Get the scoop on reducing the environmental footprint of your furry friends. Eighty-three million dogs and ninety-six million cats call the United States home. Dogs alone produce enough waste to fill more than 1,091 football fields 1 foot deep in a single year. Add billions of plastic pick-up bags to the mix and season well with tons of litter box waste. Scoop a hefty portion into local landfills and seal it tightly to ensure optimal methane production. Clearly, this is a recipe for disaster. Dog and cat owners who trash their pets' offerings daily are in denial about how much waste is produced and what happens to it. Those who want to make the responsible choice often turn to the internet, only to find misleading, confusing, and contradictory information. The Pet Poo Pocket Guide will help you reduce your pet's environmental paw print with: Best practices for cycling pet waste back

to nature. Suggestions on how to tailor your approach based on location, situation, weather, needs, or available time. Instructions for using your composted pet waste safely to enrich your soil and nourish ornamental plants. With recycling tactics clearly indicated as "easy," "moderate," or "demanding," The Pet Poo Pocket Guide offers something for everyone. This no-nonsense guide is a must-read for any pet owner who is concerned about the environmental impact of their best friend, and is seeking a safe and practical solution. Rose Seemann is the owner and operator of EnviroWagg, a company dedicated to collecting and composting canine waste into safe, nutrient-rich garden soil. *Weaponizing Poop* Enslow Publishing, LLC

Every grownup knows that there is one universal topic that fascinates children without exception: poop and pee. But what they may not know is that throughout history, the products of our bladder and bowels have helped us to build houses, wash and dye our clothes, fertilize crops,

treat illnesses, solve crimes, control pollution, and create fuel, energy, and explosives. With just the right amount of humor, *The Scoop on Poop* - by Richard Platt, illustrated by John Kelly - uncovers the fascinating stories behind mankind's ingenious use of this most natural of resources, and young readers will love pouring over the droll illustrations and endearing characters that populate the pages. From wizards using 'magical urine', to soldiers fighting with exploding piles of dung, pee-wielding beauty therapists, and much, much more--this book uncovers the history and the science behind the one topic that unites us, young and old.

What's in poop is frequently on the no-no list to talk about, especially with younger children, just the opposite of what you will learn in this book. Admittedly, "So, how is your poop..." is probably never going to

become a favorite topic of dinner conversation. Yet, after you read this book you will not only be able to poo easier and healthier, you will naturally feel good about one of your body's most important daily productions.

What's the Scoop on Poop? Forge Books Information on how disease is spread and recommendation on policies and practices that should be instituted in child care settings to prevent disease, injury and environmental exposures.

Barf and Poop Triangle Interactive, Inc. The ultimate guide to individual- and community-scale composting in small urban spaces—with illustrations, expert tips, fun DIY projects, and much more. These days, everyone's talking about compost. Along with backyard chickeners, balcony beekeepers, rooftop farmers, and community gardeners, urban composters are part of a bumper crop of pioneers who are redefining the green space of crowded towns and cities. You may think you need a big yard to compost. Think again. Compost City teaches you how to easily choose and

care for a compost system that fits perfectly into your (tiny) space, (busy) schedule, and (multifaceted) lifestyle. Whether you live in a cramped apartment or a sprawling town house, or you dream of composting in a shared space with a group of friends or colleagues, Compost City provides simple and effective indoor and outdoor composting options. Packed with research, expert testimonies, and a healthy dose of humor, this guide will help you: • Compost your food scraps and yard waste with ease • Ease your fears of backbreaking labor, obnoxious odors, big messes, and creepy crawlies (hint: you can compost successfully without any of the above!) • Convince compost-wary family, friends, neighbors, and community leaders to green-light your compost dreams Compost City serves all eco-curious citizens from casual hobbyists to staunch activists. So put your compost cap on. Whether you compost one tea bag or whole honking barrels of scraps at a time, you're about to have a whole lot of fun.

