Of all aspects of Roman culture, the gladiatorial contests for which the Romans built their amphitheatres are at once the most fascinating and the most difficult for us to come to terms with. They have

been seen variously as sacrifices to the gods or, at funerals, to the souls of the deceased; as a mechanism for introducing young Romans to the horrors of fighting; and as a direct substitute for warfare after the imposition of peace. In this original and authoritative study, Thomas Wiedemann argues that gladiators were part of the mythical struggle of order and civilisation against the

forces of nature, barbarism and law breaking, representing the possibility of a return to new life from the point of death; that Christian Romans rejected gladiatorial games not on humanitarian grounds, but because they were a rival representation of a possible resurrection. [European Warfare, 1494-1660](#) Skira The volume is divided into five parts, each including several chapters assigned to internationally renowned specialists who deal in an organic and modern manner with the most significant problems of knee replacement surgery. The authors have taken into

consideration the biomechanical features, the indications, and the surgical methods used. Furthermore, particular attention is paid to the selection of prostheses and to the attempts to reduce polyethylene wear and stress at the prosthesis/bone or prosthesis/cement/bone interface. **Scherma di bastone** Free Association Books Non è un romanzo, né una favola.

Non è una biografia, nemmeno un'auto-biografia. È, forse, tutte e quattro queste cose. O, piuttosto, non è niente di tutto questo. È, soprattutto, una storia. Quella di Alfio Antico, "u picuraro" diventato il dio del tamburo. «Alfio Antico è un patrimonio dell'umanità, dovrebbe essere riconosciuto dall'Unesco», diceva Carmen Consoli. Perché il musicista lentinese non

è un semplice ricercatore, né soltanto l'ultimo aedo di una cultura popolare. Alfio Antico è la "radica" di una cultura ancestrale. È anche il ta-ta-boum del Don Raffaè di Fabrizio De André. La sua vita sembra un romanzo verista di Verga, ma al contrario dei personaggi dello scrittore di Vizzini, Alfio non è un vinto. Un'infanzia povera, dura, di un ragazzo costretto a crescere in fretta per dare una mano alla

famiglia a causa di un padre malato. L'asprezza di un'adolescenza solitaria, trascorsa sulle montagne, ad ascoltare il vento, il suono della pioggia o delle campane del suo gregge. Per rifugiarsi nello scialle della nonna che con il suo magico tamburello scacciava i mostri della solitudine e della paura. Quei tamburi sarebbero diventati i suoi burattini. Perché Alfio Antico è il Mastro Geppetto della world music. I

suoi strumenti parlano. Dalle transumanze sui monti ai grandi teatri con Maurizio Scaparro e Peppe Barra; dall'Olimpo della musica con Eugenio Bennato, De André, Dalla, Branduardi, Arbore, Capossela, Carmen Consoli, Colapesce, Cesare Basile, sino alla cucina dello chef Carmelo Chiaramonte e al cinema di Pasquale Scimeca.

The dynamics of immigration, international commerce and the postcolonial world make it inevitable that much translation is done into a second language, despite the prevailing wisdom that translators should only work into their mother tongue. This book is the first study to explore the

phenomenon of translation into a second language in a way that will interest applied linguists, translators and translation teachers, and ESOL teachers working with advanced level students. Rather than seeing translation into a second language as deficient output, this study adopts an interlanguage framework to consider L2 translation as the product of developing competence;

learning to translate is seen as a special variety of second language acquisition. Through carefully worked case studies, separate components of translation competence are identified, among them the ability to create stylistically authentic texts in English, the ability to monitor and edit output, and the psychological attitudes that the translator brings to the task. While

the case studies mainly deal with Arabic speakers undergoing translator training in Australia, the conclusions will have implications for translation into a second language, especially English, around the world. Translation into the Second Language is firmly grounded in empirical research, and in this regard it serves as a stimulus and a methodological guide for

further research. It will be a valuable addition for advanced undergraduate and postgraduate students of applied linguistics, translation theory, bilingualism and second language acquisition as well as those involved in teaching or practicing translation at a professional level.

