A Text-book of Histology Lippincott Williams & Wilkins

A strong grounding in basic histology is essential for all pathologists. However, there had always been a gap between histology and pathology in which histologic information specifically for the pathologist was often lacking. *Histology for Pathologists* deals with the microscopic features of normal human tissues, from the perspective of the surgical pathologist. This is the only text that uses human (vs. animal) tissues for the histology. It is the best reference in the literature for information on normal histology, and, as such, is essential for all clinical pathologists. Written by pathologists for pathologists, the new edition updates the pathologist's understanding of normal histology up to date with the incremental advances made in the last five years. The 3rd edition has become a "classic" purchased by virtually all residents beginning their pathology training, as well as pathologists in practice. The 4th edition builds on that substantial foundation. The table of contents remains essentially the same with the exception of some changes in authorship.

Bailey's Text-book of Histology Legare Street Press

High-yield histopathology reviews the relationships of basic histology to the pathology, physiology, and pharmacology of clinical conditions that are

tested on the USMLE Step 1 and seen in clinical practice.

Histology for Pathologists Lippincott Williams & Wilkins

The Second Edition presents a compact and concise alternative to the larger histology texts on the market today. Great for students with a limited

amount of time to devote to the subject. Improvements to the art program--adding more color and new illustrations--have been made to this edition. [High-yield Histology](#) Lippincott Raven

The only combination text/atlas in histology. Now in an updated Fourth Edition, this best-selling text and atlas is a brilliant presentation of histologic descriptions and high-resolution, full colour digital micrographs.

A Text-book of Histology Wentworth Press

A comprehensive histology atlas with EXTRAS! The unique Atlas of Histology with Functional and Clinical Correlations covers fundamental histology topics, integrates this essential information with clinical considerations, and provides multiple opportunities for student review. Explanatory text in each chapter combines with expanded figure legends to provide an atlas that can actually be read.

Histology Lippincott Williams & Wilkins

This updated Fourth Edition best-selling text and atlas is refined in several ways. Many chapters are completely revised, and nearly half of the photographs are new. There are approximately 189 atlas plates, and over 70 new illustrations. Textboxes read as "Clinical Correlation" or "Functional Correlation", and in the text, emphasis is placed on functional integration with increased coverage of cell and molecular biology. The sentence heading and four-color art have been retained from the previous edition.

Histology - A Text & Atlas Lippincott Williams & Wilkins

Combination text and atlas that emphasizes clinical and functional correlates of histology.
