Numerologia Esoterica Spirituale

Cambridge, Mass. : MIT Press
The French poet and author of *Mount Analogue* shares a satirical allegory of the absurdities of intellectual society. As in Rene Daumal's cult classic *Mount Analogue*, *A Night of Serious Drinking* concerns an autobiographical protagonist on a mind-expanding journey. But rather than seeking enlightenment, the anonymous narrator recounts an evening getting drunk with a group of friends. As the party becomes intoxicated and exuberant, the narrator's wandering lead him from seeming paradises to the depths of pure hell. The characters our hero encounters go by absurd titles, such as Anthographers, Fabricators of useless objects, Scienters, Nibblists, and Clarificators. Yet the inhabitants of these strange realms are only too familiar: scientists dissecting an animal in their laboratory, a wise man surrounded by his devotees, politicians angling for influence, and poets expounding their rhetoric. Their hilarious antics and intellectual games reveal incisive social commentary that combines poetic imagination and philosophical depth. *The Celestine Prophecy* Abrams
Recent years have seen a spectacular rise of the New Age movement and an ever-increasing interest in its beliefs and manifestations. This fascinating work presents the first-ever comprehensive

analysis of New Age Religion and its historical backgrounds, thus providing the reader with a means of orientation in the bewildering variety of the movement. Making extensive use of primary sources, the author thematically analyses New Age beliefs from the perspective of the study of religions. While looking at the historical backgrounds of the movement, he convincingly argues that its foundations were laid by so-called western esoteric traditions during the Renaissance. Hanegraaff finally shows how the modern New Age movement emerged from the increasing secularization of those esoteric traditions during the 19th century. This ground-breaking publication is compulsive reading for all those involved or interested in the New Age movement.

In a probing analysis of the oldest Buddhist texts, Julius Evola places the doctrine of liberation in its original context. The early teachings, he suggests, offer the foremost example of an active spirituality that is opposed to the more passive, modern forms of theistic religions. This sophisticated,

highly readable analysis of the theory and practice of Buddhist asceticism, first published in Italian in 1943, elucidates the central truths of the eightfold path and clears away the later accretions of Buddhist doctrine. Evola describes the techniques for conscious liberation from the world of maya and for achieving the state of transcendence beyond dualistic thinking. Most surprisingly, he argues that the widespread belief in reincarnation is not an original Buddhist tenet. Evola presents actual practices of concentration and visualization, and places them in the larger metaphysical context of the Buddhist model of mind and universe. The Doctrine of the Awakening is a provocative study of the teachings of the Buddha by one of Europe's most stimulating thinkers.

Written in 1909 (CW 13) An authorized translation of this classic work, re-edited, beautifully typeset and designed, from a professional publisher dedicated to high-quality editions of Rudolf Steiner's books and lectures. The Anthroposophy of Rudolf Steiner is not a theoretical system, but the results of research based on direct observation. As Steiner's research was so vast and conducted over such a long period of time, no single book can be said to contain the whole of his spiritual teaching. However, of all his books Occult Science comes closest. Steiner even referred to it as "an epitome of anthroposophic Spiritual Science." The book systematically presents the fundamental facts concerning the nature and constitution of the human being and, chronologically, the history of the universe and humankind. Whereas the findings of natural science are derived from observations made through the senses, the findings of Spiritual Science, or Anthroposophy, are "occult" inasmuch as they arise from direct observation of realities hidden to ordinary perception. And yet these elements of humanity and the universe form the foundation of the sense world. A substantial part of Occult Science is taken up with a description of the preliminary training needed to make such spiritual observations. Given his energetic involvement in practical initiatives and extensive lecturing, Steiner had little time to write books. Of those he did write, four titles form an indispensable introduction to his later teaching: The Philosophy of Freedom (CW 4); Theosophy (CW 9); Knowledge of the Higher Worlds (CW 10); and Occult

Science: An Outline (CW 13). Occult Science: An Outline is a translation from German of Die Geheimwissenschaft im Umriss (GA 13).

