreaking research, and theological grounding. Christian summer camp is an integral part of the ecology of faith formation in North America, though it has received surprisingly little attention in the scholarly community until now. Camping ministry is often dismissed as simple fun and games or a brief spiritual high that does not last. However, camp experiences often serve as deeply

relational and immersive faith experiences that have lasting impacts on participants. Five fundamental characteristics combine dynamically in the effective camp experience: participatory, faith-centered, safe space, relational, and unplugged from home. Together, they open the space for participants to consider new understandings of God, to have time for deep self-reflection, and to build intentional Christian community. These camp experiences are essential components in a larger ecology of faith formation, including the home and congregation. The insight and evidence presented in this book demonstrate that the contributions of camping ministry must be taken seriously among scholars, Christian educators, and ministry

professionals.

Critical Thinking TACTICS for Nurses: Achieving the IOM Competencies is a reader-friendly guide to performing, learning and evaluating critical thinking in all aspects of nursing care. Award winning authors M. Gaie Rubenfeld and Barbara K. Scheffer draw on their research and expertise in teaching and practice to blend critical thinking components with the Institute of Medicine's (IOM) five core competencies: patient-centered care, interdisciplinary team work, evidence-based practice, informatics, and quality improvement. Issues addressed include critical thinking language and awareness enhancement, the impact of critical thinking on quality care, mentoring the critical thinking of

staff and students and designing performance criteria for critical thinking. New to this edition: Significant updates and additional current references to all 5 IOM chapters. New Chapter 10 - Assessing Critical Thinking. New Chapter 11 - Thinking Realities of Yesterday, Today, and Tomorrow. Designated a Doody's Core Title and Essential Purchase! "Without question, this book should be on every nurse educator's bookshelf, or at least available through the library or nursing program office. Certainly, all graduate students studying to be nurse educators should have a copy." --Nursing Education Perspectives "This [third edition] is an

invaluable resource for theoretical and practical application of evaluation and testing of clinical nursing students. Graduate students and veteran nurses preparing for their roles as nurse educators will want to add this book to their library." Score: 93, 4 stars -- Doody's "This 3rd edition. . . has again given us philosophical, theoretical and social/ethical frameworks for understanding assessment and measurement, as well as fundamental knowledge to develop evaluation tools for individual students and academic programs." -Nancy F. Langston, PhD, RN, FAAN Dean and Professor Virginia Commonwealth University School of Nursing All teachers need to assess learning. But often, teachers are not well prepared to carry out the tasks related

to evaluation and testing. This third edition of *Evaluation and Testing in Nursing Education* serves as an authoritative resource for teachers in nursing education programs and health care agencies. Graduate students preparing for their roles as nurse educators will also want to add this book to their collection. As an inspiring, award-winning title, this book presents a comprehensive list of all the tools required to measure students' classroom and clinical performance. The newly revised edition sets forth expanded coverage on essential concepts of evaluation, measurement, and testing in nursing education; quality standards of effective measurement instruments; how to write all types of test items and establish clinical performance

parameters and benchmarks; and how to evaluate critical thinking in written assignments and clinical performance. Special features: The steps involved in test construction, with guidelines on how to develop test length, test difficulty, item formats, and scoring procedures Guidelines for assembling and administering a test, including design rules and suggestions for reproducing the test Strategies for writing multiple-choice and multiple-response items How to develop test items that prepare students for licensure and certification examinations Like its popular predecessors, this text offers a seamless blending of theoretical and practical insight on evaluation and testing in nursing education, thus serving as an invaluable resource for both educators

and students.

A supplement for a variety of junior/senior-level courses in Critical Care or Advanced Med-Surg Nursing courses and others throughout the nursing curriculum. Written by practicing nurses in acute care, this text provides students with a basic understanding of complex patients and the ability to provide nursing care across a variety of settings by using a series of reality-based, self-paced, self-contained modules that focus on multiple system problems frequently encountered in working with high acuity patients. Using a "nuts and bolts" approach, it addresses essentials by using examples, analogies, and metaphors; focuses on concepts and principles that can be applied across practice settings and patient populations; and includes nursing

diagnoses. The modules progress from simple to complex and contain pretests and posttests with answers, learning objectives, glossary, abbreviations, and review questions and answers.

Ati Teas Review Manual Springer Curriculum Development in Nursing Education, Second Edition continues its dedication to the advancement of nursing education, and in particular, to the ongoing development of relevant yet dynamic nursing education curricula. This Second Edition offers current, accessible, and comprehensive tips and tools and incorporates a balance of theoretical perspectives and practical applications. The Second Edition has

been completely revised and updated and includes an expanded focus on developing a context-relevant curriculum. A major determinant in any nursing education curriculum is the context in which the curriculum is developed and offered. This context is the professional, societal, health care, and educational situations to which the curriculum must respond, and is what makes each school's curriculum unique. Curriculum Development in Nursing Education helps nurse educators create a program of study that will meet the contextual needs of their individual setting. What's New: Expanded focus on developing a context-relevant curriculum New sections on educational technologies, distributed learning, and curriculum evaluation. New chapters on

preparing for external program review, building a curriculum, and evaluation of a curriculum.
