An Economist Book of the Year, 2001. In the 18th century, a debate ensued over the French naturalist Buffon's contention that the New World was in fact geologically new. Historians, naturalists, and philosophers clashed over Buffon's view. This book maintains that the "dispute" was also a debate over historical authority: upon whose sources and facts should naturalists and historians reconstruct the history of the New World and its people. In addressing this question, the author offers a strikingly novel interpretation of the Enlightenment.

This is the first book to tell the fascinating history of the region in western Ohio which became the city of Wapakoneta before it was

settled by white settlers and became the birthplace of Neil Armstrong. It covers the time period from 300 million years ago when this site was on the equator to 1832 and 1833 when the Shawnee Indians who lived there were removed to the Indian lands west of the Mississippi River. The book talks about the great river that flowed through that area before the mile-thick glaciers terraformed the landscape to what we see today. It then proceeds to provide the details of the earliest maps of the area made by the first explorers of European descent into the Ohio Country as well as the earliest French and British trading posts and forts in the Ohio Country. This includes information never published before about Fort Au Glaize built along the Auglaize River in 1748 in Wapakoneta. It also provides details of the Ohio Indians focusing on the Shawnees and tracing their movements in Ohio up to the time they were placed on reservations. The Wapakoneta Shawnee Reserve was the site of two Shawnee council houses which are highlighted in the book. Shawnees whose interesting exploits are covered include Black Hoof, Tecumseh and his brother, The Prophet, Logan and Blue Jacket. The book also provides some details of the lives of Francis Duchouquet, their interpreter, and John Johnston, their government agent. To place all the events in perspective, 19 chronologies and timelines are provided. Throughout, the book reveals interesting and surprising connections between Neil Armstrong and the people, places and

events in this very early history. The book is supplemented with 78 figures, 47 tables and 10 appendices.
