This book pays tribute to 25 Singaporean South Asians who pioneered and excelled in their respective fields from 1950 to 2015. It is meant to be a 'quick take' on 25 Singaporean South Asian personalities, across a broad spectrum of professions and activities, who believed in the value and virtue

of service to the community and gave the best of themselves. They had a sense of mission in their professions, dedicated to what they were doing and fostered a sense of community and nation. Many of them laid foundations that triggered the transformation of the island, including sportspeople whose records have stood the test of time. They were a people of their time whose work many may not know but which we hope will inspire others. This book is timely, for those who want to get a snapshot appreciation of the contributions of Singaporean South Asians.

RAJEEV BANSAL

In this collection of 15 essays, educators describe successful programs they've developed to fulfill the US National Science Education Standards' vision for the reform of teaching assessment, professional development, and content at the high school level. All the visions correspond with the Less Emphasis and More Emphasis conditions that conclude each section of the Standards, characterizing what most teachers and programs should do less of as well as describing the changes needed if real reform is to occur. Essay titles reveal the range of programs, and

creativity, this book encompasses. Among the titles are: "Technology and Cooperative Learning: The IIT Model for Teaching Authentic Chemistry Curriculum," "Modeling: Changes in Traditional Physics Instruction," "Guided by the Standards: Inquiry and Assessment in Two Rural and Urban Schools," and even "Sing and Dance Your Way to Science Success." The book ends with a summary chapter by editor Robert Yager on successes and continuing challenges in meeting the Standards' visions for improving high school science. As Yager notes, "The exemplary programs described in this monograph give inspiration while also

providing evidence that the new directions are feasible and worth the energy and effort needed for others to implement changes.

This book reports on cutting-edge research concerning social practices. Merging perspectives from various disciplines, including philosophy, biology, psychology and cognitive science, and economy, it discusses theoretical aspects of social behavior along with models to investigate them, and presenting key case studies as well. Further, it

describes concepts related to habits, routines, and rituals and examines important features of human action, such as intentionality and choice, exploring the influence of specific social practices in different situations. Based on a workshop held on April 2022 at the World Congress on Universal Logic (UNILOG 22), in Crete, and including additional invited chapters, the book offers fresh insights into the fields of social practice and the cognitive, computational, and philosophical tools to understand them.
