German Protestant and Anglican experts outline and explain the different understandings of episcopacy and oversight which arose during the German and English reformations, and how these have developed since. Their contributions draw on research presented at the second conference held under the Meissen Agreement.

This book explores the part played by music, especially group singing, in the Protestant reforms in Strasbourg. It considers both ecclesiastical and 'popular' songs in the city, how both genres fitted into people's lives during this time of strife and how the

provision and dissemination of music affected the new ecclesiastical arrangement.

*The Oxford Handbook of Governance and Limited Statehood*  
Canongate Books

Unpacking the major debates, this Oxford Handbook brings together leading authors of the field to provide a state-of-the-art guide to governance in areas of limited statehood where state authorities lack the capacity to implement and enforce central decision and/or to uphold the monopoly over the means of violence. While areas of limited statehood can be found everywhere - not just in the global South -, they are neither ungoverned nor ungovernable. Rather, a variety of actors maintain public order and safety, as well as provide public goods and services. While external state 'governors' and their interventions in the global South have received special scholarly attention, various non-state actors - from NGOs to business to violent armed groups - have emerged that also engage in governance. This evidence holds for diverse policy fields and historical cases. The Handbook gives a comprehensive picture of

the varieties of governance in areas of limited statehood from interdisciplinary perspectives including political science, geography, history, law, and economics. 29 chapters review the academic scholarship and explore the conditions of effective and legitimate governance in areas of limited statehood, as well as its implications for world politics in the twenty-first century. The authors examine theoretical and methodological approaches as well as historical and spatial dimensions of areas of limited statehood, and deal with the various governors as well as their modes of governance. They cover a variety of issue areas and explore the implications for the international legal order, for normative theory, and for policies toward areas of limited statehood.

This newly revised and enlarged edition of John Witte's authoritative historical study explores the interplay of law, theology, and marriage in the Western tradition. Witte uncovers the core beliefs that formed the theological genetic code of Western marriage and family law. He explores the systematic models of marriage developed by Catholics, Lutherans, Calvinists, Anglicans, and Enlightenment thinkers, and the transformative influence of each model on Western marriage law. In addition, he traces the millennium-long reduction of marriage from a complex spiritual, social, contractual, and natural institution into a simple private contract with freedom of entrance, exercise, and exit for husband and wife alike. This second edition updates and expands each chapter and the bibliography. It also includes three new chapters on classical, biblical, and patristic sources.

Jennifer Anna Gosetti-Ferencei demonstrates that the exotic, as reflected in major works of German literature and in the philosophy and art that inspires it, provokes central questions about the modern self and the spaces it inhabits. Exotic spaces in the writings of such authors as Thomas Mann, Franz Kafka, Stefan Zweig, Robert Musil, Hugo von Hofmannsthal, Gottfried Benn, and Bertold Brecht, along with the thought of Nietzsche, Freud, Levi-Strauss, and Simmel and the art of German Expressionism, are shown to present alternatives to the landscape and experience of modernity. In an examination of the concept of the exotic and of spatial experience in their cultural, subjective, and philosophical contingencies, Gosetti-Ferencei shows that exotic spaces may contest and reconfigure the relationship between the familiar and the foreign, the self and the other. Exotic spaces may serve not only to affirm the subject in a symbolic conquering of territory, as emphasized in post-colonial interpretations, or project the fantasy of escapism to a lost paradise, as utopian readings suggest, but condition moral, aesthetic, or imaginative transformation. Such transformation, while risking disaster or dissolution of the self as well as endangerment of the other, may promote new possibilities of perceiving or being, and reconfigure the boundaries of a familiar world. As exotic spaces are conceived as mystical, liberating, erotic, infectious, frightening or mysterious, several possibilities for transformation emerge in their exposure: re-enchantment through epiphany; the collapse of the rational self; liberation of the imagination from the confines of the familiar world; and aesthetic transformation, revealing the paradoxically 'primitive' nature of modern experience. In strikingly original readings of canonical authors and compelling rediscoveries of forgotten ones, this study establishes that exotic experience can evidence the fragility of the European or Germanic self as depicted in modernist literature, revealing the usually unconsidered boundaries of the subject's own familiar world.

This study addresses the topics of literacy and textuality in order to develop a new line of interpretation for a landmark of Middle High German literature. Albrecht's *Der jüngere Titurel* is an intellectually ambitious narrative written ca. 1270 as a prequel and sequel to the more famous Arthurian texts by Wolfram von Eschenbach.

This voluminous work on Church History by Philip Schaff (1819-1893) was originally published between 1858 and 1893 in eight volumes in the USA and covers the period from the beginnings of Biblical Christianity in A.D. 1 to the History of the Reformation in Germany and Switzerland (1517-1648). Being still a popular text in North America, this work had been out of print for over a century and has now been carefully edited and reformatted for republication in four volumes, each of them containing the text of two volumes of the original edition. Schaff's work, unlike other works in the field, covers a multitude of church history-related aspects - from church doctrine, policy, events and processes to aspects of social moral and family life, arts and more. This is the fourth and final volume in this series and is a special edition covering the period of the Reformation from 1517-1648 that ends with the Peace Treaty concluded 1648 in Münster, Westphalia, following the long period of the Thirty-Year War.