This is a book of the key text of the Kabbalah, a work known as the Zohar ("Splendour"). The Zohar is a commentary on the Torah and although it is sometimes ascribed to a second-century rabbi, Simon Bar-Yochai, the form in which it is most widely known originates with Moses of Leon, a native of Granada, who died in 1305. The kabbalists believe that the undefinable origin of all things is Ein Sof - the cause of causes, the infinite, that which underlies everything. The universe emanates from the divine in successive layers called *esefiroti*. Everything exists in God, but God extends infinitely beyond existence. All we know and are is linked together, pervaded and maintained by the divine. According to this work, the light of God must be concealed in order to be revealed to creation. Even though the kabbalists believe that ultimately Ein Sof is beyond expression or understanding, the contemplation of God's presence in all things causes our thoughts to be purified.

One of René Guénon's lifelong quests was to discover, or revive, the esoteric, initiatory dimension of the Christian tradition. In the present volume, along with its companion volume *The Esoterism of Dante*, Guénon undertakes to establish that the three parts of *The Divine Comedy* represent the stages of initiatic realization, exploring the parallels between the symbolism of the *Commedia* and that of Freemasonry, Rosicrucianism, and Christian Hermeticism, and illustrating Dante's knowledge of traditional sciences unknown to the moderns: the sciences of numbers, of cosmic cycles, and of sacred astrology. In these works Guénon also touches on the all-important question of medieval esoterism and discusses the role of sacred languages and the principle of initiation in the Christian tradition, as well as such esoteric Christian themes and organizations as the Holy Grail, the Guardians of the Holy Land, the Sacred Heart, the Fedeli d'Amore and the 'Courts of Love', and the Secret Language of Dante. One chapter in the present volume, 'Christianity and Initiation', is of special interest with regard to the history of the Traditionalist School. When first published as an article, it gave rise to some controversy because Guénon here reaffirmed his denial of the efficacy of the Christian sacraments as rites of initiation, a point of divergence between the teachings of Guénon and those of other key perennialist thinkers. Both *The Esoterism of Dante* and *Insights into*

Christian Esoterism will be of inestimable value to all who are struggling to come to terms with the fullness of the Christian tradition.

Numerologia esoterica e spirituale. Come percepire il significato e il simbolo del numero e l'energia che racchiude in sé. Tecniche numeriche per riconoscere l'energia di ogni individuo ISBS

Un libro fatto di numeri, di passione e di misticismo dove le tecniche sono solo una conseguenza di questa ricerca. Lo scopo è la meravigliosa conoscenza attraverso lo strumento del numero, che porta meraviglia, stupore e illuminazione. Coloro che studiano la matematica ai massimi livelli sono in qualche modo costretti a confrontarsi con le energie spirituali, perché l'Uno è Dio e il Tutto. Se Dio è immanente e nascosto in tutta la Creazione, il numero è la Sua espressione esteriore. Tutto in natura obbedisce a leggi assolute, di cui il numero è la chiave di interpretazione. Ogni numero è una potenza a sé stante ed evoca una particolare energia e la rappresenta; in ogni numero è concentrata una grande quantità di nozioni, di similitudini, di corrispondenze, quindi, agire con i numeri è agire con l'energia, leggere i numeri, significa leggere il tipo di energia. La materialità è fatta di numeri. Tutto ciò che esiste è composto da vibrazioni, da cicli, da frequenze... ogni cosa ha un suo numero. Quindi, i numeri sono assolutamente essenziali per l'esistenza stessa della materia, così come è concepita a livello umano.

" Applied Magic is a selection of Dion Fortune's writings on the practical applications of magical and esoteric techniques. Everyone has the ability to

access the invisible planes of existence a whole kingdom of mind and spirit which cannot be perceived with the physical senses. Fortune provides invaluable guidance to anyone intent on increasing their inner awareness. She declares, Esoteric tradition admits of no exclusiveness; it is the very essence of its spirit that it blasphemes no God that has been hallowed by our devotion. It sees all religions as the expressions of our spirit rather than the personal revelation of a jealous God to His chosen people. It suffers from neither superstitious awe nor bigoted fear..."