The Renaissance at War Toward the end of the fifteenth century, modern artillery and portable firearms became the signature weapons of European armies,

radically altering the nature of warfare. The new arms transformed society, too, as cities were built and rebuilt to limit the effects of bombardment by cannon. This book follows these far-reaching changes in comprehensive and fascinating detail and demonstrates how the innovations of the Renaissance paved the way to further changes in warfare. An in-depth technical look

at the weaponry of the age and the tactical drills that honed the skills of Renaissance soldiers The epic wars abroad between Western Christians and the Muslim Turks Civil strife at home between despotic rulers and rebellious forces Kingly duels that play out on an international stage The Flower of Battle Cambridge University Press Mounted encounters by

armored knights locked in desperate hand-to-hand combat, stabbing and wrestling in tavern brawls, deceptions and brutalities in street affrays, balletic homicide on the dueling field--these were the martial arts of Renaissance Europe. In this extensively illustrated book Sydney Anglo, a leading historian of the Renaissance and its symbolism, provides the first complete study of the

martial arts from the late fifteenth to the late seventeenth century. He explains the significance of martial arts in Renaissance education and everyday life and offers a full account of the social implications of one-to-one combat training. Like the martial arts of Eastern societies, ritualized combat in the West was linked to contemporary social and scientific concerns, Anglo shows. During the

Renaissance, physical exercise was regarded as central to the education of knights and gentlemen. Soldiers wielded a variety of weapons on the battlefield, and it was normal for civilians to carry swords and know how to use them. In schools across the continent, professional masters-of-arms taught the skills necessary to survive in a society where violence was endemic and life cheap.

Anglo draws on a wealth of evidence--from detailed treatises and sketches by jobbing artists to magnificent images by Dürer and Cranach and descriptions of real combat, weapons and armor--to reconstruct and illustrate the arts taught by these ancient masters-at-arms.

This collection of Sicilian poetry by Antonio

Lamberti is a beautiful tribute to the rich cultural heritage of the island. Written in Sicilian dialect, the poems explore a wide range of themes including love, nature, and the spiritual life. Q traces the

adventures and conflicts of two central characters: an Anabaptist, a member of the most radical of the Protestant sects and the anarchists of the Reformation, and a Catholic spy and informer, on their thrilling journey across Germany, Italy and the Netherlands. The four young writers who shelter behind the pseudonym Luther Blissett have created a world of intrigue, violence and intense

political and religious passion. Far from the traditional example of historical fiction, Q is the stuff of which cults are made. *Schools and Masters of Fence* Random House Hailed by Terry Eagleton in the Guardian as "definitive," this is the only complete and authoritative edition of Antonio Gramsci's deeply personal and vivid prison letters.

A revelatory guide to one of the oldest and most mysterious civilizations of the Mediterranean
With no written record of their own, the Nuragic civilization has long remained shrouded in mystery to contemporary scholars. The ancient Mediterranean civilization is thought to have occupied what is present-day Sardinia from the Bronze Age to 238 BCE, and it takes its name from the

Sardinian word for the monument considered most representative of the culture: the "nuraghe". A nuraghe is a towering fortress constructed of large stone slabs stacked on top of one another, rough-hewn or cut with varying degrees of regularity, each containing one or more chambers. Over 7,000 nuraghi dot the island, along with other structures such as

"sacred springs" and "giants' tombs." This book guides readers on a tour back in time through several European cities, exploring archaeological sites and uncovering the secrets of this enigmatic society with stunning photography accompanied by historical research. **Nuovo vocabolario Siciliano-Italiano** Houghton Mifflin Harcourt P This book is devoted to

results of the scientific research of bladed weapon technology used in Mexican criminal tradition compiled throughout four historical periods: pre-Columbian era; period of the Spanish colonization; war with America in the middle of the 19th century; Mexican mafia as a sample of the 20th and 21st century.
