Taxation for Decision Makers EPUB Student Package Wiley

This text is appropriate for a one-semester introductory tax course at either the undergraduate or graduate level in which the instructor emphasizes business planning and decision-making. The content of the text is highly compatible with the AICPA Model Tax Curriculum and is ideal for preparing students to take the revised computer-based CPA exam. Jones takes a different approach to the study of taxation than the traditional tax return preparation approach. This book teaches students to recognize the role taxes play in business and investment decisions. In addition, the book presents the general role of taxation and its implications across all taxpaying entities before discussing the details relevant to specific entities. This approach allows students to really grasp the

fundamental concepts that are the foundation for specific tax rules. The benefit is that the students will understand the framework of the tax system, even though specific tax rules and regulations change from year to year.

Taxation for Decision Makers Wiley

Managerial decisions are considerably influenced by taxes: e.g. the choice of location, buying or leasing decisions, or the proper mix of debt and equity in the company's capital structure increasingly demand qualified employees in an economic environment that is becoming more and more complex. Due to the worldwide economic integration and constant changes in tax legislation, companies are faced with new challenges – and the need for information and advice is growing accordingly. This book's goal is to identify and quantify possible tax effects on companies' investment strategies and financing policies. It does not focus on details of tax law, but instead seeks to address students and practitioners focusing on corporate finance, accounting, investment banking and strategy consulting.

Strategic Corporate Tax Planning McGraw-Hill/Irwin

Unlocking what drives tax morale – the intrinsic willingness to pay tax – can greatly assist governments in the design of tax policies and their administration, particularly in developing countries where compliance rates are low. This report builds on previous OECD research to identify some of the key socio-economic and institutional drivers of tax morale across developing countries, and seeks to test for evidence of the social contract by examining the impact of public services on tax morale. It also uses new data on tax certainty as an entry point to explore tax morale in businesses, where existing research is very limited. Finally, the report identifies a range of factors related to the tax system that may affect business decision making, how they vary across regions, and suggests some areas for future research. Overall, the report provides a range of suggestions for further work, and how tax morale considerations can be integrated into holistic tax compliance strategies.

This dissertation is comprised of three experimental studies that examine corporate tax aggressiveness through an investigation of judgment and decision making in the corporate tax environment. Studies 1 and 2 examine individual judgment involved in decision making (i.e., assessments of tax positions based upon tax scenario facts and tax authority). Study 1 examines how advice from external tax advisors and a tax advisor's association with the company's audit firm influences the aggressiveness of experienced in-house corporate tax decision makers. Study 2 examines how situational factors in the corporate tax environment interact with individual traits to affect individual-level tax aggressiveness, focusing in greater depth upon the process of individual judgment and decision making. Study 3 extends the investigation of situational factors from individual-level decision making to a group-level analysis, examining individual-level and group-level decision making in a tax setting (i.e., tax compliance decisions).
