Builder's Handbook Wolfgang Publications
The urge has found you daydreaming more than once. The urge to define, bend, shape, fabricate, invent, shove, break. To slide your leg over the seat you finally got back from the leather shop. To twist back the throttle grip you wrapped yourself. To lunge into the darkness of an open highway on a creation all your own. More than a motorcycle, this is about your

identity. It's about building something as unique as you are. In *The Build*, Robert Hoekman Jr compiles insights from today's best builders to help you plot out your own beautiful beast. Loaded with photos, *The Build* features firsthand advice from the masters of moto design, including John Ryland (Classified Moto), Alan Stulberg (Revival Cycles), Jared Johnson (Holiday Customs), Jarrod DelPrado (DP Customs), and the legendary Max Hazan (Hazan Motorworks). You've seen what can be done. It's time to do it yourself. Get *The Build*.

Choppers Motorbooks International
In the old days all a person needed to build a killer custom motorcycle was a bike, a set of tools, a little know-how, and a creative vision. But with the rise of the high-dollar, haute moteur Gucci choppers, the true custom bike has gotten out of most riders' reach, right? Dead wrong. In this book Jose de Miguel, a custom builder from way back, sets out to prove that those good old days never ended. In the clearest and simplest terms, he shows readers how they can turn odds and ends found around the shop into one-off

motorcycle parts--and make a cheap, run-of-the mill custom build into a drop-dead show stopper. Following de Miguel's lead, along with his straightforward illustrations, any resourceful owner with rudimentary mechanical skills, a basic tool kit, and--most importantly--a modicum of imagination can build the bobber of his dreams for less than the price of a new bike.

How to Build a Motorcycle leads you through all the key stages - from initially finding the right project for your skill level, to sourcing a base bike and safely taking on some full-on bike-building tasks. With clear, easy-to-follow instructions, proper advice and specially commissioned step-by-step illustrations throughout it is an ideal aid to getting your hands oily. Written by Gary Inman, the co-founder of independent motorcycle magazine Sideburn, and illustrated by Adi Gilbert who is best known for his bicycle and motorcycle drawings whose clients include Harley-Davidson, Guy Martin, Wired magazine, Sideburn magazine and Nike, this is a must-have for all motorcycle

lovers. Read this book, even dip in and out where relevant. If it makes sense, schedule some time, clear your mind, pull on some old clothes, grab your toolbox and get going. The chapters in How to Build a Motorcycle will tell you how to complete a huge variety of tasks that will allow even the greenest of novices to get their hands dirty and start modifying with purpose. If you belong to this camp, start with some of the low-input, high-reward jobs, such as fitting bars, swapping the rear shocks or wiring in a new tail light. Even though these require relatively little work, they'll transform the look of your bike, and completing them will fill you with confidence to undertake the more difficult jobs, such as fitting more modern front forks or even making your own frame. The book comes with a glossy 32-page section on finished bikes and is a reference and the perfect gift for all fans, from those who merely like to tinker, to riders taking on a full build.

There are some people who've done little. There are some people who've done a lot. There are others who've done more than

that. Then there was Colin Seeley. He'd done more than pretty much everyone. Colin passed away just after his 84th birthday. He packed so much into his life, which began on January 2, 1936, when he was born in Kent, the only child of Percy and Hilda. By 20 Colin was running his own business, soon after he was racing, and just two years into his career, was a podium finisher at the IoM TT. Aged 30, he was a motorcycle manufacturer, then going on to all manner of other disciplines, including running car racing Formula One teams. Post that, he was a successful ace team manager and mentor to young riders, before going on to work for auctioneers Bonhams becoming one of the company's foremost and most trusted consultants. During recent years, Colin had been a popular figure at classic events far and wide, often demonstrating period machines, eyes twinkling and lips smiling, enduringly positive, endearingly modest, and always full of enthusiasm. He pretty much did it all.

None more so than Torque himself - who's just put his baby in her belly. BLUE I stopped believing in love a long time ago. My mother ran off with a biker when I was young. That's how I knew those outlaws were nothing but scum. She took with her my faith in romance, in the idea of a family. She broke my trust into a million tiny pieces. And all she left behind was the massive chip on my shoulder. I thought I'd be this numb forever. But then

Torque came into my tattoo shop... And showed me how wrong I was. TORQUE I can see it in her eyes: She's scared of me. With good reason, too. I've got the ink and the scars to match my reputation as a cold-blooded killer. My whole persona screams, "Don't mess with me." But Blue must not have got the memo. Because she's messing with me in a very serious way. She's making me feel things that I've buried for a real long time. And there's no telling what'll happen when all this erupts.
