Reference Guide to American Literature McGraw-Hill Higher Education
 The transition from hunting and gathering to farming – the Neolithic Revolution – was one of the most significant cultural processes in human history that forever changed the face of humanity. Natu an communities (15,100–12,000Cal BP) (all dates in this chapter are calibrated before present) planted the seeds of change, and the Pre-Pottery Neolithic (PPN) (ca. 12,000–ca. 8,350Cal BP) people, were the first to establish farming communities. The revolution was not fully realized until quite late in the PPN and later in the Pottery Neolithic (PN) period. We would like to ask some questions and comment on a few aspects emphasizing the linkage between biological and cultural developments during the Neolithic Revolution. The biological issues addressed in this chapter are as follows: × Is there a demographic change from the Natu an to the Neolithic? × Is there a change in the overall health of the Neolithic populations

compared to the Natu an? × Is there a change in the diet and how is it expressed? × Is there a change in the physical burden/stress people had to bear with? × Is there a change in intra- and inter-community rates of violent encounters? From the cultural perspective the leading questions will be: × What was the change in the economy and when was it fully realized? × Is there a change in settlement patterns and site nature and organization from Natu an to Neolithic? × Is there a change in human activities and division of labor?

Community and Identity in Contemporary Technosciences Saint James Press

The volume offers a comprehensive introduction to the archaeology of the southern Levant (modern day Israel, Palestine and Jordan) from the Paleolithic period to the Islamic era, presenting the past with chronological changes from hunter-gatherers to empires. Written by an international team of scholars in the fields of archaeology, epigraphy, and bioanthropology, the volume presents central debates around a range of archaeological issues, including gender, ritual, the creation of alphabets and early writing, biblical periods, archaeometallurgy, looting, and maritime trade. Collectively, the

essays also engage diverse theoretical approaches to demonstrate the multi-vocal nature of studying the past. Significantly, *The Social Archaeology of the Levant* updates and contextualizes major shifts in archaeological interpretation.

[The Publishers' Trade List Annual](#) ABC-CLIO

The first multivolume encyclopedia to document the history of one of the most influential religious movements of the Middle Ages—the Crusades. *The Crusades: An Encyclopedia* surveys all aspects of the crusading movement from its origins in the 11th century to its decline in the 16th century. Unlike other works, which focus on the eastern Mediterranean region, this expansive four-volume encyclopedia also includes the struggle of Christendom against its enemies in Iberia, Eastern Europe, and the Baltic region, and also covers the military orders, crusades against fellow Christians, heretics, and more. This work includes comprehensive entries on personalities such as Godfrey of Bouillon, who refused the title "King of Jerusalem," and St. Bernard of Clairvaux, who tore up his own clothing to make symbols of the cross for crusaders, as well as key events, countries, places, and themes that shed light on everything from the propaganda that inspired crusading warriors to the ways in which they fought. Special coverage of topics such as taxation, pilgrimage, warfare, chivalry, and religious orders give readers an appreciation of the multifaceted nature of these "holy wars."

An ideal introduction, explaining the history and key concerns of cultural studies

The Human Act of Caring Rowman & Littlefield

In 1974, the academy award-winning film *The Sting* brought back the music of Scott Joplin, a black ragtime composer who died in 1917. Led by *The Entertainer*, one of the most popular pieces of the mid-1970s, a revival of his music resulted in events unprecedented in American musical history. Never before had any composer's music been so acclaimed by both the popular and classical music worlds. While reaching a "Top Ten" position in the pop charts, Joplin's music was also being performed in classical recitals and setting new heights for sales of classical records. His opera *Treemonisha* was performed both in opera houses and on Broadway. Destined to be the definitive work on the man and his music, *King of Ragtime* is written by Edward A. Berlin. A renowned authority on Joplin and the author of the acclaimed and widely cited *Ragtime: A Musical and Cultural History*, Berlin redefines the Scott Joplin biography. Using the tools of a trained musicologist, he has uncovered a vast amount of new information about Joplin. His biography truly documents the story of the composer, replacing the myths and unsupported anecdotes of previous histories. He shows how Joplin's opera *Treemonisha* was a tribute to the woman he loved, a woman other biographers never even mentioned. Berlin also reveals that Joplin was an associate of Irving Berlin, and that he accused Berlin of stealing his music to compose Alexander's Ragtime Band in 1911. Berlin paints a vivid picture of the ragtime years, placing Scott Joplin's story in its historical context. The composer emerges as a representative of the first post-Civil War generation of African Americans, of the men and women who found in the world of entertainment a way out of poverty and lowly social status. *King of Ragtime* recreates the excitement of these pioneers, who dreamed of greatness as they sought to expand the limits society placed upon their race.

