What if, one step at a time, we could make our gardens and landscapes more eco-friendly? Barbara W. Ellis's colorful, comprehensive guide shows homeowners, gardeners, garden designers, and landscapers how to do just that for the large and beautiful Chesapeake Bay watershed region. This area includes Maryland, Virginia, Delaware, Washington, D.C., and part of West Virginia (translating to portions of USDA Zones 6, 7, and 8). Here, mid-Atlantic gardeners, from beginners to advanced, will find the essential tools for taking steps to make their gardens part of the solution through long-term planning and planting. The guide is built from the ground up around six simple but powerful principles that anyone can use: * Reduce lawn * Build plant diversity * Grow native plants * Manage water runoff * Welcome wildlife * Garden wisely Included are detailed instructions for assessing and designing your particular garden or landscape site; choosing and caring for trees, shrubs, vines, ground covers, and flowers; and succeeding with such conditions as shade or poor soil. From rain gardens to woodland gardens, meadow gardens to wildlife gardens, and much more, this indispensable guide features more than 300 color photographs.

The North Carolina Shore and Its Barrier Islands is the latest volume in the series, *Living with the Shore*. Replacing an earlier volume, this thoroughly new book provides a diverse guide to one of America's most popular shorelines. As is true for all books in the series, it is based on the premise that understanding the changing nature of beaches and barrier islands is essential if we are to preserve them for future generations. Evidence that the North Carolina shore is changing is never hard to find, but recently the devastation wrought by Hurricane Fran and the perilous situation of the historic lighthouse at Cape Hatteras have reminded all concerned of the fragility of this coast. Arguing for a policy of intelligent development, one in which residential and commercial structures meet rather than confront the changing nature of the shore, the authors have included practical information on hazards of many kinds--storms, tides, floods, erosion, island migration, and earthquakes. Diagrams and photographs clearly illustrate coastal processes and aid in understanding the impact of hurricanes and northeasters, wave and current dynamics, as well as pollution and other environmental destruction due to overdevelopment. A chapter on estuaries provides related information on the shores of back barrier areas that are growing in popularity for recreational residences. Risk maps focus on the natural hazards of each island and together with construction guidelines provide a basis for informed island management. Lastly, the dynamics of coastal politics and management are reviewed through an analysis of the controversies over the decision to move the Cape Hatteras

lighthouse and a proposed effort to stabilize Oregon Inlet. From the natural and historic perspective of the opening chapters to the regional discussions of individual barrier islands, this book is both a primer on coastal processes for the first time visitor as well as a guide to hazard identification for property owners.

The Dynamic Decade tells the story of the sweeping makeover of the 200-year-old campus of the University of North Carolina at Chapel Hill. Six million square feet of buildings were constructed and a million square feet of historic buildings were renovated during one vibrant ten-year period. This massive growth required bold thinking and a vision for combining historic preservation, green building, and long-range development. A statewide bond issue, award-winning designs, and unprecedented coordination between town and university made the vision a reality. Written by authors who held major planning roles, supplemented by interviews of key players, and lavishly illustrated with color photographs and maps, this comprehensive account offers valuable lessons to all concerned with sustainable university growth.

Linking the worlds of community development, higher education administration, and urban design, this accessible guidebook offers useful information on how universities and communities can best develop partnership projects. Its focus on smart growth projects further enhances its value for those interested in how urban, suburban, and rural growth can be accommodated while preserving open spaces and quality of life. Partnerships for Smart Growth includes 13 case studies for university-community collaborations on smart growth initiatives. The chapters include geographically diverse locations and urban, suburban, and rural projects. Each case includes a comprehensive discussion of how and why the project was initiated, who was involved, what techniques were employed, what were the pitfalls, and what was the outcome. The result is a book with wide appeal for university administrators, land-use planners and administrators, scholars, and community development experts.

The “riveting”* true story of the fiery summer of 1970, which would forever transform the town of Oxford, North Carolina—a classic portrait of the fight for civil rights in the tradition of *To Kill a Mockingbird* *Chicago Tribune On May 11, 1970, Henry Marrow, a twenty-three-year-old black veteran, walked into a crossroads store owned by Robert Teel and came out running. Teel and two of his sons chased and beat Marrow, then killed him in public as he pleaded for his life. Like many small Southern towns, Oxford had barely been touched by the civil rights movement. But in the wake of the killing, young African Americans took to the streets. While lawyers battled in the courthouse, the Klan raged in the shadows and black Vietnam veterans torched the town’s tobacco warehouses. Tyson’s father, the pastor of Oxford’s all-white Methodist church, urged the town to come to terms with its bloody racial history. In the end, however, the Tyson family was forced to move away. Tim Tyson’s gripping narrative brings gritty blues truth and soaring gospel vision to a shocking episode of our history. FINALIST FOR THE NATIONAL BOOK CRITICS CIRCLE AWARD “If you want to read only one book to understand the uniquely American struggle for racial equality and the swirls of emotion around it, this is it.”—Milwaukee Journal Sentinel “Blood Done Sign My Name is a most important book and one of the most powerful meditations on race in America that I have ever read.”—Cleveland Plain Dealer “Pulses with vital paradox . . . It’s a detached dissertation, a damning dark-night-of-the-white-soul, and a ripping yarn, all united by Tyson’s powerful voice, a brainy, booming Bubba profundo.”—Entertainment Weekly “Engaging and frequently stunning.”—San Diego Union-Tribune *The Papers of Archibald D. Murphey* UNC Press Books Utilizing case studies which cover all types of universities and institutions of higher learning throughout the world, this planning and design study illustrates how to create a university setting which is functional, attractive and accessible
