This book is the first of four volumes in the Handbook of Zoology series which treat the systematics and biology of Coleoptera. With approximately 350,000 described species, Coleoptera are by far the most species-rich order of insects and the largest group of animals of comparable geological age. The beetle volumes will meet the demand of modern biologists seeking to answer questions about Coleoptera phylogeny, evolution, and ecology. This first Coleoptera volume covers the suborders Archostemata, Myxophaga and Adephaga, and the basal series of Polyphaga, with information on world distribution, biology, morphology of all life stages (including

anatomy), phylogeny and comments on taxonomy.

Atlas Historique & Géographique Vidal-Lablache Walter de Gruyter

The Rādhā Tantra is an anonymous 17th century tantric text from Bengal. The text offers a lively picture of the meeting of different religious traditions in 17th century Bengal, since it presents a Śākta version of the famous Vaiṣṇava story of Rādhā and Kṛṣṇa. This book presents a critically edited text of the Rādhā Tantra, based on manuscripts in India, Nepal and Bangladesh, as well as an annotated translation. It is prefaced by an introduction that situates the text in its social and historical context and discusses its significance. The introduction also looks at the composition and metrics, vocabulary and grammar, and contents and doctrine of the text. It also includes a discussion of the extensive

intertextualities of the Rādhā Tantra, as well as the sources used for this edition. The Sanskrit text in Roman transliteration, following the standard IAST system, is then presented, followed by an English translation of the text. This book will be of interest to scholars of South Asian Religion, Tantric Studies and Religious History.