Reference Guide to American Literature Saint James Press Prefaced by an account of the early days of Berryman studies by bibliographer and scholar Richard J. Kelly, "After thirty Falls" is the first collection of essays to be published on the American poet John Berryman (1914-1972) in over a decade. The book seeks to provoke new interest in this important figure with a

group of original essays and appraisals by scholars from Ireland, the United Kingdom, Hong Kong, and the United States. Exploring such areas as the poet's engagements with Shakespeare and the American sonnet tradition, his use of the Trickster figure and the idea of performance in his poetics, it expands the interpretive framework by which Berryman may be evaluated and studied, and it will be of interest to students of modern American poetry at all levels. What makes the collection particularly valuable is its inclusion of previously unpublished material – including a translation of a poem by Catullus and excerpts from the poet's detailed notes on the life of Christ – thereby providing new contexts for future assessments of Berryman's contribution to the development of poetry, poetics, and the relationship between scholarship and other forms of writing in the twentieth century.

American Popular Music Farrar Straus Giroux

Homage to Mistress Bradstreet, long poem by John Berryman, written in 1948-53 and published in 1956. Noted for its intensity, it is a tribute to colonial poet Anne Bradstreet that also reveals much about the author. The poem examines the tension between Bradstreet's personal life and her artistic life, concluding in a spirit of fatalism. It shows throughout a loving and intimate grasp of the details of American history. The work primarily examines creative repression, religious apostasy, and the temptation to adultery.

St. James Reference Guide to English Literature: 20th Century Poetry Saint James Press

The tomb of Christ at Jerusalem was a vital influence in the making of Western Europe. Pilgrimage there influenced the development of society and its structures. The desire to 'bring the Sepulchre to the West' in copies or memorials shaped art and religion, while the ambition to control Christ's tomb was a central objective of the crusades. Western Europe responded to the loss of Jerusalem by creating a new pilgrimage to the East, by making kingdoms 'holy lands' for their subjects, and by creating new pilgrim centres at home. This book brings together social, political, and religious themes often considered in isolation.

Robert Maynard Hutchins Rodopi

This open access edited book provides new thinking on scientific identity formation. It thoroughly interrogates the concepts of community and identity, including both historical and contemporaneous analyses of several scientific fields. Chapters examine whether, and how, today's scientific identities and communities are subject to fundamental changes, reacting to tangible shifts in research funding as well as more intangible transformations in our society's understanding and expectations of technoscience. In so doing, this book reinvigorates the concept of scientific community. Readers will discover empirical analyses of newly emerging fields such as synthetic biology, systems biology and nanotechnology, and accounts of the evolution of theoretical conceptions of scientific identity and community. With inspiring examples of technoscientific identity work and community constellations, along with thought-provoking hypotheses and discussion, the work has a broad appeal. Those involved in science governance will benefit particularly from this book, and it has much to offer those in scholarly fields including

sociology of science, science studies, philosophy of science and history of science, as well as teachers of science and scientists themselves.

Books in Print Washington, D.C. : Arctic Studies Center, National Museum of Natural History, Smithsonian Institution

Rewriting Early America argues the need for a subtler understanding of how post-1945 literary figures represent America's prenational past. Rather than focusing only on how literary representations of the national origins advance political critiques, this book also recognizes the recuperative visions found in many recent novels and poems.

The Deep Learning Revolution OUP Oxford

How deep learning—from Google Translate to driverless cars to personal cognitive assistants—is changing our lives and transforming every sector of the economy. The deep learning revolution has brought us driverless cars, the greatly improved Google Translate, fluent conversations with Siri and Alexa, and enormous profits from automated trading on the New York Stock Exchange. Deep learning networks can play poker better than professional poker players and defeat a world champion at Go. In this book, Terry Sejnowski explains how deep learning went from being an arcane academic field to a disruptive technology in the information economy. Sejnowski played an important role in the founding of deep learning, as one of a small group of researchers in the 1980s who challenged the prevailing logic-and-symbol based version of AI. The new version of AI Sejnowski and others developed, which became deep learning, is fueled instead by data. Deep networks learn from data in the same way that babies experience the world, starting with fresh eyes and gradually acquiring the skills needed to navigate novel environments. Learning algorithms extract information from raw data; information can be used to create knowledge; knowledge underlies understanding; understanding leads to wisdom. Someday a driverless car will know the road better than you do and drive with more skill; a deep learning network will diagnose your illness; a personal cognitive assistant will augment your puny human brain. It took nature many millions of years to

evolve human intelligence; AI is on a trajectory measured in decades. Sejnowski prepares us for a deep learning future.

The Sepulchre of Christ and the Medieval West Springer Nature

Many scholars, practitioners, and policy-makers in the cultural sector argue that Canadian cultural policy is at a crossroads: that the environment for cultural policy-making has evolved substantially and that traditional rationales for state intervention no longer apply. The concept of cultural citizenship is a relative newcomer to the cultural policy landscape, and offers a potentially compelling alternative rationale for government intervention in the cultural sector. Likewise, the articulation and use of cultural indicators and of governance concepts are also new arrivals, emerging as potentially powerful tools for policy and program development. *Accounting for Culture* is a unique collection of essays from leading Canadian and international scholars that critically examines cultural citizenship, cultural indicators, and governance in the context of evolving cultural practices and cultural policy-making. It will be of great interest to scholars of cultural policy, communications, cultural studies, and public administration alike.
