The contents of this volume of essays in his honour gives a good overview of the fields in which Prof. Van Doorselaer has been active throughout his academic career. This book is especially an Album Amicorum, filled with reminiscences and intentions to continue the work. The voluminous size of this book may be considered as an adequate measure of the overall sympathy for Prof. Van Doorselaer. We hope that this publication may encourage him to remain active in the field of archaeology, and that the co-operation among colleagues, stimulated by this project, may be continued in the future.

El fundamento teórico de los cálculos catastrofistas es la teoría de Hubbert, que supone que la evolución histórica de la producción de un campo petrolífero sigue una distribución gaussiana. Según esta teoría, en cuanto un yacimiento alcanza un cenit, es posible prever su caída y calcular cuantos años de vida le quedan. Sin embargo eso no es así, ya

que la velocidad de disminución del rendimiento no es simétrica a la de su aumento y la producción histórica de la enorme mayoría de los yacimientos petrolíferos muestra una curva con varias mesetas de producción máxima, correspondientes a sucesivas etapas de resurrección de la producción gracias a la aplicación de modernas técnicas de Recuperación Mejorada, lo que genera un suave declive de la producción, manteniéndose durante muchos más años que lo previsto por la teoría de Hubbert. Pero el principal error de esta teoría es que, aunque fuese aplicable a un determinado yacimiento, es imposible que pueda extenderse a la producción de todo un país.

 "This paper presents new data from 150 countries showing that former cabinet members, central bank governors, and financial regulators are many orders of magnitude more likely than other citizens to become board members of banks. Countries where the politician-banker phenomenon is more prevalent have higher corruption and more powerful yet less accountable governments, but not better functioning financial systems. Regulation becomes more pro-banker where this happens more often. Furthermore, a higher fraction of the rents that are created accrue to bankers, former politicians are not more likely to be directors when their side is in power, and banks are more profitable without being more leveraged. Rather than supporting a public interest view, the evidence is consistent with a capture-type

private interest story where, in exchange for a non-executive position at a bank in the future, politicians provide for beneficial regulation. "-- World Bank web site.

Set in the near future, this action-packed YA novel—already optioned by Sony Pictures—will take readers out of this world and on a quest to become one of six teens sent on a mission to Jupiter’s moon. This is the next must-read for fans of *Illuminae* and *The Martian*. When Leo and Naomi are drafted, along with twenty-two of the world’s brightest teenagers, into the International Space Training Camp, their lives are forever changed. Overnight, they become global celebrities in contention for one of the six slots to travel to Europa—Jupiter’s moon—and establish a new colony, leaving their planet forever. With Earth irreparably damaged, the future of the human race rests on their shoulders. For Leo, an Italian championship swimmer, this kind of purpose is a reason to go on after losing his family. But Naomi, an Iranian-American science genius, is suspicious of the ISTC and the fact that a similar mission failed under mysterious circumstances, killing the astronauts onboard. She fears something equally sinister awaiting the Final Six beneath Europa’s

surface. In this cutthroat atmosphere, surrounded by strangers from around the world, Naomi finds an unexpected friend in Leo. As the training tests their limits, Naomi and Leo’s relationship deepens with each life-altering experience they encounter. But it’s only when the finalists become fewer and their destinies grow nearer that the two can fathom the full weight of everything at stake: the world, the stars, and their lives.

Treaties and Other International Acts Series

Taylor & Francis  
In fourteenth- and fifteenth-century Tibet there was great ferment about what makes enlightenment possible, since systems of self-liberation must show what factors pre-exist in the mind that allow for transformation into a state of freedom from suffering. This controversy about the nature of mind, which persists to the present day, raises many questions. This book first presents the final exposition of special insight by Tsong-kha-pa, the founder of the Ge-luk-pa order of Tibetan Buddhism, in his medium-length *Exposition of the Stages of the Path* as well as the sections on the

object of negation and on the two truths in his *Illumination of the Thought: Extensive Explanation of Chandrakirti's Supplement to Nagarjuna's "Treatise on the Middle."* It then details the views of his predecessor Dol-po-pa Shay-rap Gyel-tsen, the seminal author of philosophical treatises of the Jo-nang-pa order, as found in his *Mountain Doctrine*, followed by an analysis of Tsong-kha-pa's reactions. By contrasting the two systems—Dol-po-pa's doctrine of other-emptiness and Tsong-kha-pa's doctrine of self-emptiness—both views emerge more clearly, contributing to a fuller picture of reality as viewed in Tibetan Buddhism. Tsong-kha-pa's *Final Exposition of Wisdom* brilliantly explicates ignorance and wisdom, explains the relationship between dependent-arising and emptiness, shows how to meditate on emptiness, and explains what it means to view phenomena as like illusions.