Read Along or Enhanced eBook: *Poop! Ewwww! No, don't say "Ewwww."* Ask, "Whose poop is that?" This simple, and yes, charming book asks this question about seven examples of animal poop. By investigating visual clues, young readers can learn to identify the animal through its droppings. For instance, find a sample of poop with bits of bone and tufts of hair. Turn the page to learn it came from a fox! Kelsey Oseid's illustrations are both accurate and beautiful. Backmatter includes further information about the poop and what scientists can learn from an animal's droppings. From the Hardcover edition.

From potty-training expert and social worker Jamie Glowacki, who's already helped over half a million families successfully toilet train their preschoolers, comes a newly revised and updated guide that's "straight-up, parent-tested, and funny to boot" (Amber Dusick, author of *Parenting: Illustrated with Crappy Pictures*). Worried about potty training? Let Jamie Glowacki, potty-training expert, show you how it's done. Her six-

step, proven process to get your toddler out of diapers and onto the toilet has already worked for tens of thousands of kids and their parents. Here's the good news: your child is probably ready to be potty trained EARLIER than you think (ideally, between 20–30 months), and it can be done FASTER than you expect (most kids get the basics in a few days—but Jamie's got you covered even if it takes a little longer). If you've ever said to yourself: -How do I know if my kid is ready? -Why won't my child poop in the potty? -How do I avoid "potty power struggles"? - How can I get their daycare provider on board? -My kid was doing so well—why is he regressing? -And what about nighttime?! Oh Crap! Potty Training can solve all of these (and other) common issues. This isn't theory, you're not bribing with candy, and there are no gimmicks. This is real-world, from-the-trenches potty training information—all the questions and all the answers you need to do it once and be done with diapers for good.

"Finally ! A straight forward, easy-to-read, entertaining guide to good digestive health. With the assistance of Scoop The Poop, intrepid reporter, this empowering bathroom book will help you make a perfect poo. What is the perfect poo made of? What are the ingredients to a perfect poo? Learn the four major building blocks to a perfect poo and how they

can make a perfect you. What happens when you don't poo? Learn how failure to eliminate waste is like a garbage strike in the dead of summer. All that trash just sits and swelters on the 98-degree sidewalk. As it rots, ammonia gas builds up, emitting foul odors. How do you make a perfect poo? Learn the secrets to making a perfect poo. It's not as hard as you think, and you should be making peerless poos in no time. Anne Ferguson takes the reader on a comprehensive, stepwise journey to proper digestion, explaining the importance of proper elimination. This book puts focus on the principle of 'what goes in must, come out' and its relationship to a healthy, functioning body which is the mainstay of a naturopathic approach and disease prevention. The Scoop on Poop, is a great addition to any health-minded household or individual who has an interest in knowing the 'scoop' on proper elimination and how it reflects on our health from the inside out." -Dr. Michelle J. I woke up in the morning in a zombie state. I struggled to get the kids off to school. I talked myself into getting ready for work. I packed lunches, checked backpacks, planned crock pot meals, and wished I was somewhere else. Yes, that's right. I wished I was somewhere other than my kitchen listening to my children fight over the last pack of fruit snacks. I dreamt about a life that was less stressful and more enjoyable. These thoughts made me cry on the way to drop off my kids at school. These thoughts made me feel like a terrible person. These thoughts made me feel like I was the worst Mother on the planet. I was ashamed to have these thoughts. I felt like I was failing at life. I was overworked, under appreciated, and dreaming of wanting more. Why wasn't I happy? Life seemed to be

a chronic shit storm and I was the imbecilic meteorologist who forgot her umbrella. I decided that I needed to chase my dreams. I decided I had to find a way to scoop the poop and find my passion.

beaches. Scientists have discovered that around 70 percent of white sand found on beaches comes from parrot fish poop. Parrot fish have bird-like beaks that can bite off pieces of coral. They chew the coral into tiny particles, digest the algae that grows on it, and poop out what they no longer need; streams of white coral sand. This fascinating book will help readers understand the value of poop in creating beaches, as well as the important role parrot fish play in the ecological system they live in.