"The New Testament on marriage and divorce has exercised a deep influence upon Western civilisation. This is especially the case with the logia on divorce which are recorded in the Gospels of Matthew v. 32, XIX 3—12, Mark X. 2—12 and Luke XVI. 18. The Apostle Paul deals with the subject in 1 Corinthians VII. 1—15. Within the Christian churches the statements in these texts are

considered authoritative concerning the questions of whether or not marriage is indissoluble, and whether divorce and remarriage are allowed for one or several reasons. The purpose of this study is to examine the interpretation of the New Testament divorce texts during the Reformation period. The significance of the exegetical results achieved by the reformers can be appreciated only in the light of the medieval sacramental concept of marriage and the work of the Christian humanists; accordingly, the investigation begins with an examination of these two subjects, as well as the reaction of Roman Catholic exegetes to the interpretation of Erasmus. The interpretations of Luther and his associates and those of the prominent Reformed theologians follow. The works of representative English theologians have been studied, beginning with William Tyndale and Thomas Cranmer and ending with John Milton, whose works on divorce from an exegetical point of view terminate a period during which the meaning of the divorce texts was explored." -From the Foreword

At the occasion of the 450th anniversary of the Heidelberg Catechism, an international conference on the spirituality of the Heidelberg Catechism was held at the Theological University Apeldoorn, 21-22 June 2013. This publication offers the plenary papers presented, and a selection of the short papers. While the papers center on the Catechism's spirituality, a wide range of topics is covered, from both historical and theological perspectives. These topics include: the roles of Ursinus and Olevianus, controverse theologians, anabaptist spirituality, comparisons with Calvin's Genevan Catechism and the later Synopsis of Purer Theology. Also, the distinct spirituality of faith, regeneration, the trinity, the law and prayer in the Heidelberg Catechism are scrutinized, besides the idea of mystical union and the art of dying and living. Three contributions reflect on the controversy on the Eucharist which has stamped the Heidelberg Catechism. From a practical-theological perspective, the preaching and teaching of the Catechism are discussed, as well as the mode of gospel presentation and the permanent character of catechetical instruction. So, this volume offers a broad range of scholarly perspectives on the Catechism. Its spirituality is famous for the first question and answer, on the only comfort in life and death: That I am not my own, but belong - body and soul, in life and in death - to my faithful Savior, Jesus Christ."

Paul was the most influential figure in the early Christian church. In this epistle, written to the founders of the church in Rome, he sets out some of his ideas on the importance of faith in overcoming mankind's innate sinfulness and in obtaining redemption. With an introduction by Ruth Rendell.

What was the Holy Roman Empire in the fourteenth to sixteenth

centuries? At the turning point between the medieval and early modern periods, this vast Central European polity was the continent's most politically fragmented. The imperial monarchs were often weak and distant, while a diverse array of regional actors played an autonomous role in political life. The Empire's obvious differences compared with more centralized European kingdoms have stimulated negative historical judgements and fraught debates, which have found expression in recent decades in the concepts of fractured 'territorial states' and a disjointed 'imperial constitution'. *Associative Political Culture in the Holy Roman Empire* challenges these interpretations through a wide-ranging case study of Upper Germany — the southern regions of modern-day Germany plus Alsace, Switzerland, and western Austria — between 1346 and 1521. By examining the interactions of princes, prelates, nobles, and towns comparatively, *Associative Political Culture in the Holy Roman Empire* demonstrates that a range of actors and authorities shared the same toolkit of technologies, rituals, judicial systems, and concepts and configurations of government. Crucially, Upper German elites all participated in leagues, alliances, and other treaty-based associations. As frameworks for collective activity, associations were a vital means of enabling and regulating warfare, justice and arbitration, and even lordship and administration. On the basis of this evidence, *Associative Political Culture in the Holy Roman Empire* offers a new and more coherent depiction of the Holy Roman Empire as a sprawling community of interdependent elites who interacted within the framework of a shared political culture.

For many years, scholars struggled to write the history of the constitution and political structure of the Holy Roman Empire. This book argues that this was because the political and social order could not be understood without considering the rituals and symbols that held the Empire together. What determined the rules (and whether they were followed) depended on complex symbolic-ritual actions. By examining key moments in the political history of the Empire, the author shows that it was a vocabulary of symbols, not the actual written laws, that formed a political language indispensable in maintaining the common order.

Essays on West German, East German and Swiss-German authors who experienced Nazi rule and World War II as adults. Entries examine these writers coming to terms with the experience of fascism, and how they were often the conscience of a society that was inclined to forget its recent past. The lives and works of these writers provide an insight not only into German literature but also into several decades of German history.
