What do Casanova, Pope Pius XI, Benjamin Franklin and first lady Laura Bush have in common? At one time, all were members of the librarian profession. While librarians are often stereotyped as quiet, shy ladies who wear their gray hair in a dignified bun, that doesn't reflect the variety and diversity of today's library professionals. As of 2004, 159,000 people in the United States held the job of librarian. Although only 18 percent of that number was male, the median age for librarians was a young 47—far from the gray-haired, bun-wearing ladies of our imaginations! From pick-up lines to bumper stickers, this volume takes a light-hearted look at the many facets of the librarian occupation. Beginning with statistics, it enumerates gender divisions, personality types, salaries and educational requirements for various types of librarians including public, academic, school and special librarians. Other topics include specific occupational health risks, job-related recreation and novelty gifts for library professionals. Instances of librarians found in prose, poetry, film and musicals are also discussed.

It would be enough to recommend this astonishing, 45-volume set, first published in 1896, if it were merely a wonderfully massive compilation of the world's best writings from the world's best authors up until the advent of the 20th century. But A Library of the World's Best Literature is so much more than that. For this marvelous collection represents the evolution of human thought—the evolution of human civilization, even—as seen through the mind of one of the most important, if sadly almost forgotten, literary figures of the 19th century. Popular American essayist, novelist, and journalist CHARLES DUDLEY WARNER (1829-1900) was renowned for the warmth and intimacy of his writing, which encompassed travelogue, biography and

autobiography, fiction, and more, and influenced entire generations of his fellow writers. Here, the prolific writer turned editor for his final grand work, a splendid survey of global literature, classic and modern, and it's not too much to suggest that if his friend and colleague Mark Twain—who stole Warner's quip about how "everybody complains about the weather, but nobody does anything about it"—had assembled this set, it would still be hailed today as one of the great achievements of the book world. And so it still deserves to be. Arranged not chronologically but alphabetically, mostly under the names of authors but in some cases of literatures or special subjects—such as Icelandic literature or Arthurian legend—this set is no dry reference work. These eminently browsable volumes—available through Cosimo for the first time in decades in both paperback and hardcover editions—are meant to be read and enjoyed by anyone who loves the written word. Volume 45 features more synopses of notable works—from Adam Bede by George Eliot to Zury; The Meanest Man in Spring County by Joseph Kirkland—including many not previously referenced in the set but highlighted as well worth a serious reader's time and attention. This volume also includes a General Index to the 45-volume set.

The Age Demographics of Academic Librarians: A Profession Apart discusses the current demographics of librarianship in North America and examines how a huge retiree rate will affect the profession. With the average age of librarians increasing dramatically since 1990, this book examines the changes that will have to take place in your library, such as recruiting, training, and working with a smaller staff. The Age Demographics of Academic Librarians provides you with insights on how to make your library's transition easier when several of your colleagues leave your library. Valuable and intelligent, The Age Demographics of Academic Librarians discusses trends through easy-to-read charts, tables, and comprehensive data analysis. Exploring possible reasons for the anomalies of this trend, this book explores several surprising facts, such as: 16 percent of the 1995 American Research Libraries population of librarians will retire by the year 2000, another 16 percent between 2000 and 2005, 24 percent between 2005 and 2010, and 27 percent between 2010 and 2030, leaving the ARL lacking seasoned librarians the number of ARL cataloging librarians are decreasing, but the number of reference librarians seems to be increasing 54 percent of all ARL librarians who have twenty or more years of professional experience have worked at only one library in the course of their careers Canadian ARL librarians are older than their United States counterparts in 1990, 48 percent of ARL librarians were 45 years old or older; in 1994, the number increased to 58 percent The Age Demographics of Academic Librarians provides you with valuable insight into the unusual shape and movement of the academic librarian age profile as well as some speculation on its possible effects so you can predict how it will affect your library in the future and help you prepare to take preventative actions.

A Library of the World's Best Literature - Ancient and Modern - Vol. XLV (Forty-Five Volumes): Synopses of Famous Books & General Index Cosimo, Inc.

Beginning with the publication of their joint collection of poems Lyrical Ballads in 1798, William Wordsworth and Samuel Taylor Coleridge were instrumental in helping to establish the Romantic Movement as a major force in nineteenth century British literature. Two of the movement's greatest figures, they were responsible for composing some of the most well-known poems in the British literary canon and influenced generations of acolytes. They were also the foremost literary critics of the period, contributing influential writings on literary theory and philosophy — exemplified by Coleridge's Biographia Literaria. 'Routledge Library Editions: Wordsworth and Coleridge' assembles a wide range of scholarship and criticism that covers all aspects of their diverse output and charts the vicissitudes of their lives — examining their poetry, criticism, philosophy and sources of inspiration. It will also help introduce them to newer readers and explain notoriously difficult to understand works like Wordsworth's The Prelude. This set reissues 14 books originally published between 1960 and 1991 and will be of interest to students of literature and literary history.

Despite the stodgy stereotypes, libraries and librarians themselves can be quite funny. The spectrum of library humor from sources inside and outside the profession ranges from the subtle wit of the New Yorker to the satire of Mad. This examination of American library humor over the past 200 years covers a wide range of topics and spans the continuum between light and dark, from parodies to portrayals of libraries and their staffs as objects of fear. It illuminates different types of librarians—the collector, the organization person, the keeper, the change agent—and explores stereotypes like the shushing little old lady with a bun, the male scholar-librarian, the library superhero, and the anti-stereotype of the sexy librarian. Profiles of the most prominent library humorists round out this lively study.
