Three things I've learned this week: 1) Never fall for a client 2) Never fall for your best friend 3) And most importantly, never fall for your back-up guy ...especially if they're all the same person. Zara Huntington-Ross wants to get married. She's had more dating disasters than you can poke a long-stemmed red rose at. But she needs a safety net, someone to fall back. So, she agrees to a pact with her best friend, Asher McMillan: if neither of them are married by the time she turns 35, they'll get hitched. That's five full years of searching for The One. Surely she'll meet Mr. Right by then? The problem is she doesn't know Asher quite as well as she thinks. Taking a job redecorating his bachelor pad, Zara learns he has hidden depths—depths that tug at her heartstrings. Hard. And then disaster strikes. She starts to develop feelings for him, the guy who doesn't do relationships. It's getting complicated, and Zara doesn't need complicated. But could her back-up guy be The One after all? Never Fall for the Back-Up Guy is the first book in the It's Complicated series and can easily be read as a standalone novel. It is a spin-off of the Love Manor Romantic Comedy series. Catch up with all your favorite Love Manor characters and meet some new ones in this fun, laugh-out-loud rom com with a smart and sassy British heroine and a swoon-worthy American hero.

Winner of the Oregon Book Award for General Nonfiction and Los Angeles Times bestseller "It makes good music sound better."-Janet Maslin in The New York Times "A fascinating look into the West Coast recording studio scene of the '60s and the inside story of the music you heard on the radio. If you always assumed the musicians you listened to were the same people you saw onstage, you are in for a big surprise!"-Dusty Street, host of Classic Vinyl on Sirius XM Satellite Radio If you were a fan of popular music in the 1960s and early '70s, you were a fan of the Wrecking Crew—whether you knew it or not. On hit record after hit record by everyone from the Byrds, the Beach Boys, and the Monkees to the Grass Roots, the 5th Dimension, Sonny & Cher, and Simon & Garfunkel, this collection of West Coast studio musicians from diverse backgrounds established themselves in Los Angeles, California as the driving sound of pop music—sometimes over the objection of actual band members forced to make way for Wrecking Crew members. Industry insider Kent Hartman tells the dramatic, definitive story of the musicians who forged a reputation throughout the business as the secret weapons behind the top recording stars. Mining invaluable interviews, the author follows the

careers of such session masters as drummer Hal Blaine and keyboardist Larry Knechtel, as well as trailblazing bassist Carol Kaye—the only female in the bunch—who went on to play in thousands of recording sessions in this rock history. Readers will discover the Wrecking Crew members who would forge careers in their own right, including Glen Campbell and Leon Russell, and learn of the relationship between the Crew and such legends as Phil Spector and Jimmy Webb. Hartman also takes us inside the studio for the legendary sessions that gave us Pet Sounds, Bridge Over Troubled Water, and the rock classic "Layla," which Wrecking Crew drummer Jim Gordon cowrote with Eric Clapton for Derek and the Dominos. And the author recounts priceless scenes such as Mike Nesmith of the Monkees facing off with studio head Don Kirshner, Grass Roots lead guitarist (and future star of The Office) Creed Bratton getting fired from the group, and Michel Rubini unseating Frank Sinatra's pianist for the session in which the iconic singer improvised the hit-making ending to "Strangers in the Night." The Wrecking Crew tells the collective, behind-the-scenes stories of the artists who dominated Top 40 radio during the most exciting time in American popular culture.

Pulitzer Prize winner Tracy Kidder memorably records the drama, comedy, and excitement of one company's efforts to bring a new microcomputer to market. Computers have changed since 1981, when *The Soul of a New Machine* first examined the culture of the computer revolution. What has not changed is the feverish pace of the high-tech industry, the go-for-broke approach to business that has caused so many computer companies to win big (or go belly up), and the cult of pursuing mind-bending technological innovations. *The Soul of a New Machine* is an essential chapter in the

history of the machine that revolutionized the world in the twentieth century.

Backup after the Beat should be compulsory reading for first responders, whether serving or retired, professional or civilian, as well as those closest to them. Author Steve Eastin is a retired cop with eighteen years' service under his belt. After retirement and looking forward to enjoying life with his family, he found his time on the beat wasn't quite done. Without realizing it, this tough professional found himself firmly in the grip of the terrifying and potentially lethal Post Traumatic Stress Disorder (PTSD). You'd better believe PTSD is real: Steve challenges the deniers and haters, showing how first responders are our front line against chaos. Daily confronted by the unbelievable, the inconceivable, the unspeakable—they risk their lives to protect us in the face of the human talent for evil. Physically tough, resilient, and skilled at staying alive, how do these extraordinary human beings mentally cope when responding to emergency calls with no idea what fresh hell awaits them or their officers once on scene? For them, the horrors can't be unseen and, if untreated, the psychological effects of PTSD can resonate for years to come, with some resorting to suicide. Steve is now determined to help prevent other first responders and their families suffering from the malign effects of PTSD. Based on his own experiences, those of colleagues, and family members, he reveals the unacknowledged truth about first responder roles, while laying bare the potential psychological cost of being on the beat—even years into retirement. This book is a must-read for retired, serving, and future first responders, and anyone interested in the effects of PTSD. When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this text is written that makes you feel and respond the way you do?
